# INFACO

INFACO's solid experience is based on the invention by its founder, Daniel Delmas, of the **world's first electric pruning shears in 1984**. It was awarded the Palme d'Or for innovation at the SITEVI 1985 trade show as soon as it was released.

For 40 years now, the company has been constantly innovating to win the loyalty of its wine-growing, olive-growing, arboriculture and green space sector customers. INFACO has always been a forerunner in its field of expertise: **professional power tools**.

Currently, INFACO is an international business selling its tools in over **forty-five countries all over the world**. The company, which is managed by Davy Delmas, is based in Cahuzac sur Vère in the Tarn region of France, and remains firmly attached to its **authentic family values**.

**From day one, the company motto has been  
"one single goal, to satisfy you".**

# F3020 : THE ELECTRIC PRUNER FOR SHEEP AND GOAT TRIMMING

INFACO's pruners have been recognized for 40 years: power, speed, reliability, and ergonomics. After 9 generations, the F3020 is the worthy successor to all the brand's electric pruner models that have contributed to its success.

Even more efficient than its predecessors, it offers a higher cutting speed and improved working comfort. Lighter, more powerful, more compact, and more maneuverable, the F3020 adapts to all pruning professions.

First developed on the F3010, the hoof kit is now available for the F3020!

Designed for safe hoof trimming for both the animal and the breeder, it is engineered to reduce the effort required by the professional and allows for precise trimming. The gradual action of the pruner ensures precision and minimizes the risk of injury to the animal.

Removing excess hoof material from sheep and goats helps maintain their good posture and aids in preventing hoof rot. This action is essential but can be labor-intensive. The use of the F3020 pruner with the hoof kit will enhance efficiency during care procedures.

**Productivity gain\*:**

**+ 5 animals / hour**

**30 min / day**

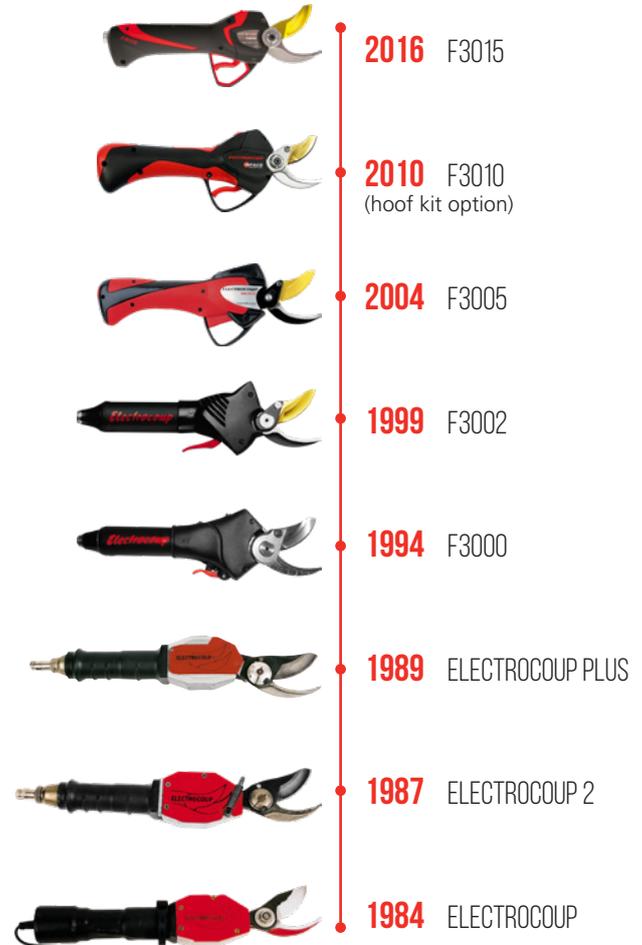

2022

F3020

**INFACO**

## ITS **STRENGTHS:**

- + High performance and
- + Maneuverability
- + Fast and powerful
- + Steering flexibility
- + Compact and lightweight
- + Versatile and adaptable
- + Technological and connected
- + Ergonomic and design

## CARRYING AND BATTERY

A new straight cable system intelligently running through the carrying vest to the shoulder enhances the feeling of lightness. Carrying the battery can be done in four different ways:

- In «classic» mode on the vest with straps
- On the belt (without removable straps)
- Via the trousers belt clip
- Directly in the pocket

The battery of the F3020 pruner operates with Lithium-Ion technology and weighs only 698 grams. Its sleek design and compact size allow for a full day of trimming without recharging.

The intelligent automatic charger provides a fast 2-hour charge to 100%. A «wintering» function for the battery prepares it for extended storage to optimize its lifespan, especially during long periods of non-use.

