Win with Vyn in the race to Net Zero

Context & the problems we solve

Introducing Vyn SmartVideoNotes

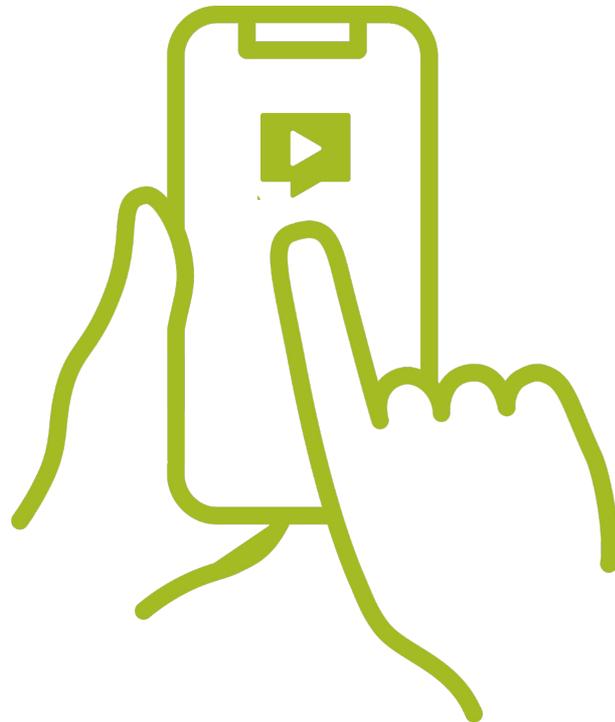

Customer Success Stories

How it works

Getting started

About us

How to get in touch

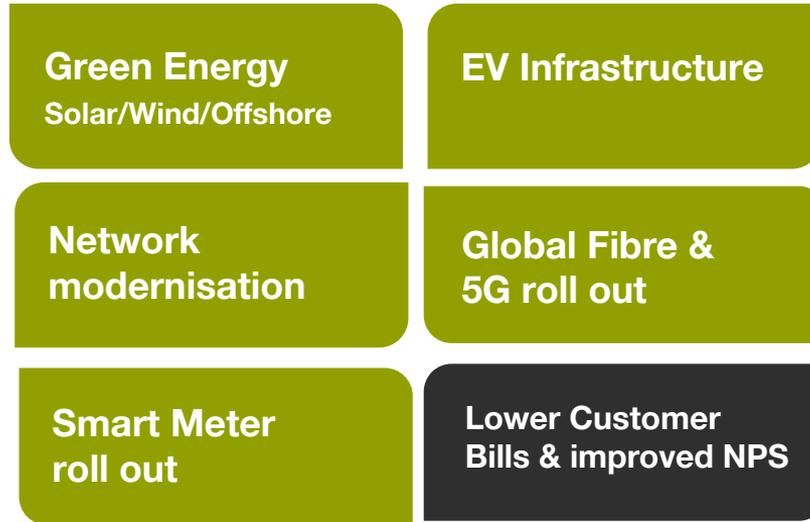

The Context

Energy, utility & telecom businesses are struggling to manage rising costs amidst regulatory pressures on quality, safety and customer service.

Customers expect a consumer-style easy to use digital experience from their service providers.

There is a **skills shortage** across multiple industries as there are fewer experts to get the jobs done.

Higher expectations to deliver infrastructure programmes **efficiently,** **on schedule, safely, sustainably and with quality**

Net Zero | ESG | Price controls | Skills Shortage

Deskless workers+customers lose time on archaic methods costing enterprises billions in avoidable field visits, re-work & poor customer service

Field Workers & Contractors

Filling out numerous forms/checklists, feeling inefficient, buried under paperwork

Poor safety process adherence

Customers & Agents

Inefficient, time consuming verbal descriptions of complex issues

Repetitive interactions: bad and costly CX

Experts & Supervisors

Struggling to inspect jobs in disparate locations with limited visibility

Increased risk for employees and customers

Management

Inconsistent data flow hindering accurate visibility and planning

Challenges in meeting ESG/SDG targets

Introducing Vyn SmartVideoNotes

Vyn SmartVideoNotes

We digitally transform frontline operations, capturing complex field information as **video data** to create **financial & ESG value**.

