ARTIFICIAL INTELLIGENCE

The background of the slide features a close-up of a person's hand, likely a healthcare professional, wearing a white lab coat and a black wristband. The hand is positioned as if interacting with a digital interface. Overlaid on the image are white, glowing circuit lines and various icons: a thumbs-up, a laptop, a network of three nodes, a magnifying glass, a circular arrow, and a line graph with an upward arrow. The overall aesthetic is futuristic and technological.

The most advanced technology on the market to support your clinical staff

Advantages and benefits

- Technology allows detections not visible to the human eye
- HIPAA, GDPR and LGPD compliance
- Monitoring of the technical quality of exams
- Emergency prioritization
- Detection of anomalies and frauds
- Automations that streamline doctors workflow
- Interoperability between different systems

Explainable AI

Accuracy above 90%

Customization

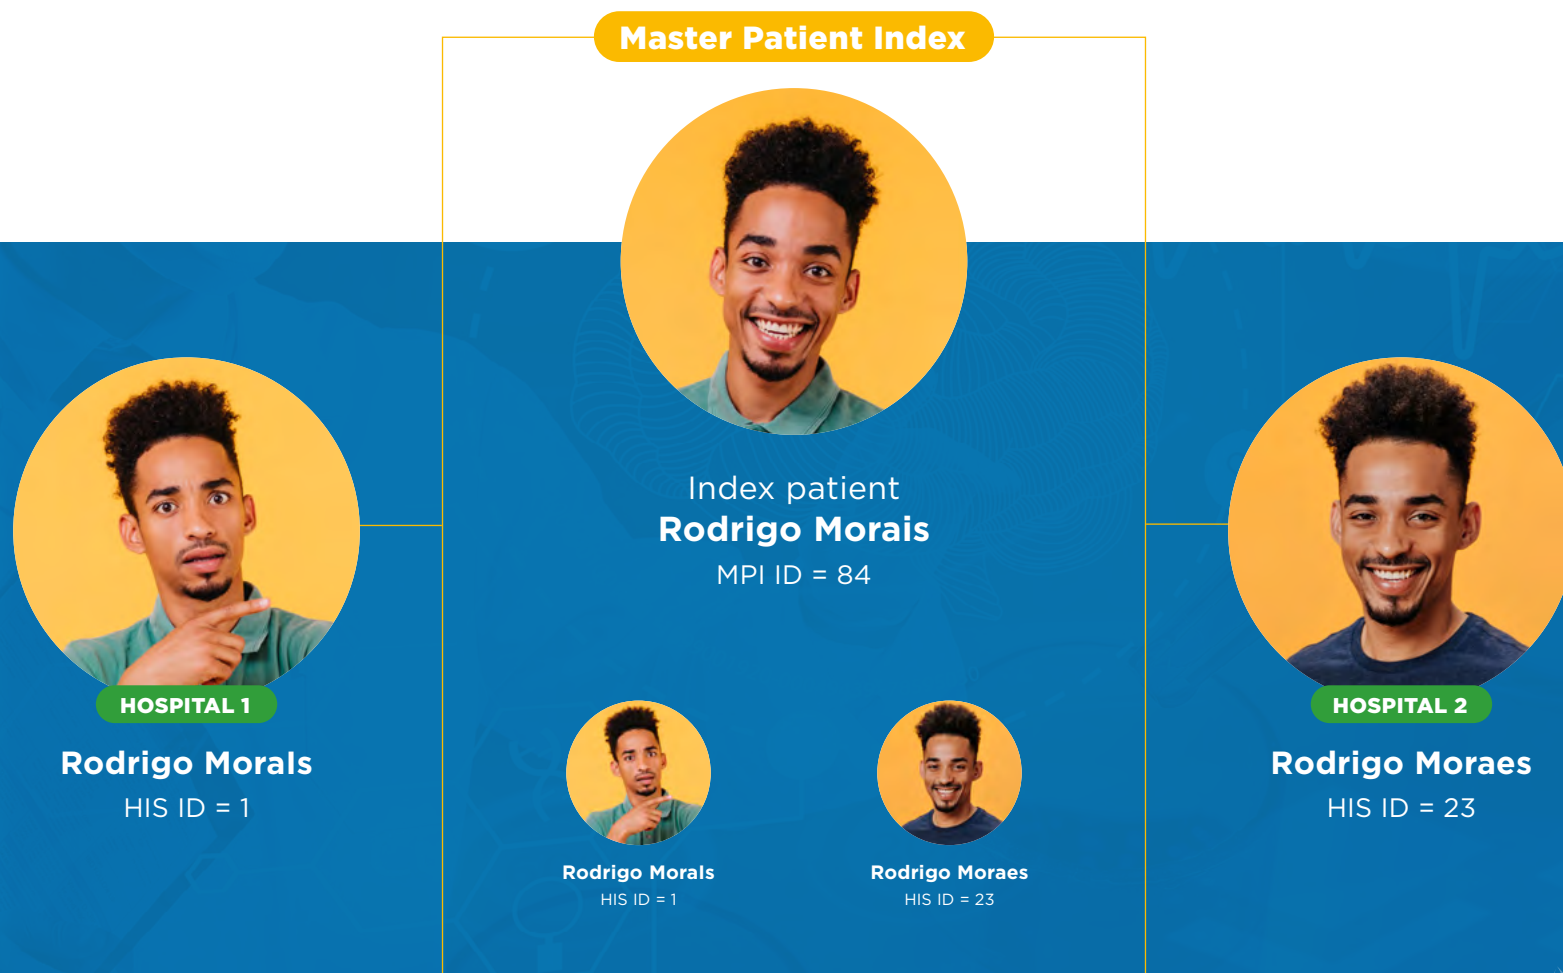

Our artificial intelligence and machine learning algorithms are developed and trained according to your business needs.

In this module, our team develops a unique artificial intelligence model for your clinic or hospital based on the history of exams performed.

Have a more assertive result, according to the most latent need for your business.

EMPI module

Database with patient information that integrates several systems from the same organization in order to group duplicate records and reduce errors.

Management reports

Data integration and dashboards according to the needs of your health unit.

- Fast communication between systems
- Indicators of possible problems
- Risk situation alerts
- Predictive medicine
- Population health management

MEDICAL REPORTS PLATFORM

Portal Telemedicina offers a complete system with integration and Artificial Intelligence, taking the digital health process to a new level

Forms of acquisition

Our doctors

Through our reporting platform with exclusive integration and 'AI, our team of medical specialists is available 24/7 to report exams, making the diagnostics process 10 times faster.

Your doctors

If your healthcare facility already has doctors, we offer the technology on demand, with adequate and simplified training.

We integrate with all systems and equipment on the market.

