Your legal, ethics and compliance functions become collaborative!

In the Legalcluster world, collaboration takes place in "clusters" organized by theme, issue, team and organization.

A cluster is a collaborative workspace that gathers all the useful information, documents, and workflows needed to address an issue, and makes them accessible and available to all stakeholders.

The data structured in the clusters is consolidated to facilitate mapping, traceability and reporting.

Govern your organization

Digitalize the legal and organizational structure of your group (legal entities, representatives, organization charts, useful documents) in the platform.
The information feeds all the modular paths of the platform.

Manage your subsidiaries and holdings

Manage the news and mandates of each of your subsidiaries and participations.
Consolidate the data in the appropriate form.
Each legal entity has its own identity card that contains all the information needed to carry out the legal operations that concern it: teams, documents (such as the KBIS), POAs, perimeters, etc.
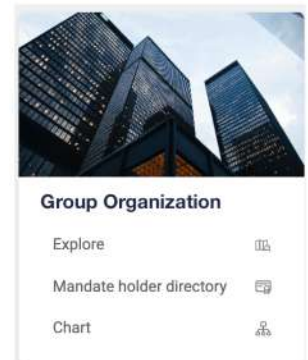

## Consolidate your POAs and track your key dates

All data is consolidated, accessible and exportable in dynamic dashboards to:
- Track key dates of mandates
- Facilitate auditing, reporting and data intelligence at the organization level as well as the platform level.

## Simplify your shareholder relationships

Each shareholder has access to the information that is relevant to them.
This makes it easier to maintain relations with your shareholders.
Structure your management package and manage its evolution over time: new round, leaver, new financial instruments, etc.
Your platform adapts to give you an accurate view of your organization

Secure your organization
# within the framework of compliance regulations

Manage your compliance programs and policies.
Provide your employees with a tool that simplifies their lives and allows them to easily declare gifts, invitations, conflicts of interest, and sponsorships in full compliance with your policies and programs.
Make it easy to manage your conflict of interest campaigns and bring your organization into compliance with compliance regulations & authorities requirements
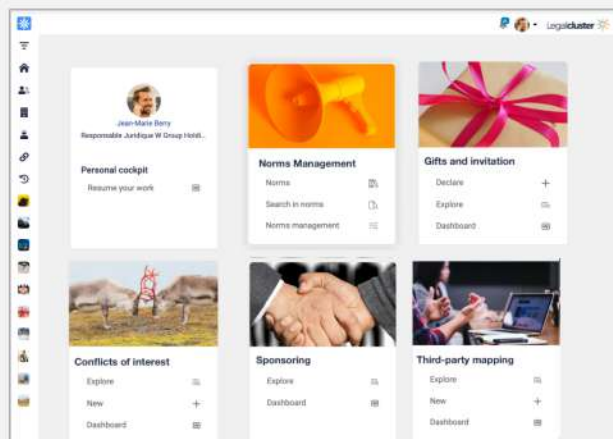

Structure, manage and publish your compliance programs and policies

Our platform allows you to highlight all the elements that make up your compliance programs, by theme, view, hierarchy of standards, etc.
Each employee has access to the elements that are useful to them, regardless of the complexity of your organization.

Norms Management

Norms	
Search in norms	
Norms management	
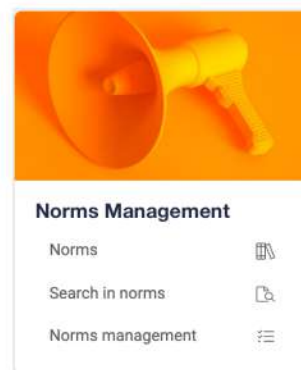

A quick and easy declaration and validation process

Your employees declare their gifts, invitations, conflicts of interest, sponsorship, etc. in less than two minutes!
Once informed of the policies in force, the employee enters the necessary information to which he can attach documents and explanations.
The data structure, reference points and thresholds are defined according to the applicable program. It is possible to create as many types of forms as needed to cover the different programs & policies in place.

A dynamic mapping of your third parties

Manage your third parties in a platform logic. Each third party has a real dynamic "profile" that can be mobilized throughout the process and that collects all the useful data.
Entrust screening tasks to a professional with our APIs to our partner solutions.

