Solutions

qatent

free, teaser	*899 $ per gen*	*free*
Editor **of claims**	**Generator** **of description** **2 pages -> 20/40 pages**	**Validator** **of description**

- Autocomplete
- Renumbering
- Antecedence check
- Words suggestion
- Extraction of definitions
- Legal analysis

- Saves > 10 hours drafting
- No errors
- Nothing is forgotten
- Fallbacks added
- **Paraphrase engine**
- Implements best practices

- Avoid costly irregularities
- Final checks (support scoring, consistency, labels check, etc)
- Visualization tools

Targets

CV cycle vente
CP consentement payer
Q qualité

3 x 150 cabinets
CV 2 mois
CP 0.5 - 2K€
Q low (preferred) to high

Law firms
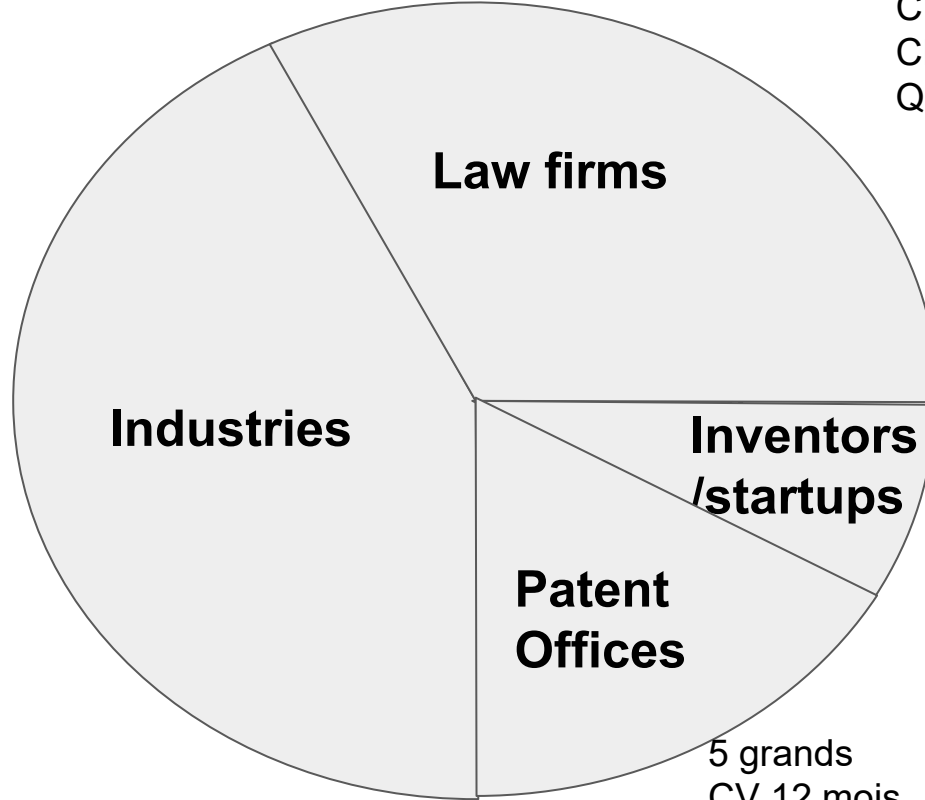

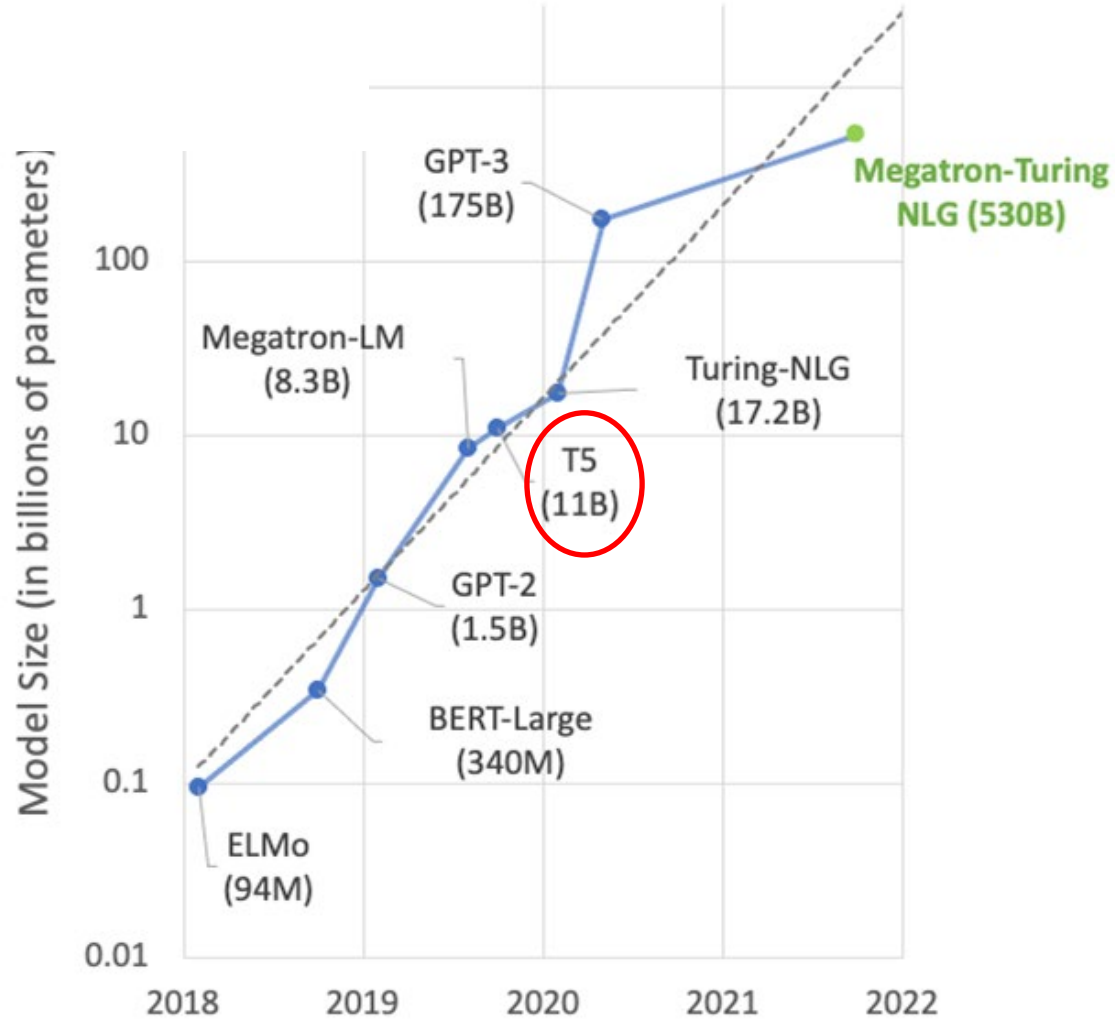

10 000 ? EP, US, CN, JP
CV 2 mois
CP 1K - 5K€
Q low to high
(preferred)

Industries

Inventors /startups

100K ?
CV 2 jours
CP 1000€
untapped
Q low cost

Patent Offices

5 grands
CV 12 mois
CP x100 000€

Technologies

Surfing huge waves in transformers-based pretrained language models

e.g. BERT and its variants (i.e., "transformers", Google T5), Word2vec, Sense2Vec, parsers

Founders

Professor NLP

Patent Attorney

Supervisory board

Kim Gerdes
Professor NLP
Responsible
Master AI University
Paris Saclay

François Veltz
Patent Attorney 15Y
former IBM, Roche, Law firms
More than 150 drafts in ML, explicable
AI, blockchain, cryptography etc

Benoît Sagot
Leader INRIA Lab
ALMAnaCH

Jean-Marc Deltorn
Former EPO Examiner,
Professor in Law IP & AI

Dominique Guellec
Former EPO Chief
Economist

Nicolas Schifano
Microsoft Cloud IP Policy

Strategic domain and tech !

Text generation is a game changer in IP

- qatent brings automation + machine insights

- embedded engine(s) in exponential growth (quality)

- embedded drafting methodology by default, evolutive with proprietary scripts -> platform for drafting

- deep impact on IP strategies, *e.g file and/or publish, rat race, clean domains… from low-cost patenting (quick and dirty) to slow and quality drafting, new types of players (generators, public domain operators, etc)*

- applicable to all technologies, *from quantum computing to clean tech*

Impact on IP strategies