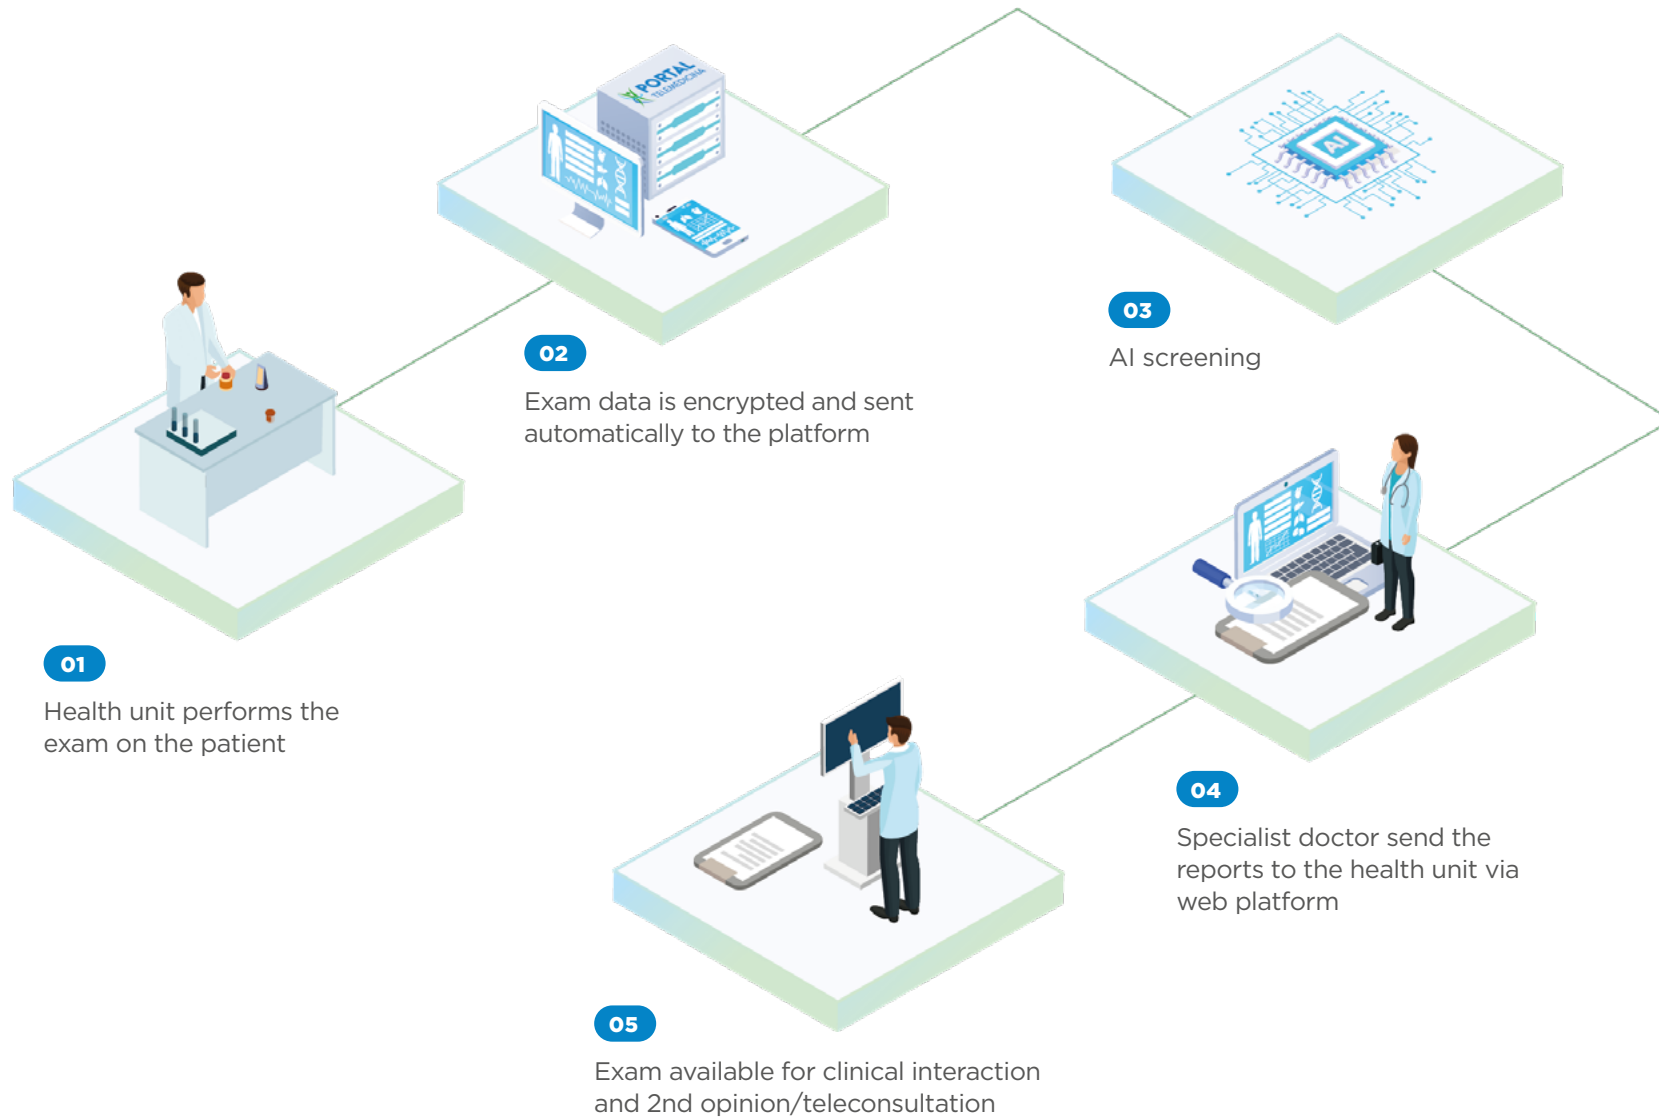

Advantages and benefits

- Screening of exams - doctors receive exams in order of priority according to urgency
- Reports delivered on the same day. In urgent cases, they're delivered within 5 minutes
- Security, technical support and daily image backups
- Renowned medical specialists
- Digital signature, with watermark and protocol number