# Deploy your Matter Management platform based on your business needs & operational data

Manage your projects, contracts & litigation in a collaborative manner with all stakeholders (including your lawyers if necessary). Approve and sign contracts easily. Manage your risks. Consolidate data for your reporting.
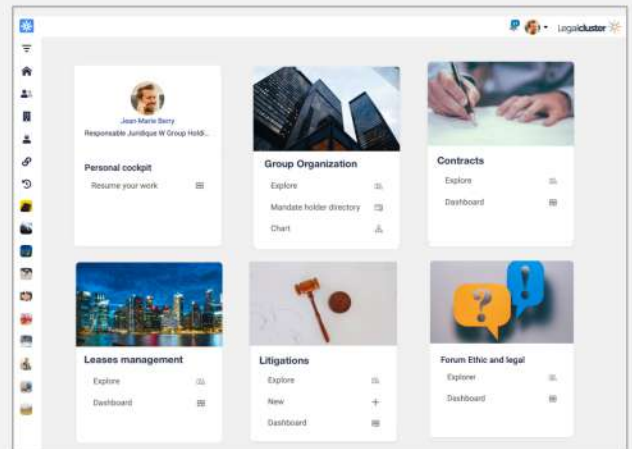

Collaborative and secure contract management

Legalcluster considers contract management in a collaborative manner, with all stakeholders, legal and operational, in order to bring value to the entire contractual cycle.
The cluster approach allows us to consider all types of contracts, serving all of the organization's businesses.

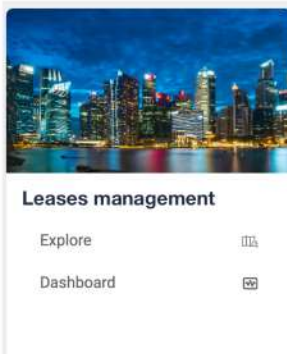

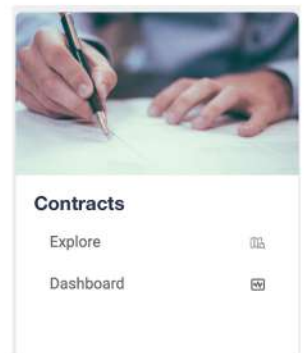

Each contract has its own module

The flexibility of our data structures allows us to build the pathways you need to manage your contracts, whatever their specificities.
> Stakeholder management, milestone tracking, document management, alerts & notifications, reporting, validation workflows, electronic signatures, archiving.

Litigation management in project mode

Legalcluster allows you to manage your litigation with all the people involved internally and with your counsel.
> Procedure tracking, document management, risk assessment, activities, milestone tracking, alerts & notifications, reporting, ERP & CRM integration
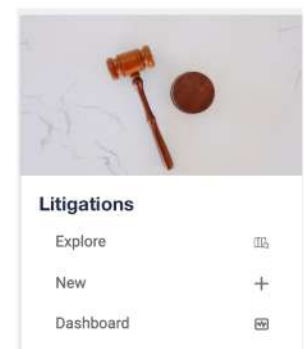

Increase your legal security within your ecosystems

Your employees and your ecosystem form a legal community that serves the security of your organization.

Everyone in your organization can rely on the support of your legal functions with ease and efficiency, while the people in charge of these functions spread the legal culture within your communities.

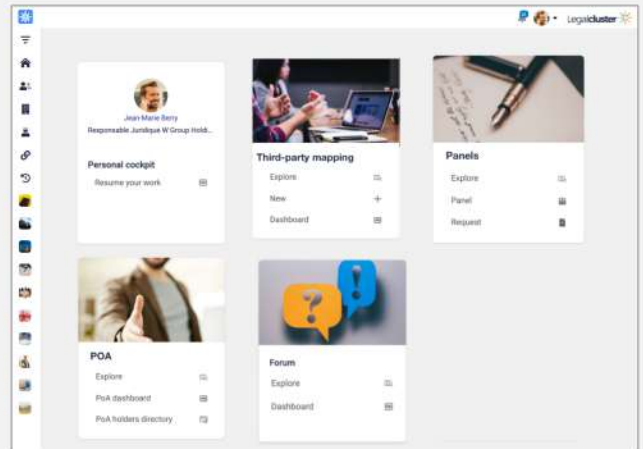

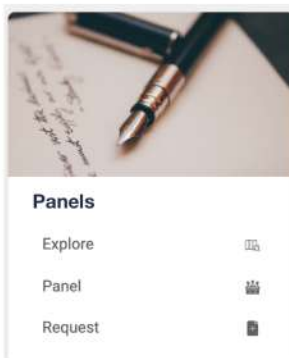

Make the mapping of third parties a reference tool accessible to everyone in the company

Manage your third parties in a platform logic.
Each third party has a real dynamic "profile" that can be mobilized in the other modules, and which collects all the useful data.
Entrust screening tasks to a professional with our APIs to our partner solutions.

Manage your legal panels and optimize your costs

- Request a quote from your lawyers
- Get several offers, compare them and choose the one that best fits your expectations and budget
- Save time by centralizing your requests and responses
- Apply your purchasing policies and templates
- Manage the compliance procedures of your customer / supplier relationships

Manage your PoA & mandates

All data is consolidated, accessible and exportable in dynamic dashboards to :
- Track key dates of mandates
- Facilitate auditing & reporting