## 2 OPERATING MODES

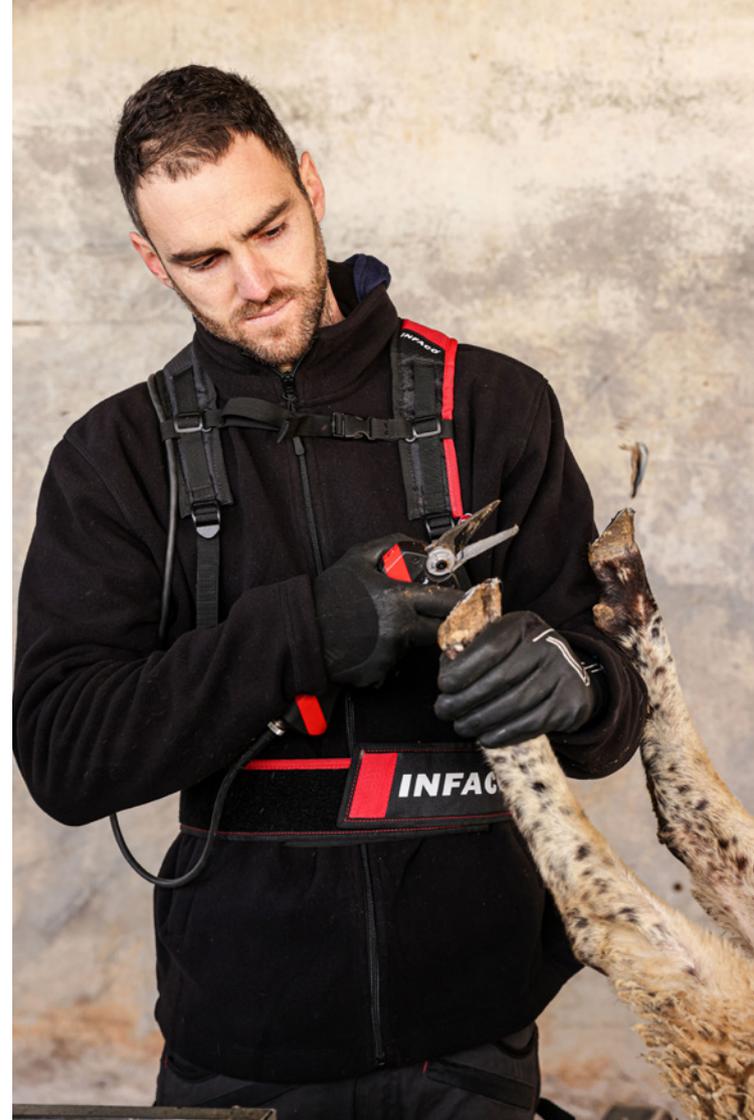

### SOFT mode

A new feature of the F3020 is its ability to operate with a gradually advancing blade at a slightly reduced speed. This mode is particularly suitable for achieving precision while limiting speed. Occasional trimmers or those in the learning process of the trade will adopt this mode to reduce blade movement acceleration.

### STANDARD mode

With its progressively advancing blade at full speed, it is suitable for experienced trimmers accustomed to using professional electric tools. With it, they will take full advantage of the F3020's capabilities: more powerful, more compact, faster, and lighter than its predecessor, the F3010.

# TECHNICAL SPECIFICATIONS

	F3020 HOOF KIT
Weight	708 g
Blade Opening	60 mm
Cutting Capacity	40 mm
Half-Opening Function	Yes
Half-Opening Adjustment	Yes
Blade Cross-Adjustment	Yes
Blade Advancement	Progressif
Operating Modes	Standard ou Soft
ON/OFF Switch on the Device	Yes
Battery Level Bar Graph	Yes
Aluminum Body Structure	Yes
«Settings» Button	Activation / Deactivation of the DSES* system *DSES not compatible with the hoof kit
	L100B BATTERY
Weight	698 g
Weight of the Straight Cable	122 g
Adaptable for Right-Handed/Left-Handed Use	Oui
Average Battery Life	8h, depending on usage
Time for Full Charge	2h (90% en 1h30)
Nominal Voltage	36 V
Charger Voltage	110 V / 230 V - 50/60 Hz
Battery Winterizing Function	Yes
<b>WARRANTY</b>	<b>12 months</b> (motor reducer 3 years, aluminum body guaranteed for life) <b>Possible "3-season" extension</b> with annual maintenance (see conditions with your distributor)

All device specifications are provided for reference and are not contractual; they are subject to change.

## THE OTHER **KITS**

The specialized hoof trimming tool is marketed in the form of a kit called the «hoof kit.» The F3020 is supplied with a choice of the standard or medium kit, depending on your preference.

Each kit is designed for a specific use, and all of them complement each other. It is possible and easy to change the cutting heads yourself in just a few minutes, depending on your requirements.