Telediagnosis process

Specialties and exams

- Ambulatory Blood Pressure Monitoring (ABPM)
- Bone density scan
- Campimetry
- Dermatology
- Electrocardiogram (EKG)
- Eletroencephalogram (EEG)
- EEG with mapping
- Ergometric Test
- Holter monitor
- Ishihara Test
- Magnetic Resonance Imaging (MRI)
- Mammography
- Otolaryngology
- Spirometry
- Tomography
- Visual acuity
- X ray

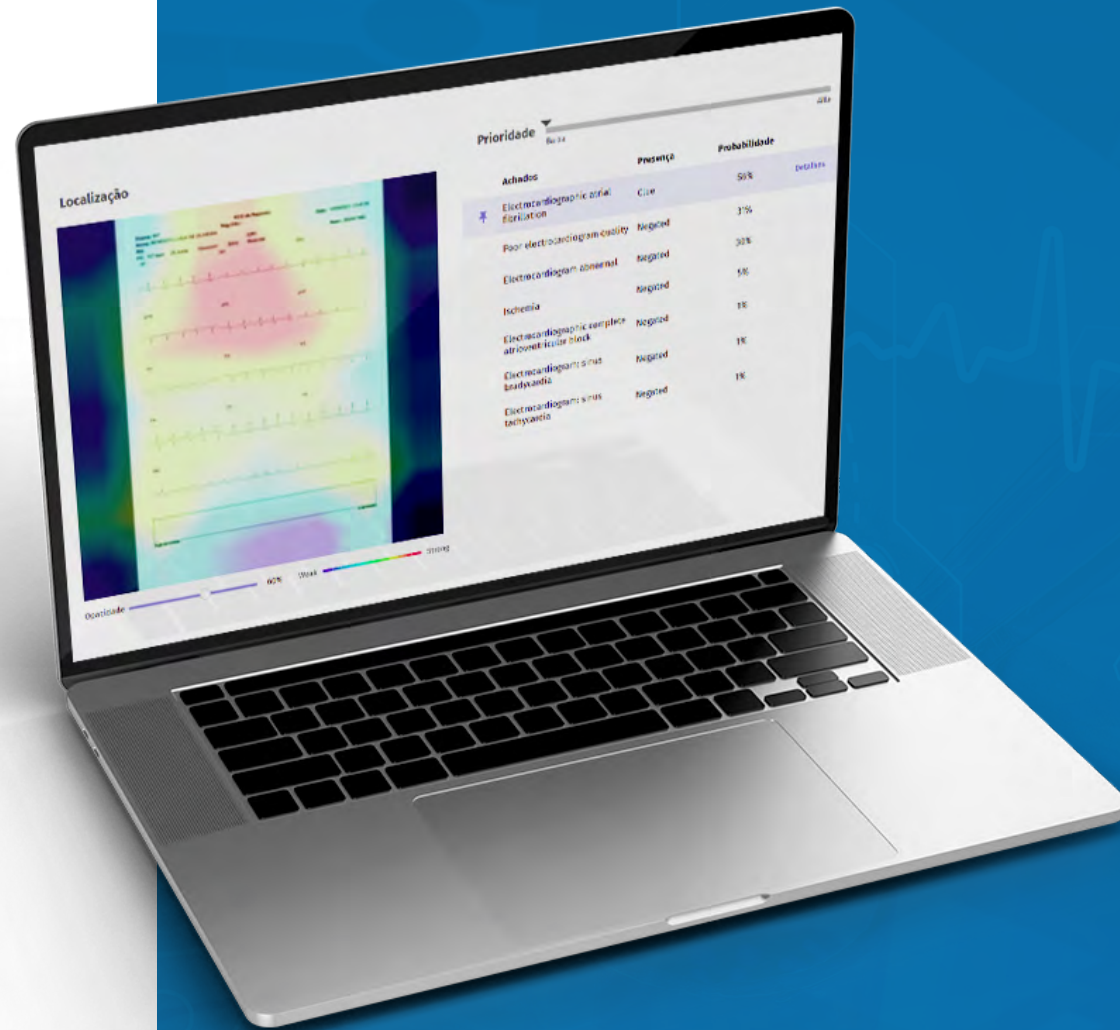

Telecardiology with guidance

Deliver ECG test reports within five minutes for urgent cases.

If the patient is at risk, a Portal physician contacts your health unit to issue an alert and guide the conduct to be adopted.