Vyn's AI capability **extracts value** from this video data to predict next actions, making it easier to get **more done with fewer experts**

Vyn addresses growing **pain points** as the industry embraces stringent net zero & sustainability targets

Enable safe works with a proactive culture

Give customers & colleagues greener and simpler ways of working & collaborating

Lower cost to serve & shorter issue resolution time

Achieve more with less
(supervisors/ experts)

Reduce risk with industrialised process across distributed assets/ sites

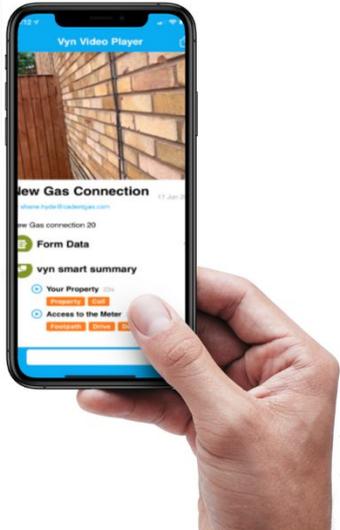

Reduce data silos across multiple parties with actionable knowledge base

Vyn SmartVideoNotes is a mobile-first SaaS Video AI platform*: **Simple. Smart. Secure. Scalable.**

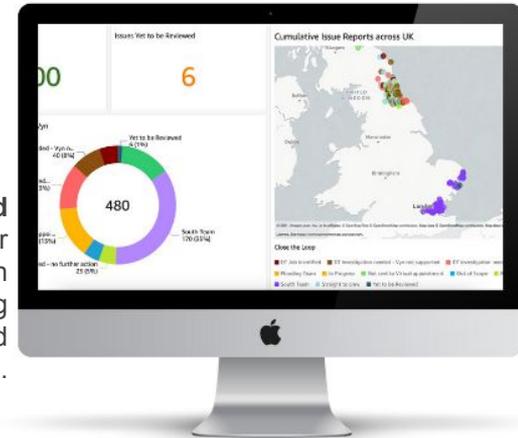

Vyn delivers Remote Assurance solutions tailored to your business needs, saving time, cost & carbon miles

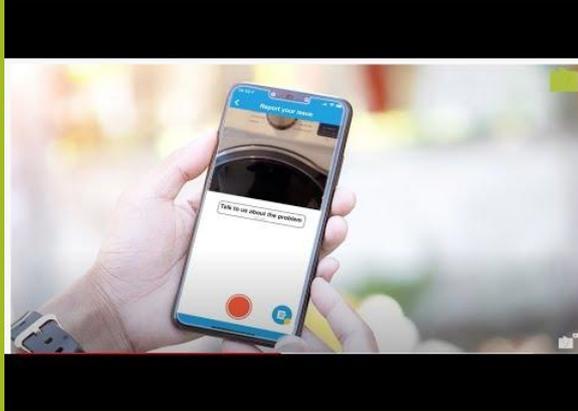

Capture Vyns - **immutable secure** video evidence from the field with guided mobile-first workflows

Vyns* are available in a **shared knowledge repository** in near real-time for tracking, collaboration and remote monitoring - saving time, saving unnecessary field visits.

*A Vyn is a Smart Asynchronous VideoNote that auto guides the user to capture the right data, and alerts the expert with searchable annotated video evidence to prioritise and get the job done.

Vyn: One secure platform, multiple use cases

**Efficient Customer Engagement
with Vyn SmartVideoNotes**

**Construct, Install & Commission
with Vyn SmartVideoNotes**

**Asset & Site Operations and
Maintenance with Vyn
SmartVideoNotes**

Proven use cases where Vyn has made a significant impact

Construct, Install & Commission with Vyn SmartVideoNotes

Efficient Site Surveys

Obtain all site data in just one visit, achieving Right First Time metrics

Reduced Snags Lists

Streamline, or even eliminate, snags lists for complex projects

Remote Supervision

Videographic evidence assures contractors' work for QA/QC enabling remote checks and monitoring from fewer experts

Faster Approvals

Enable limited expert resources to drive approvals with Vyn scene recreation, virtually

Automatic Handover Packs

Reduce friction and asset commission time with seamless, permanent, digital evidence

Proactive Safety Culture

Better situational awareness and process adherence across contractors/ subs with insightful leading indicators into management

Asset & Site O&M with Vyn SmartVideoNotes

O&M Asset Inspections

Carry out planned & unplanned maintenance, asset & safety inspections remotely - saving time, costs and carbon miles

Proactive Safety Culture

Assure both Process & Occupational Safety with better situational awareness and AI-powered feedback & leading indicators

- Near Miss Reporting
- Last Minute Risk Assessment
- Spot Checks
- Fresh Eyes

Efficient Customer Engagement with Vyn SmartVideoNotes

New Service Requests

Third parties (customers or developers) capture & share data for more efficient new connections/ green home surveys/ asset replacements

Faster Issue Reporting

Self-service reporting resulting in faster issue resolution

Customer Success Stories

We deliver **material business outcomes** in less than **10 weeks** for **global leaders** in over 15 countries

Proactive Safety Culture ↑ 10x

Accelerated response ↑ 20x

First Time Right Productivity

Reduce field visits ↓ 35%

Reduce time to acceptance ↓ 80%

Reduce snags & re-works ↓ 60%

Faster connections & issue resolution ↑ 85%

Avoid contact center calls ↓ 45%

ESG value enablers with digital
Upskilling, reduction in waste and
saved carbon miles

Customer testimonials speak for themselves

“ We found during the pandemic that, with Vyn, we **reduced field visits** by **32%**.