### **STANDARD KIT**

Blade Opening: 40 mm  
Ideal for vineyard pruning

### **MEDIUM KIT**

Blade Opening: 45 mm  
Designed for fruit tree pruning, forestry, and green spaces

### **MAXI KIT**

Blade Opening: 55 mm  
Suitable for vineyard renewal, fruit tree transformation, forestry pruning, or work in green spaces.

## OTHER F3020 **OPTIONS**

When used with the standard, medium, or maxi kits, the F3020 offers numerous options, including:

- Enhanced safety with the Additional Electronic Safety Device (DSES).
- Electronic adjustments for half-opening and blade cross-alignment.
- A patented pruner holder (for the standard and medium kits).
- Connectivity via an optional Bluetooth® module.
- A Bluetooth® pole, either fixed or telescopic, for work at heights.

*For more information on the kits and options, you can refer to the Electrocoup F3020 brochure, the new reference, or visit [infaco.com](http://infaco.com).*

# FRENCH MANUFACTURE LABEL

## “GUARANTEED FRENCH ORIGIN”.

The “Guaranteed French Origin” label mainly allows the company to proudly display its commitments to local players and thereby guarantee consumers a high quality product that is in line with highly appreciated French know-how. Such a label is the guarantee of quality that provides full traceability from the selection of parts that must mainly be produced in France, to the product design and final production.

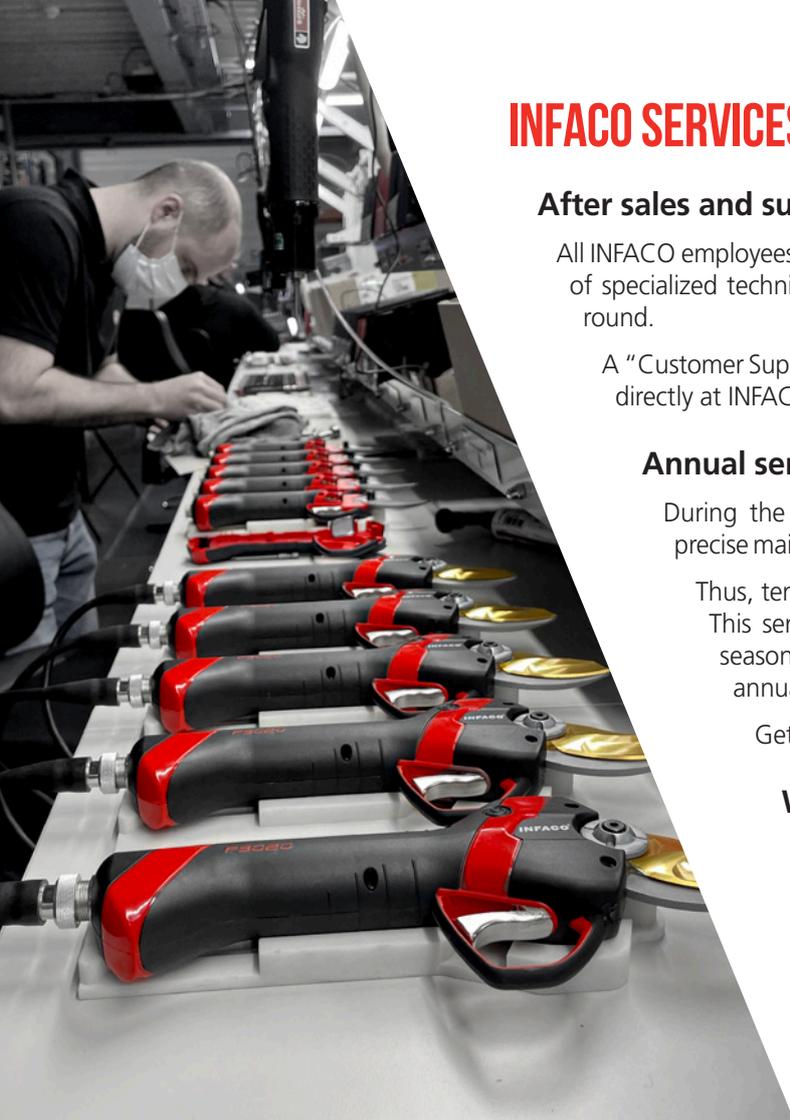

BVcert.6152145

**100% of INFACO pruning shears are manufactured in Cahuzac sur Vère, in the Tarn area of France.**

Producing quality tools and developing French production has been INFACO’s policy since it was created in 1984.

Quality and reliability have always been our core concerns. From design, through production, to marketing, then our after-sales department, we want to offer users excellent products and services that fulfill our strong human values.

We are humbled by this label, the pride of the company and an illustration of the know-how it strives to perpetuate over the years, with the sole objective of satisfying our users by providing certified, high quality products.

