Expertise

Our expertise is at your service to guide your organization through a **fast and efficient digitalization**.

200

More than 200 institutional and private structures satisfied with our software.

70 000

Serving more than 70.000 users across several countries in Europe, Africa, and South America.

For coaching and training professionals.

More than a CRM, Wikiflow is an interactive software for the easy management and monitoring of all your coaching and training activities.

It also enables communication with the people involved and allows them to interact with each other.

It generates in real time your historical reports and management indicators, for a person, a center or a multi-centers network.