Nigel Watson
Chief Information Officer

“ Vyn proved simple to deploy and has resulted in a **35% productivity improvement**. We're helping customers make **greener choices** with this **innovative digital technology**.

Nikki Flanders
Managing Director

“ The great thing about Vyntelligence ... we've **reduced lead times by up to 85%** for the customer and got jobs completed **right first time**.

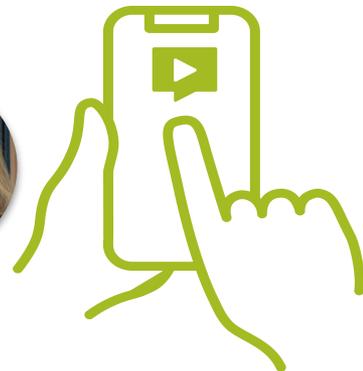

Mike Lapper
Head of Customer Experience

“ Vyntelligence has delivered **5x ROI** and **NPS is up 20%** in the first 8 months.

Pedro Ribeiro
Director, B2C Energy Services

Vyntelligence delivers **multiple benefits** across utility, energy and manufacturing clients

Delivering 100% response SLA for customer complaints

Vyn guided customers to record a pre-installation video for new connections & issue reporting to avoid surveyor site visits.

Apart from reducing lead time for mains replacement by up to 85%, customer complaints response within the 48-hour SLA has jumped to 100%

Reducing operational costs and improving customer NPS

EDP utilised Vyn for customer issue diagnostics and to enable remote assurance of work quality by 3rd party contractors.

Vyn's AI created an intelligent knowledge base of resolutions for agents to view and suggest to customers. This reduced unnecessary site visits by a third, and NPS was up 20%.

Improved order to delivery time and quotation accuracy

Vyn digitised the pre-install location survey for JLA, leading supplier of industrial laundry & catering equipment. This reduced order to delivery lead time by 21%

The improved survey quality eliminated revisits and gave clear situational awareness to delivery and install teams, reducing cancellations by 2% and driving improved customer NPS.

Vyntelligence delivers **multiple benefits** across utility, energy, telecom and manufacturing clients

Reducing cost and improving quality in the industrial ‘gig’ economy

BT Openreach deployed Vyntelligence to its 3rd party contractors for fibre installations and delivered a 68% reduction in work defects and a 93% reduction in handover audit failures. 100% of asset installation are remotely audited with Vyn. This has led to a 140% growth in installations.

Reducing truck rolls while delivering improved customer

NPS Northumbrian Water Ltd empowered customers to report their water leaks and issues with Vyntelligence. By enabling remote triage, site visits were reduced by 32% and NPS for site visits improved by arriving with the right team, tools and insight to fix customer issues right first time.

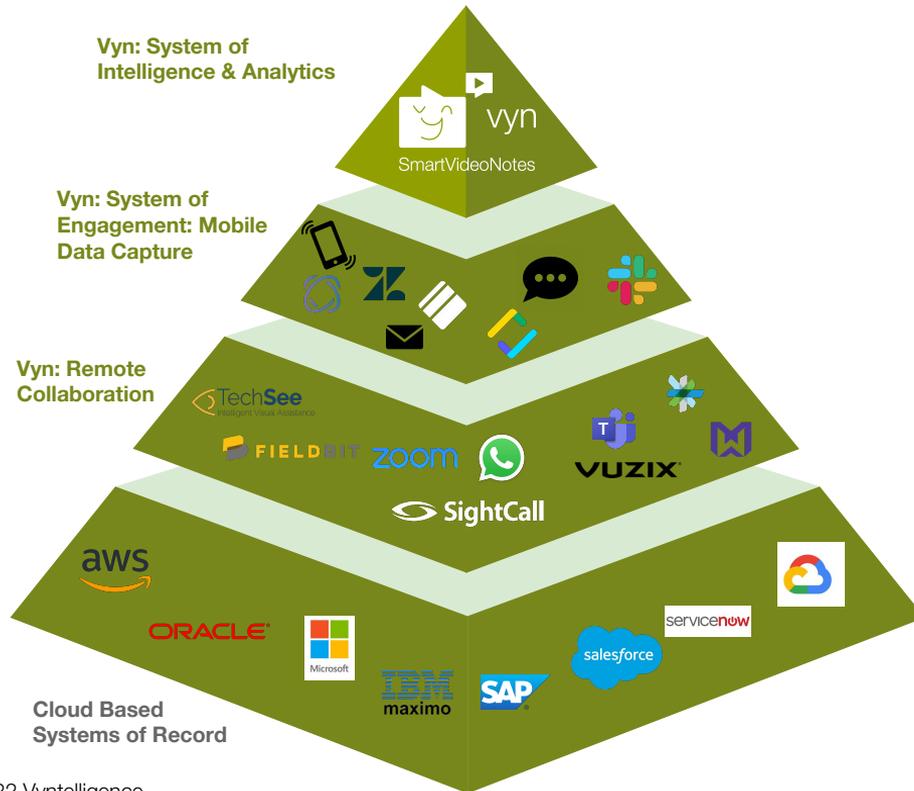

Reducing response time for critical site safety issues & driving cultural change

Engie implemented Vyntelligence to enable all field workers to identify and report safety issues in their daily activities.

