HAKTIV

Your Digital Guardians

Agenda

ABOUT US

HAKTIV is the first bug bounty and crowd-sourced penetration test platform in the MEA region. We provide our services through vetted security researchers picked out by our partners who vet them based on their skills, availability, experience, and work ethic, before assigning them a project.

A bug bounty program is a deal or reward offered for private security individuals who manage to find security bugs and vulnerabilities in web and mobile applications of our customers, effectively crowdsourcing security.

OUR VISION

Helping organizations discover their big vulnerabilities, data breaches & security defects before being revealed by malicious parties; impacting the whole organization's reputation and exposing them to legal & criminal issues

OUR MISSION

Releasing the first Crowdsourced Security Testing & Bug Bounty digital platform in Egypt and expanding it to the whole MEA to:

- Introduce a new digital community of professional Ethical Hackers

- Protect customers' digital experiences & secure their privacy

- Automating the whole communication between Customer & Security Researcher in terms of reports delivery, reward process, and bug fixing

- Introduce the biggest pool of cyber security resources in the MEA region

WHY SECURITY TESTING?

Protection From Existential Threat

Protection From Data Breaches

Reduce Cyber Risk To Acceptable Levels

Safeguard The Organization's Image

TYPES OF SECURITY TESTS

SECURITY TESTS COME IN THREE SIMPLE CATEGORIES:

Automated SCANNING

A software-led activity to assess web applications and infrastructure targets for known vulnerabilities and misconfigurations using the software.

TRADITIONAL PENETRATION TESTING

A simulated cyber attack against your computer system where a cyber-security expert checks for exploitable vulnerabilities.

BUG BOUNTY

In which security researchers are allowed to attack the online assets in their own creative ways, incentivized by bounties.

Combine key elements of security testing into one solution

HAKTIV Solution

- Automated Scanning
- Crowdsourced Pentest
- Bug Bounty
- PCI-DSS Readiness
- Real-time Insights
- Compliance Reports

HAKTIV Security Crowd

- 73+ Protected Business
- Background Checked
- 3000+ Security Bugs
- Wide Range of Skills

RATE CARDS:

$300/month

Bug Bounty
(Continuous
Penetration Testing)

$200/day