- Diagnostic 10x faster
- Reduction of mortality from myocardial infarction
- Reduction of readmissions
- Reduction of rehabilitation time

HOW WE SAVE LIVES

With this solution implemented in health units, Tarumã, a city in the state of São Paulo, achieved:

45% reduction in the number of deaths from heart disease in one year

30% cost reduction with heart disease care in 18 months

28% less cost with patients transportation

Make qualified doctors available 24/7
a day and 7 days a week for your employees
and patients through a secure platform with
advanced technology

TELE CONSULTATION

BENEFITS

- Over 6.000 physicians
- Patient's digital record
- Access via app or web
- Secure data transmission and storage
- Consultations made by vídeo or chat
- Integration with AI system
- Digital prescription
- Maximum wait time of 20 minutes

High tech monitors:

- Heart rate
- Blood oxygen level
- Respiratory rate
- Stress level

All through the smartphone camera.

Forms of acquisition

- Platform with Portal's clinical staff
- Whitelabel platform with your company's clinical staff

FOR

Your employees will have 24/7 access to physicians for teleconsultations. Your company will have access to a panel for monitoring and health control.

ADVANTAGES

- Improved life quality for employees
- Reduction in the absenteeism rate
- Increased productivity

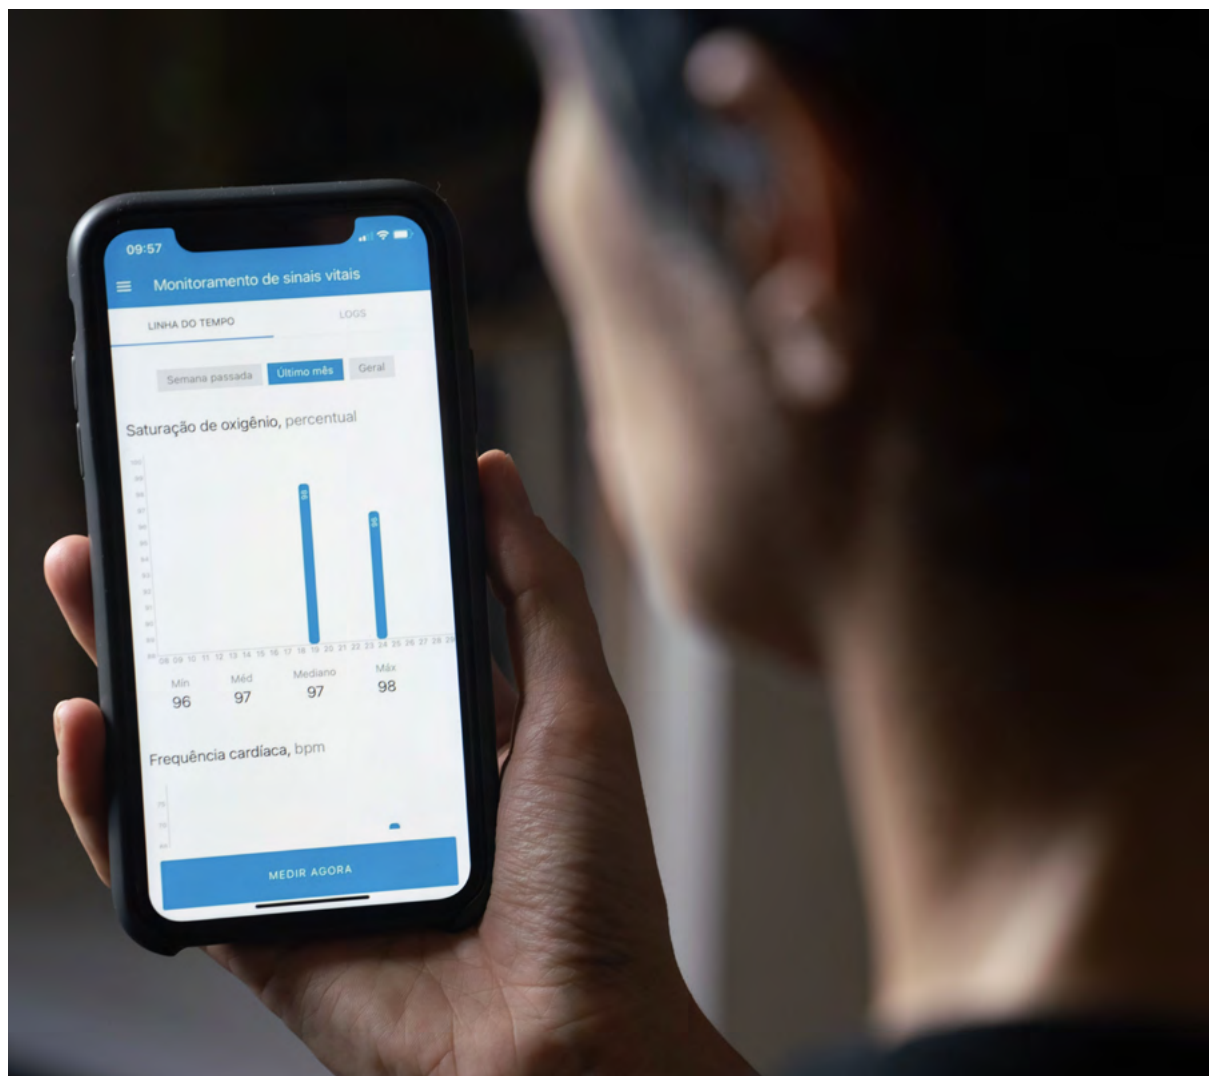

FOR

We make our system available for your doctors to perform remote care, prescribe medication and monitor patients.

ADVANTAGES

- Possibility to increase the number of specialties offered
- Excellent clinical staff available without geographical barriers
- Faster patients treatment

FOR

Reduce costs and unburden emergency rooms by making teleconsultation available for your beneficiaries.

ADVANTAGES

- Costs reduction
- Lower flow of people in the waiting room of clinics and hospitals
- Agile and immediate service

HOW IT WORKS

Advanced technology any time of day

Patient gets an email with password and login

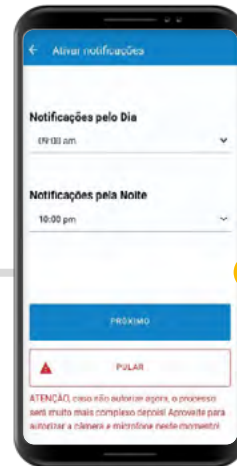

01

Registers on the website/app

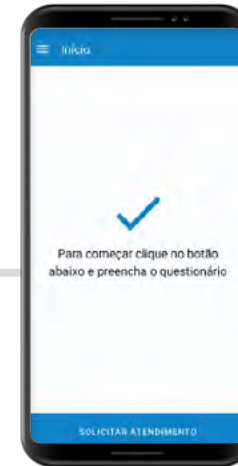

02

Chooses monitoring schedule

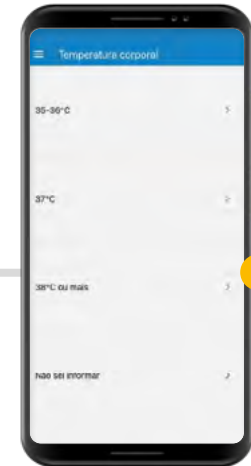

03

Asks for teleconsultation

04

Answers a form

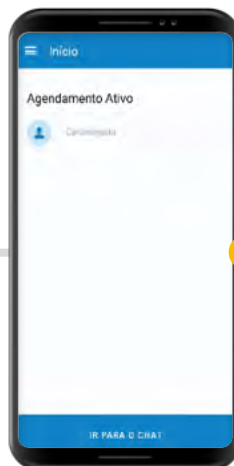

05

Selects queue or schedule

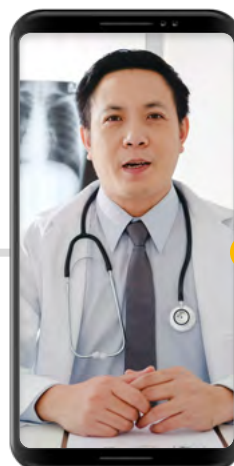

06

Receives a call

07

The teleconsultation is made

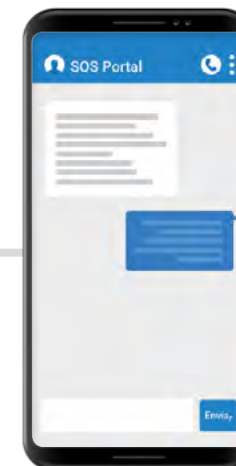

08

Vital signs are monitored

09

Doctor's prescription is sent to the patient