AI assessment with human approval of the detected issues delivered a 20x improvement in the response time to safety issue reports.

How it works

Vyn is a comprehensive, scalable & extensible system of engagement and intelligence for field work

- **Digital User experience tailored** to analog and field work
- **Efficient and scalable** - with many-to-many collaboration (vs 1-1)
- **High quality data** supporting intelligent automation, **predictive insights and verticalized AI models**
- **Rapid deployment & Immediate ROI** by saving visits, saving expert resource time and driving productivity
- **Enterprise grade** security, privacy and auditability

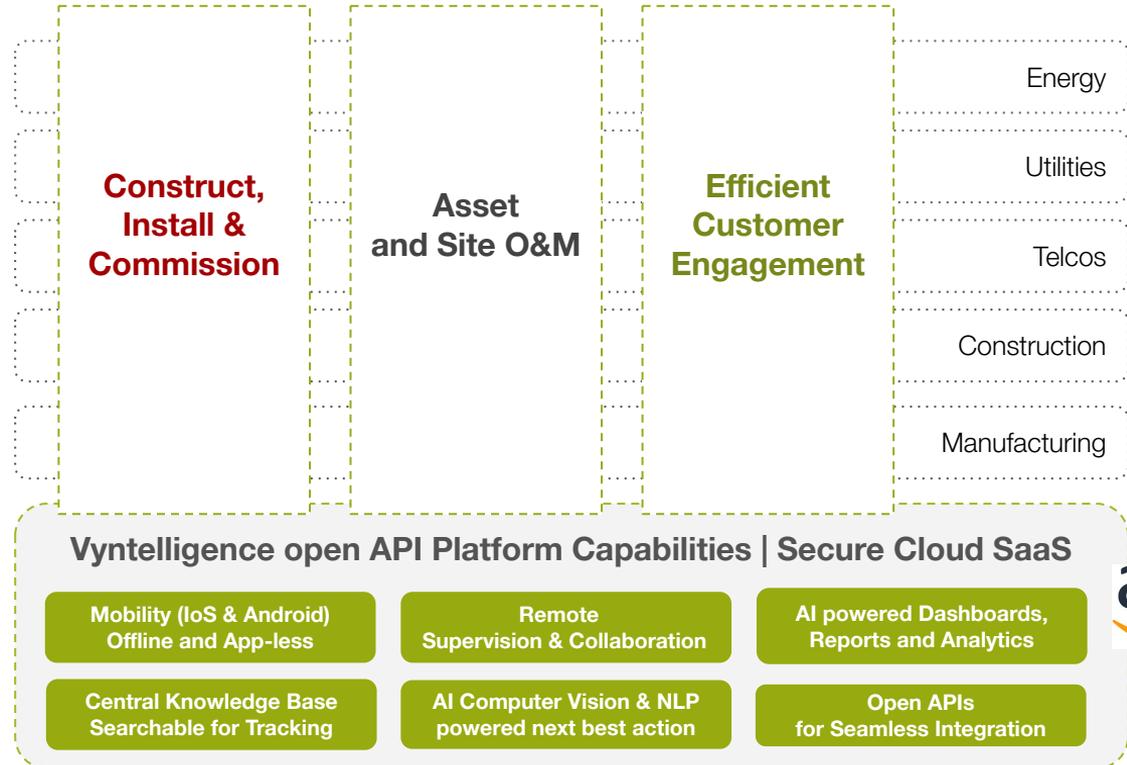

Enterprise grade platform that digitalises intelligently for **multiple industries** and **workflows** across 3 main areas

Vyn Added Value

- Increase NPS & upsells
- Reduce site visits
- Reduce re-works
- Reduce claims
- Proactive compliance
- Mobilisation of experts

