PITCHBOY is the 1st conversation simulator to develop your employees skills and complete your current training tools!

We combine the most innovative artificial intelligence and voice recognition technologies to recreate total immersion in a real work environment.

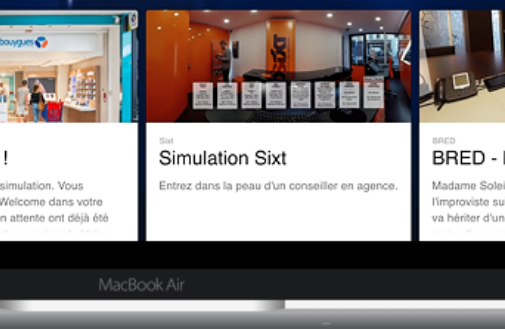

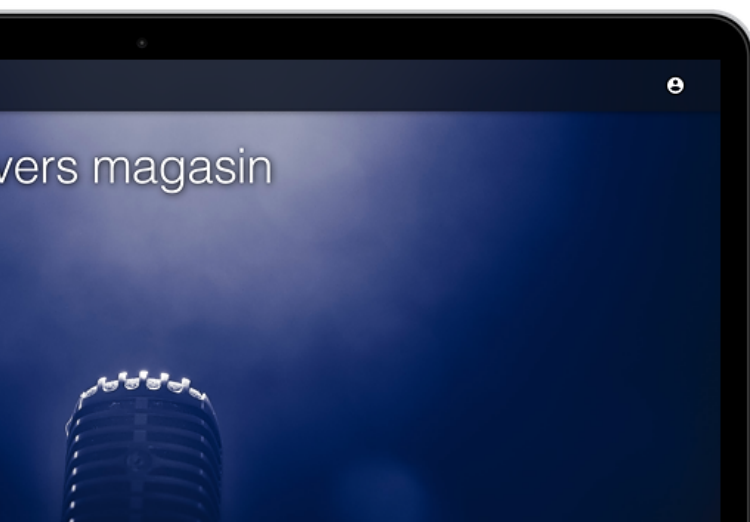

Your employees freely train themselves to develop the right reflexes. They are trained in an efficient, playful and caring way.

THANKS TO OUR LANGUAGE
EXPERTISE, PUT YOUR
CANDIDATES AND EMPLOYEES IN
REAL LIFE SITUATION.

ABOUT THE PLATFORM

The conversational learning platform is first and foremost a library for your immersive simulations, in audio, 2D video or 360° video.

The user is immersed in a realistic working environment and has a natural conversation with a video or voice recorded interlocutor.

The platform is also a managerial support tool. Statistical data and replays make it possible to identify achievements and areas for improvement, by learner or group of learners.

**ACCESS TO YOUR
CUSTOMIZED CONTENT AND
TO CONTENT ON-SHELF.**

ABOUT THE AUTHORING TOOL

Get started with the conversational intelligence technology developed by Pitchboy to freely create and integrate conversation simulations into your training paths.

Simply use voice recognition in training, no coding skills required.

Script writing is made easier to highlight your know-how and your teaching expertise.

A UNIQUE OPPORTUNITY
TO EASILY CREATE YOUR
CONTENT, YOURSELF.
