waterproof

Spark 1 only delivers
electricity to the users
you previously granted
an access to the service.

A complete ecosystem

Sparklin Chain

Data Feedback

Thanks to our secured technology, Spark 1 sends the information to your dashboard.

Sparklin App

Apps for users and installers

Bye bye paperwork !
Use our integrated wallet
and edit your bills of cost in
one click.

Sparklin Manager

Our management tool

You just need a tablet or
a laptop to manage your
service offer and check
how the plugs are used.

Its 4 **avantages**

Master the energy consumption

-
Thanks to its 16A capacity, you don't need to upgrade your electricity subscription.

A flexible service offer

-
You can easily integrate Sparklin to your existing service offer, as you want.

After sales service

-
Be safe! At Sparklin, we value proximity and reactivity.

All eyes on you !

-
By offering this service, you attract more visitors and improve your image.

INSTALLATION

- 1.** Spark 1 is easily installed both indoors and outdoors against a wall
- 2.** A certified electrician can put your Spark 1 into service
- 3.** The overall price depends on the installation

OPTIONS

- + Intall your plugs on a pole
- + After Sales Service
- + White label (on demand, depending on the volume)