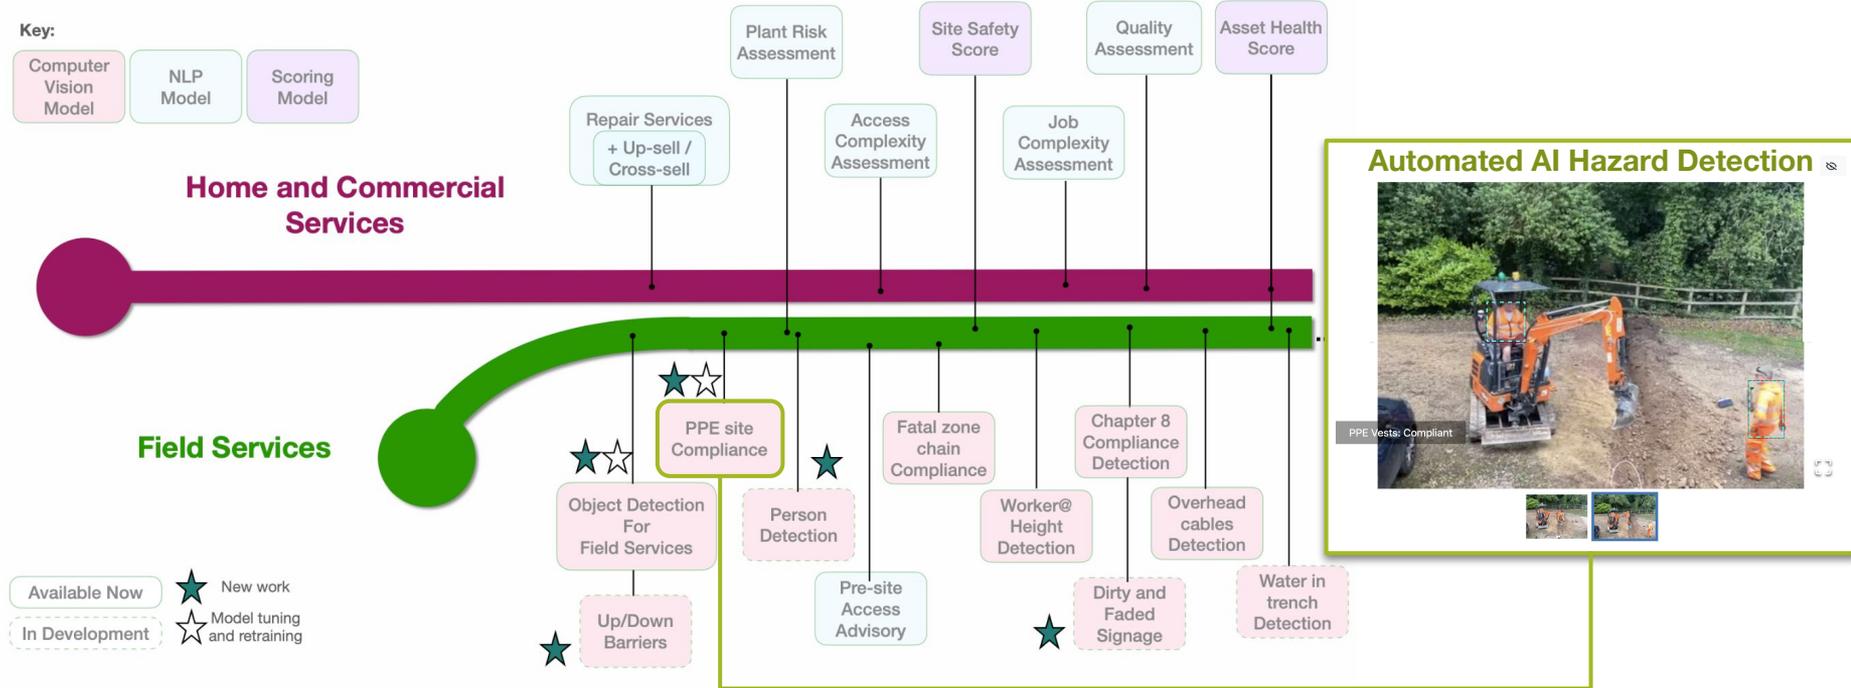

Vyn ESG Value

- Save carbon miles
- Enhance digital skills
- Save materials
- Improve asset lifespans
- Safer work environment

Vyn's growing AI catalogue **reduces manual intervention** with automated annotations and compliance/risk scoring

Vyn IP capabilities with AI and ML

How to get started

Vyn is deployed in 3 weeks and we offer a Pay-as-you-grow commercial model

USERS

Unlimited users & sub-contractors across both construction and O&M.

DATA

Data security approved platform with all storage included

ONBOARDING

Dedicated Client success team for on-boarding of authorised users and sub-contractors

PRICING

Volume based pricing

Timeline of Vyn deliverables and Benefits

Day 1

Day 90-180

Day 180-360

- Collect the right data at the right time
- **Empower users** to collect and consume data
- Processes adapted for **real-time field intelligence**
- **Remote supervision** for faster assurance

