# elqano
WHEN KNOWLEDGE FINDS PEOPLE

elqano connects employees who have questions with those who have answers.

Amplify the collective intelligence of your company by developing an organic capitalization of knowledge within your teams.

We are convinced that every company has in it what is most valuable: the knowledge, know-how and expertise of its employees.
This is why we have designed a simple solution that combines the richness created by human interactions with the power of artificial intelligence.
All knowing, all learning.

#1 I ask my question to elqano in my MS Teams

2.30 hours
saved per week and per user searching for information and responding to requests

#2 it **analyzes** and understands my question thanks to NLP technologies

elqano is an artificial intelligence (AI) solution very easy to use, embedded into a chatbot that is 100% integrated with existing corporate collaboration tools.

#3 it crawls the documentary databases and **identifies** experts

+60%
adoption rate at 3 months

#4 it **transmits** my question and the selected documents to the identified experts

80%
of the questions asked are answered

#5 the knowers send me their **answers**

key benefits
for a learning and smarter company
