

A I D A P T

We design innovative and adaptive AI solutions to  
improve your business

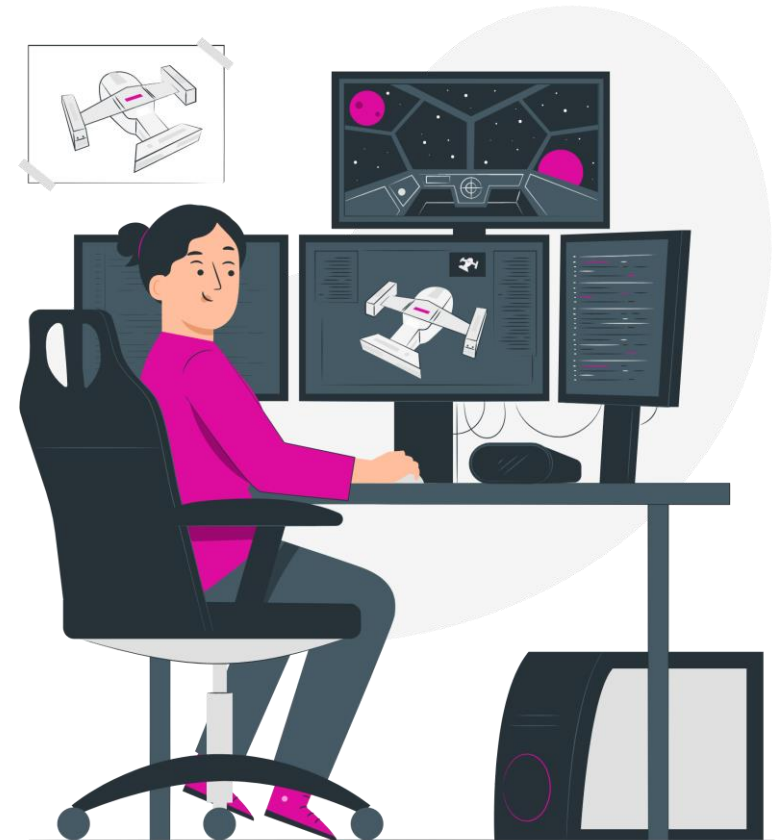

# TECH AUTOMATION

## Laser Printer Interface

We develop software on demand for companies which produce and supply high tech automations and consumables to the healthcare industry.

These companies are looking for software that enable them to offer innovative and high-quality products to their customers, and services for the optimal patient safety.

# AI DEVELOPMENT

Video/Audio processing

Object Generation

**Video/Audio processing:** we are working on topics in automatic video and audio analysis. Thanks to a thorough knowledge of the state of the art, our algorithms are often deployed by implementing modifications and optimizations specific to the field application.

**Object generation:** we have extensive experience in the field of neural networks: in recent projects we have made use of CNN, FC, and GAN for object generation.

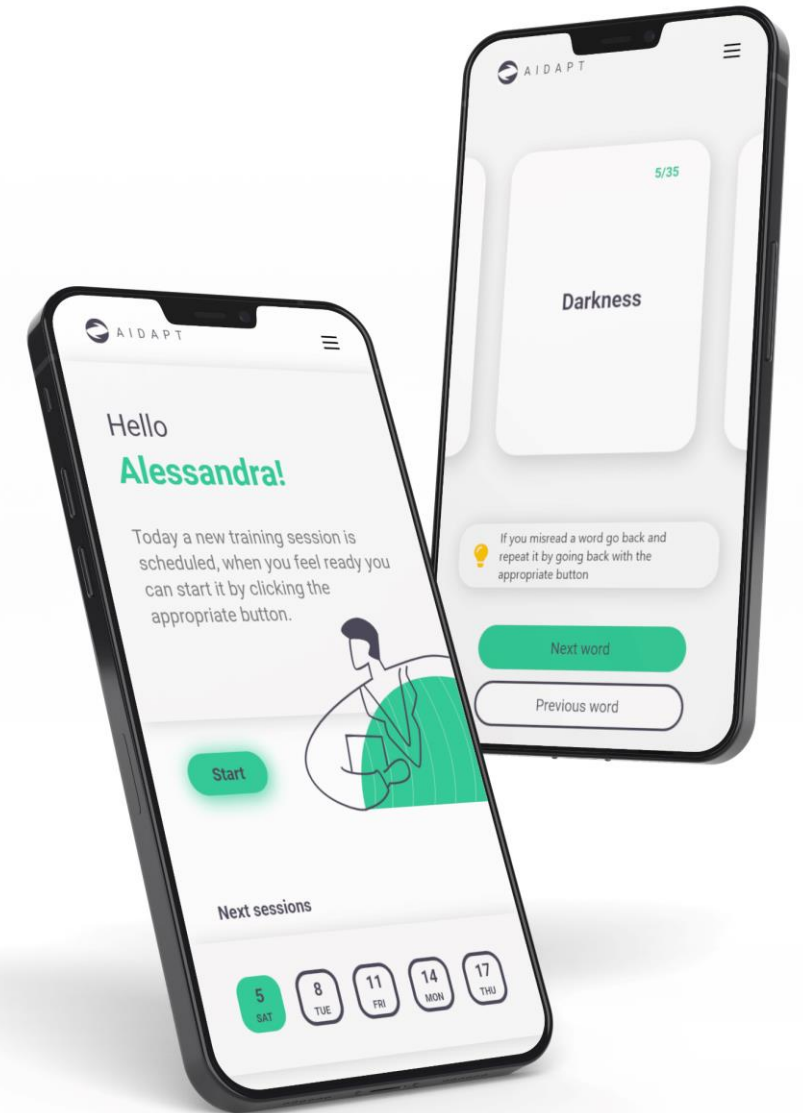

# HEALTHCARE

Homely Care

Humtelemed

**Homely Care:** a system that monitors patients, in an objective and non-invasive manner. The goal is to provide clinicians with a useful support tool to identify functional changes in patients, accelerating the implementation of any corrective strategies and reducing their stress level.

**Humtelemed:** a telemedicine platform that can facilitate the assessment of subjects/patients by providing accurate global cardiovascular risk assessment (RCVG).

# MOBILE

TYON

ECTHA

**TYON:** is a service that targets the restaurant industry. TYON offers an interactive digital menu that includes several smart functions that can reduce operating expenses borne by venues.

**ECTHA:** is a support application in the construction industry. It allows interfacing with specific measurement instruments and offers a range of data analysis tools.