## INFACO SERVICES

### After sales and support

All INFACO employees want to guarantee users **excellent after sales service**. A team of specialized technicians looks after the machines returned to the factory all year round.

A “Customer Support” unit which is part of the sales department, can be contacted directly at INFACO. Also available all year round, it answers questions by phone.

### Annual servicing

During the off-season, INFACO proposes annual servicing which applies precise maintenance and upgrade procedures for shears and tying machines.

Thus, tens of thousands of servicing operations are managed every year. This service is highly appreciated by all users who can start the new season with peace of mind using tools that are ready to go after their annual servicing.

Get in touch with your dealer to find out more.

### Warranty

Subject to revision, the warranty can be extended for up to three seasons (valid for pruning shears and tying machines).

**The INFACO services have proved their effectiveness for almost 40 years.**

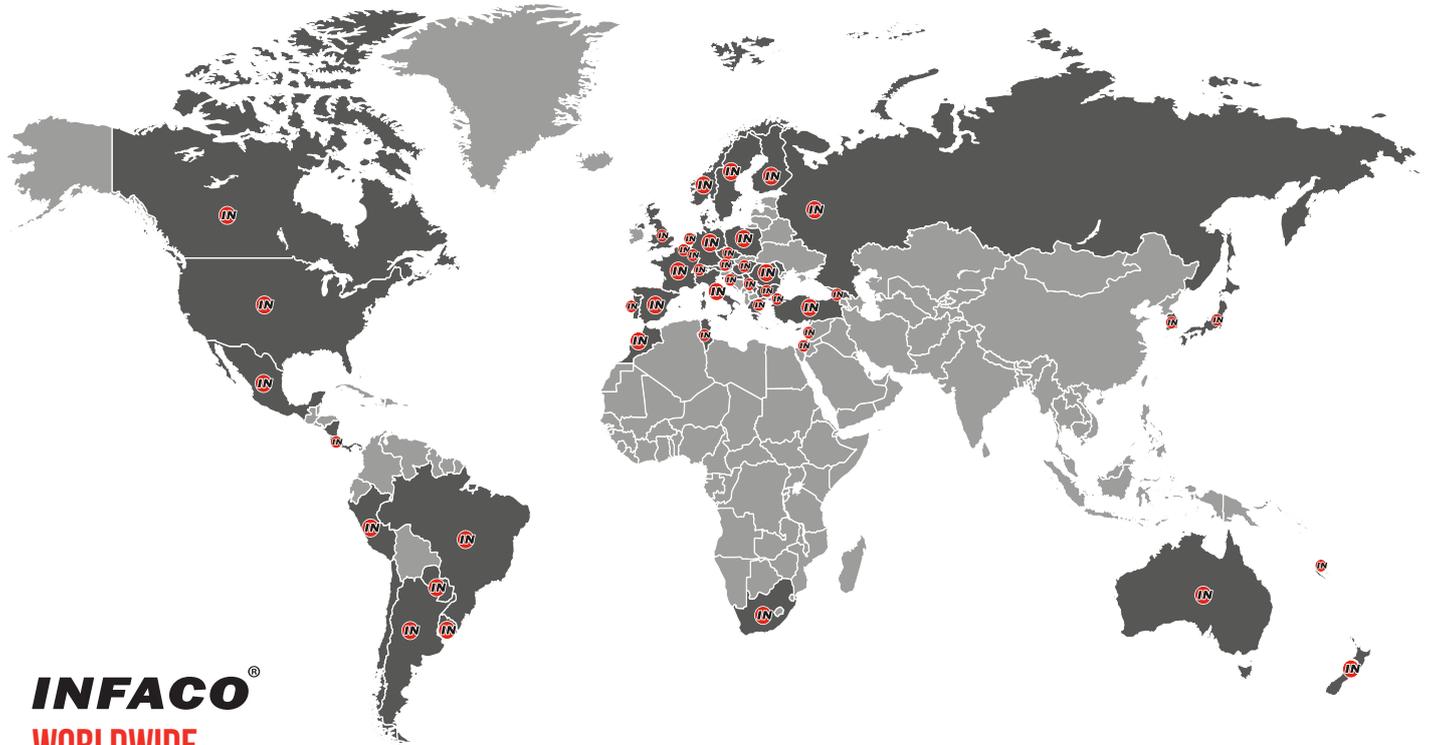

## OUR DEALER NETWORK

Thanks to an efficient network of distributors in France and abroad, the brand guarantees **an excellent level of after-sales service** to its users worldwide. The entire distribution network benefits from ongoing training by INFACO's team of technical sales representatives, to guarantee **effective local technical support**.

INFACO has always worked in close cooperation with its authorized distribution network.

We firmly believe that **our dealers play an important part in customer satisfaction**. Always available for advice on sales, product installation, use and technical support: **our dealers carry the brand's image and reputation**.