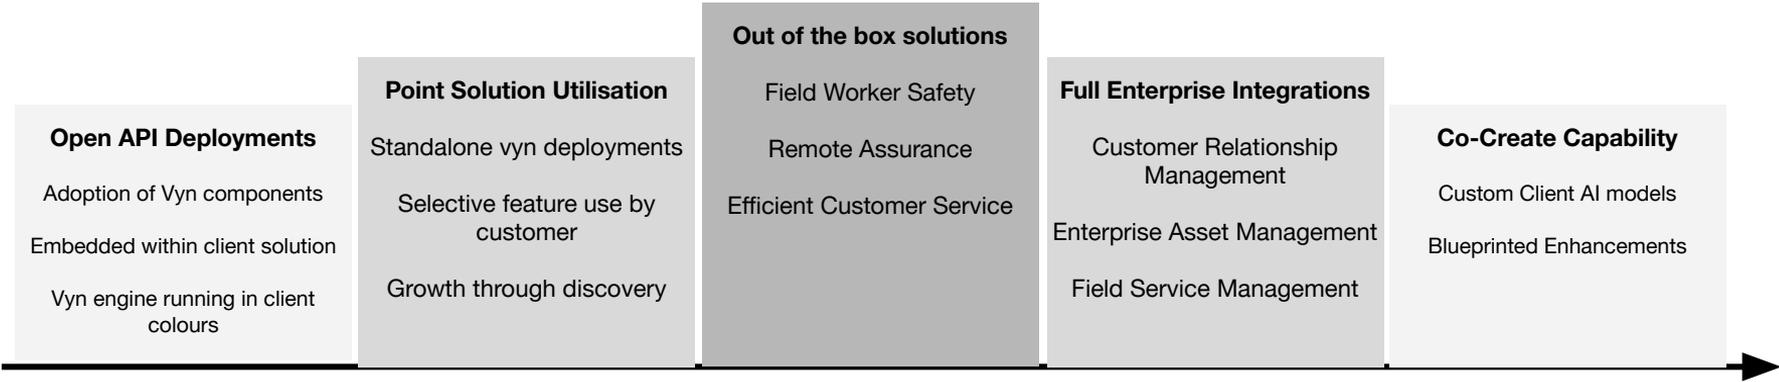

- **Draw insights**, correlations, and root causes after data collection
- **Enable automation** of assessments, triggers, and alerts

- **AI powered** Globally Searchable Knowledge Base
- Leading Indicators for proactive action

We offer multiple deployment models to suit different levels of solution maturity

