

**MATTRESSES AND FLOORING  
FOR AGRICULTURE**

## OUR COMMITMENTS

### We are certified in accordance with ISO regulation 9001.

*The Direction reiterates its commitment to implement the necessary resources to continue to improve client satisfaction and the competitiveness of the company, whilst ensuring the respect of safety of each person and the environment. Our company works with certification or standardization bodies (such as LNE, IANESCO, VERITAS, etc.).*

### AMFORI member,

*ID Group is committed to respecting social principles, and the principles of open and sustainable commercial exchanges (respect for the labour code, business ethics, non-use of child labour, non-discrimination, protection of the environment ,...)*  
*For more information, see [www.amfori.org](http://www.amfori.org)*

### REACH REGULATION

*In order to preserve your health and that of your cattle, IDS is committed to respecting the REACH regulations in force by banning from its products substances that are harmful or cause concern for health or the environment.*

*In accordance with our desire to reduce our environmental impact, we have chosen to offset the CO<sub>2</sub> emissions related to the printing of this catalogue by financing a sustainable development project.  
Scan the QR code to learn more.*

### IDS: Flooring specialist

For over 25 years, the IDS company has specialized in rubber flooring. The company has developed many products for the agriculture and has extensive experience in the sectors of entrance matting and industrial matting.

### Products tailored to every use

Cattle spend more and more time inside buildings. IDS has therefore developed sophisticated mats for each area of the barn, with specific characteristics so as to achieve the highest performance.

### Quality products

Because mats are subjected to large stresses during use, IDS is committed to providing quality products that have been tested and are covered by warranty.

The mats come with installation instructions that must be observed for best results. They are also available on our website or on request.

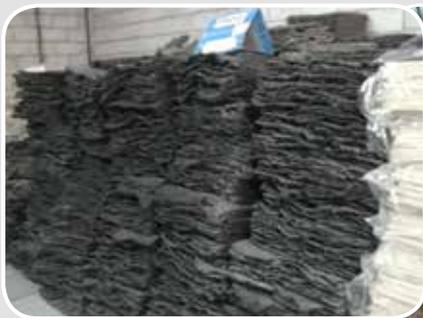

***Those installation instructions must be observed for each installation. Warranty will not applies in case of non-respect of those instructions.***

# RUBBER

*The IDS products are made of natural rubber. This natural material is produced from latex secreted by a tree: the Hevea.*

## Natural rubber:

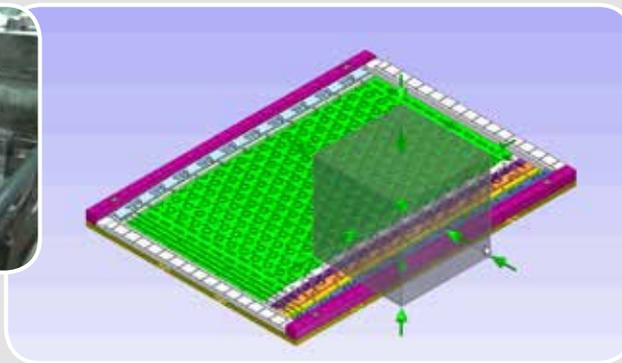

Natural rubber is produced directly from the transformation of latex. It is very resistant to abrasion and remains flexible even in freezing conditions or subjected to prolonged exposure to U.V. Putting in additives during the manufacturing process makes it possible to obtain rubber that is particularly resistant to oil (nitrile rubber) or more specifically and on request; fire classified rubber, or specific colors.

Latex harvesting from hevea plantations

**THE BEST RAW MATERIALS**  
IDS selects the noblest raw materials like natural rubber and conceives rubber mixtures specifically intended for an agricultural use.

**RESEARCH & DEVELOPMENT**  
IDS moulds are modelled in 3 dimensions. The research and development department of ID GROUP keeps working on improving its products.

**PRODUCTION**  
Creating the recipe, extrusion, moulding, calendering...  
IDS controls all the processing operations of the rubber thanks to efficient production lines.

# QUIETA

THE BEST VALUE FOR  
MONEY ON THE MARKET

T Profile: can be used to adapt the mat to the freestall dimensions. (Page 38)

Integrated slope 40 cm

**100% NATURAL RUBBER**

Not recommended for tie stall

Quick & easy to install thanks to puzzle junctions

8x80mm Hammer-in anchors with stainless steel screws & washers. 3 screws / place

## COMFORT

Bedding with unequalled comfort thanks to evenly positioned rubber pads on the lower side.

## SECURITY

Non-slip hammered upper side: fewer injuries, less stress, greater well-being and higher yield for the animal.

## HYGIENE

100 % natural rubber. Integrated slope at the back of the mat allowing the evacuation of liquids. High pressure washing.

## RELIABILITY

High resistance to crushing. Reduced maintenance costs, consumption of straw and cleaning time.

# CLASSIC

HEAVY DUTY MAT FOR  
TIE STALL AND FREESTALL

Hammered upper side

Grooved lower side

**100%  
NATURAL  
RUBBER**

8x80mm Hammer-in anchors with stainless steel screws & washers. 3 screws / place

Quick & easy to install

## COMFORT

Comfortable thanks to its structure made of natural rubber. Suitable for sleeping and long standing position in the case of tie stall.

## SECURITY

Non-slip hammered upper side. Facilitates cow sleep. Reduces the risk of injury.

## HYGIENE

High pressure washing. Grooves on the lower side to drain fluids.

## RELIABILITY

Heavy duty and non-deformable product. Reduced maintenance costs, straw consumption, and working time.

Four straight edges

# IDS SAND

RUBBER MAT FOR  
SAND BEDDING CUBICLE

## COMFORT

Maintains an even layer of sand.  
Prevents cows from digging pits in the sand.

## SECURITY

The straw top layer, prevents injuries and facilitates cow sleep.

## HYGIENE

The sand is a chemically inert material, it's soft and dry and it can't be altered.

## RELIABILITY

Reduced maintenance costs, working time and sand consumption.

Screw the mat in the bottom of the freestall pit, then cover with sand. Use straw to create a thick layer on top.

IDEX	50 x 50 cm	5 mm	8 kg/m <sup>2</sup>

# M69 / MR12 RUBBER GRATINGS

RUBBER GRATINGS FOR  
MILKING PARLORS PITS,  
CALF HUTS AND CATTLE  
TRUCKS

100%  
NATURAL  
RUBBER

Quick & easy  
to install

## COMFORT

Anti-slip mat.  
Relieves tired legs and  
back.  
Insulates from the cold.  
Ideal for calf huts.

## INSTALLATION

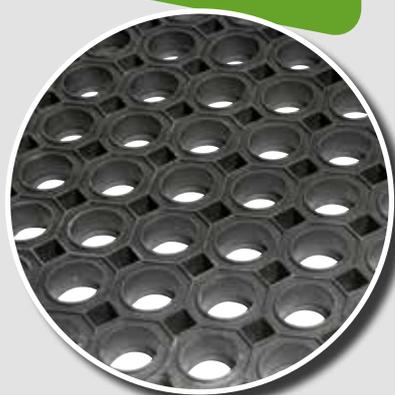

Easy to lay thanks to its  
light weight.  
Available in roll for a  
practical installation  
(M69 MINI and MR12).  
No fixing.

## HYGIENE

Easy to clean thanks to  
its light weight (can be  
removed for cleaning).  
Underside on draining  
studs.  
Resistant to most  
cleaning agents.

## RELIABILITY

Heavy duty product.  
Very good value for  
money.
