Start building
with Square.

Grow your business by creating
omnichannel payment solutions.

Integrate Square with the tools your business uses.

Choose from our curated selection of pre-built partner apps, or leverage Square APIs to transfer transaction data into a CRM, an OMS, an ERP, or any enterprise business solution.

Add omnichannel payments with our industry-leading APIs.
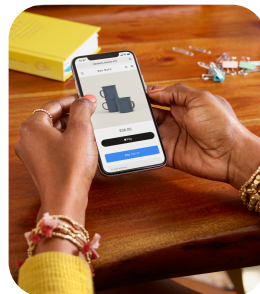

Online Payments

Use Square Web Payments SDK to process payments securely, to create custom payment forms, and to enhance the eCommerce experience.

In-App Payments

Use Square In-App Payments SDK to integrate seamlessly with mobile apps, and charge a fee for payments processed through your app.
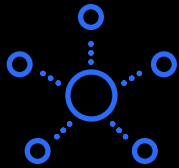

In-Person Payments

Use Square hardware to take in-person payments or to build a custom point of sale, a self-service kiosk, and more with Square Terminal API and Square Point of Sale API.

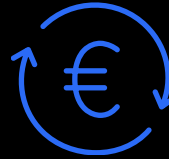

Use Square Gift Cards API to let customers buy, use, and manage gift cards.

Square Developer

# Find tools flexible enough for any business.

Omnichannel inventory and orders

Use Square Orders API to keep track of products for sale or services for hire, as well as information for categories, discounts, taxes, and more.

Subscription plans

Use Square Subscriptions API to create, update, and customize recurring payments, and pair it with Square Invoices API. Leverage Square Cards API to store, retrieve, and process cards on file.

Comprehensive reporting

Track payments and make informed decisions with a complete view of your business across all channels. Plus, get fund transfers as soon as the next working day.

Best-in-class security

Our dedicated fraud detection teams and machine learning tools monitor your account for suspicious activity and ensure PCI compliance. Plus, our dispute management team deals with the bank for you — with no additional fees.