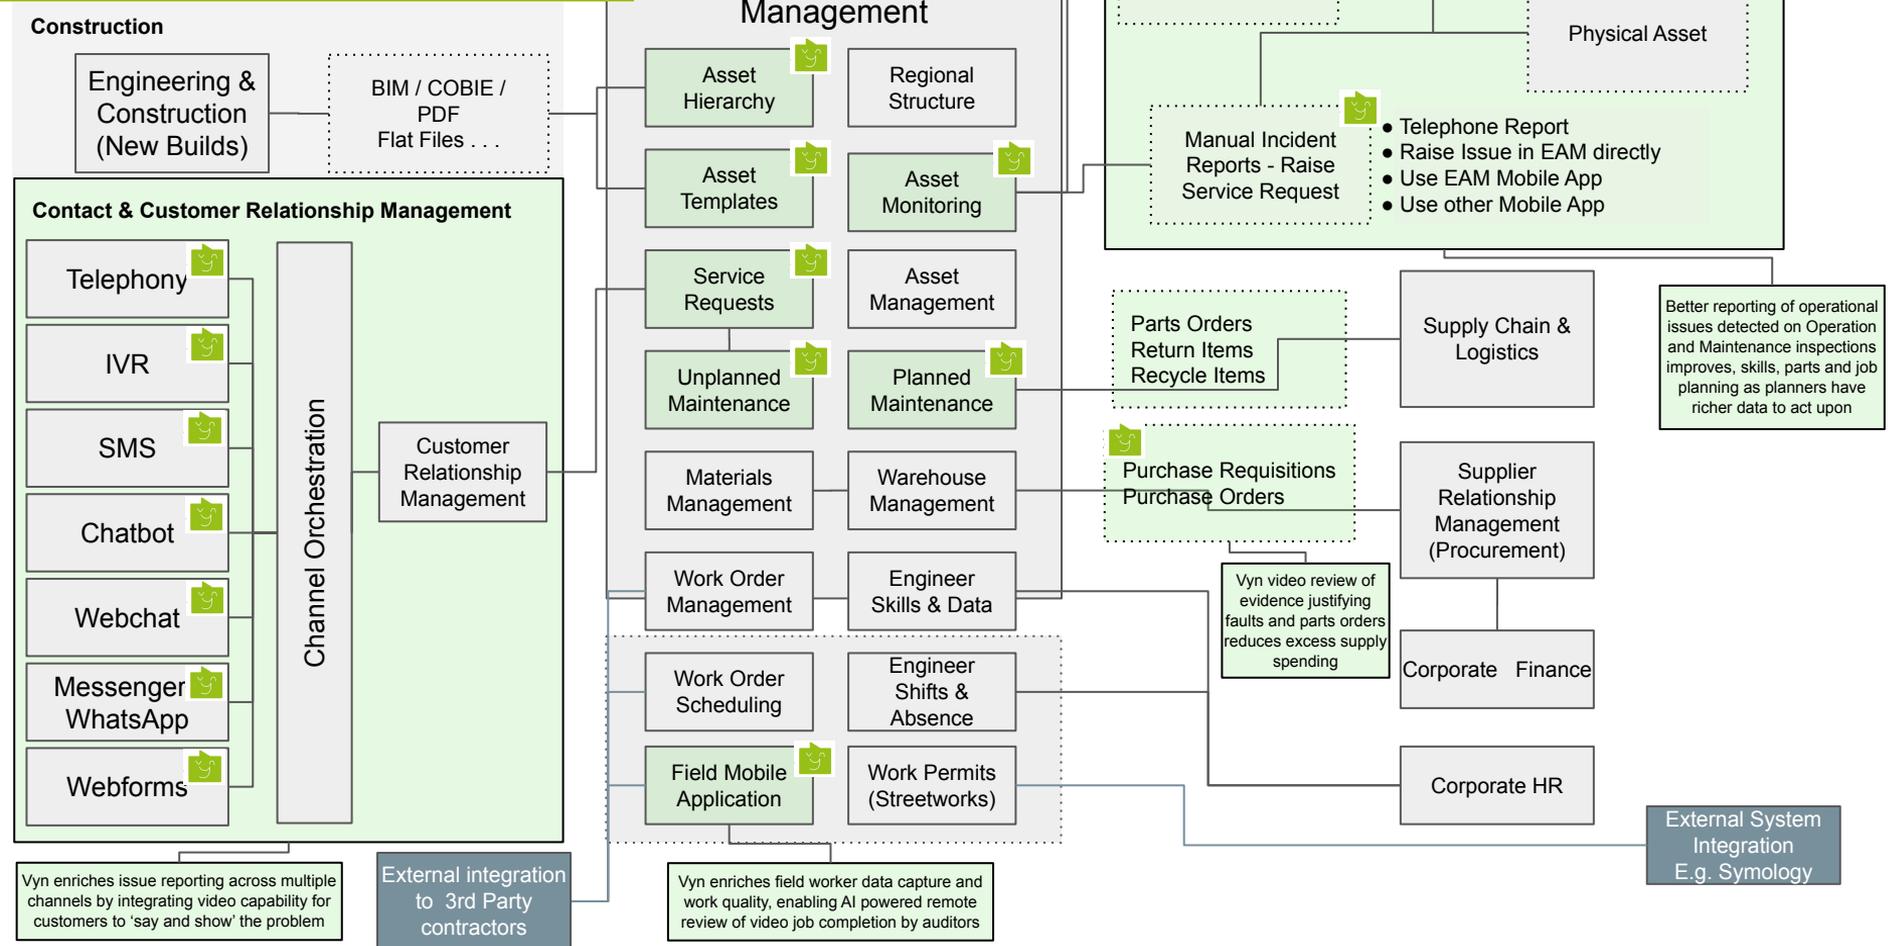

Vyn has deployed solutions at an atomic API level, as multiple standalone solutions and with tailored integrations to align to client landscapes, always with the best fit and ROI for our customers

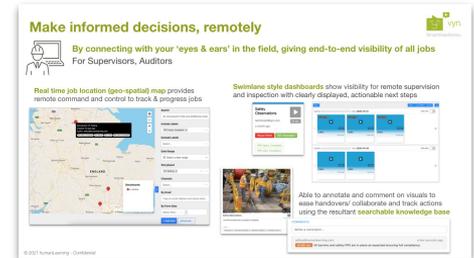

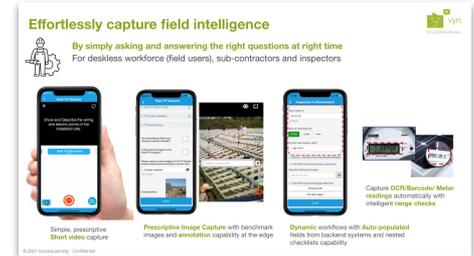

Different levels of client integration supported through our AWS powered Software as a Service Platform

Vyn capabilities within typical large enterprise architecture

Vyntelligence SaaS deliverables

1. **Mobility** for richer and smarter data capture, with patented vyn-prompted workflows, to get right insight at right time from right person
 - i. Multimedia data capture on mobile (video, audio, prescriptive images & forms)
 - ii. Purpose-built, configurable storyboards to ensure data quality and consistency
 - iii. App-based distribution for offline work
2. **Remote Supervision, Collaboration and Inspection** with manual, automated (AI-powered annotation) and leading indicators for rapid, timely action by right person
3. **Scheduling, Tracking and Analysis** to get the job done with **geo-map based interface** with intuitive Vyn dashboards
4. **Tamper proof, time stamped Reporting** for audit, claims and insurance purposes
5. **Simple user onboarding** across the supply chain (Customers, sub-contractors and suppliers) within minutes
6. **Swim-lane style dashboards** with easy-to-find insight on sites, assets and jobs
7. **Searchable Common Data repository (Knowledge Base)** to systematically correlate and organise the metadata & videos across multiple functions
8. **Enterprise grade Security and GDPR approved storage** for easy retrieval & auditability
9. **8x5 hours support** as standard

Clients get started in 3 to 6 weeks

Vyn delivers outcomes in quality and safety immediately

1. Discovery

Understand client context, priorities and desired business outcomes*. Align on use case(s)

3. Enable

Change champions, onboarding and governance led comms. Iterate with user feedback. Fine tune design elements if needed.

