

armbionics  
transcending disabilities

# About:

We develop complete rehabilitation solutions for upper-limb challenged people through cutting edge research in prosthetics and technology to assist them in their integration process into society. Our goal is to revolutionize the field by providing all-encapsulating solution modern, high quality and affordable products developed through our in-house R&D solutions.

---

*Our engineering solutions have a considerable influence in improving the users' lives through assisting and enabling multiple daily tasks that most of us take for granted.*
