about ambeRoad:

We are an Aachen-based company that focuses on searching information in unstructured file formats with the help of artificial intelligence. We help our customers such as RAG, Siemens Energy and others to make enterprise search as intuitive as web search providers do on the internet. In this way, we save our customers 1h/employee/month and thus several (hundred) thousand euros.

Our differentiation is a multimedia search engine

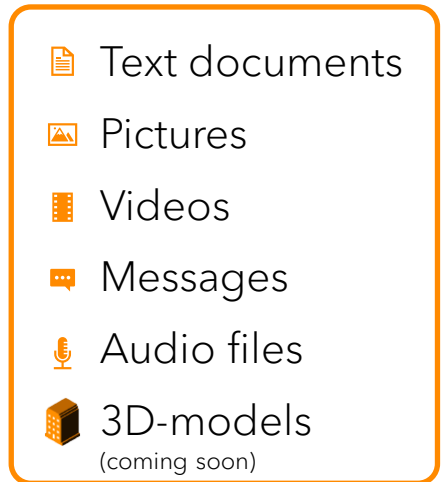

amberSearch

Data sources

amberSearch meets the increasing diversity of information by accommodating a wide variety of file formats. With a familiar and intuitive user interface and extremely easy integration, amberSearch is very well received by both users and administrators.

Data formats

What our users say:

Siemens Energy