5. Review

Start realising value with operational insights & improvement. Iterate based on user feedback.

2. Design

Dashboards & Storyboards aligned to workflow and expected business outcomes. Simplify and re-imagine current process.

4. Deploy

Additional users onboarded. NLP-led AI categorisations* set up aligned with business need. Gets the job done. Faster outcomes. Avoids the need to view Vyns as we scale.

6. Roll out

New use cases. Roll out to further users. Realise further value. Prepare for CV-led AI outcomes* and alerts. Embed Vyn in business as usual

Weeks 1 - 2

Weeks 3 - 5

Weeks 6 +

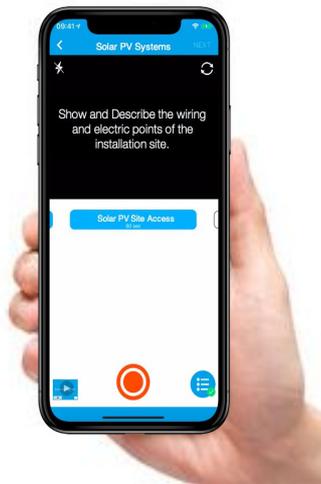

Free 2 week trial offer

Experience the simplicity of the Vyntelligence technology

Guided, focused data capture
(video, image and dynamic forms)
using **out-of-the-box storyboards**
e.g. Job completion, Asset works
and H&S checks

Remotely review field data captured and
experience **enhanced visibility and
collaborative working** using our
supervisory console - able to ease
handovers and track actions/ next steps

Pre-defined statistical dashboards
give you an idea of the insights available
showing KPIs & success metrics that
enable faster **root cause analysis** and
smarter decision making

About us

Our team prides itself on delivering to our core values of **Simplicity, Velocity, Trust & Mutuality**

Paris

Kapil Singhal

Co-founder & CEO

Company builder & Enterprise sales leader with experience of scaling 0 → £250M. Started as a field service engineer at **Ericsson**. Passionate about Sustainable Innovation. Co-authored 3 US Patents granted **London Business School (MBA)** **IIT Delhi (EE & CS)**

New Delhi

Arti Khanna

Co-founder & CTO

Loves to make products that impact work life in society. Successfully crafted multi-million dollar enterprise platforms at **Hughes (Aricent)**. **Multiple Patents holder** **NSIT (CS) Gold Medallist**

New York

Gaurav Baveja

Chief Financial Officer

Build partnerships, finance team and operational processes to drive growth. Previously **CFO+COO** of Vonage's SaaS business and **M&A Tech and Telecom investment banker** at Wells Fargo. **Columbia Business School (MBA)** **IIT Delhi (EE & CS)**

Houston

Mayank Sharma

Chief Data Officer

Solve business problems using convergence of human expertise, data, algorithms and systems. **Multiple patents** holder, widely published in ops research & mgmt science during his tenure at **IBM Research Stanford (PhD)** **IIT Delhi (EE)**

London

Tim Wood

Head - Software

Commercially focussed Software Architect who has delivered secure and reliable enterprise systems into Government, Banking and Telecom clients. **Imperial (PhD)** **Imperial (MEng)**

London

Mohit Mehta

AI (NLP & CV)

Loves to play with algorithms and find patterns in data. Previously led design teams for **image processing and graph analyses** at **Imagination Technologies** and at **Nokia Cranfield (PhD)** **IIT Kanpur (Math)**

London

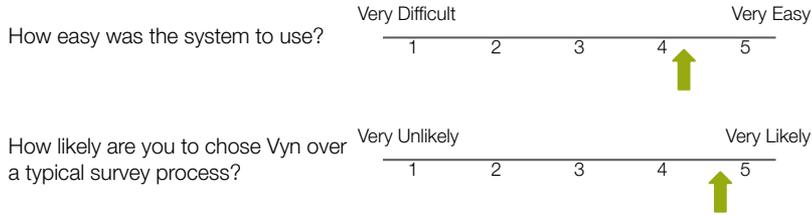

Mala Morris

Marketing & Channels

Pioneered white labelling of brands in FMCG and Retail industries working across Advertising, Research and Marketing at **Lowes-Lintas**, **Foodworld** and **IGD**. **IIM Ahmedabad (MBA)**

Gaining recognition from a growing community of Vynners
