

The asset digital logbook

**Asset documentation DOES exist
but is not available on the field
at critical instant !**

Consequences:

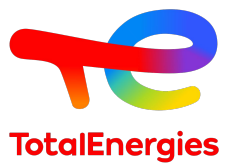

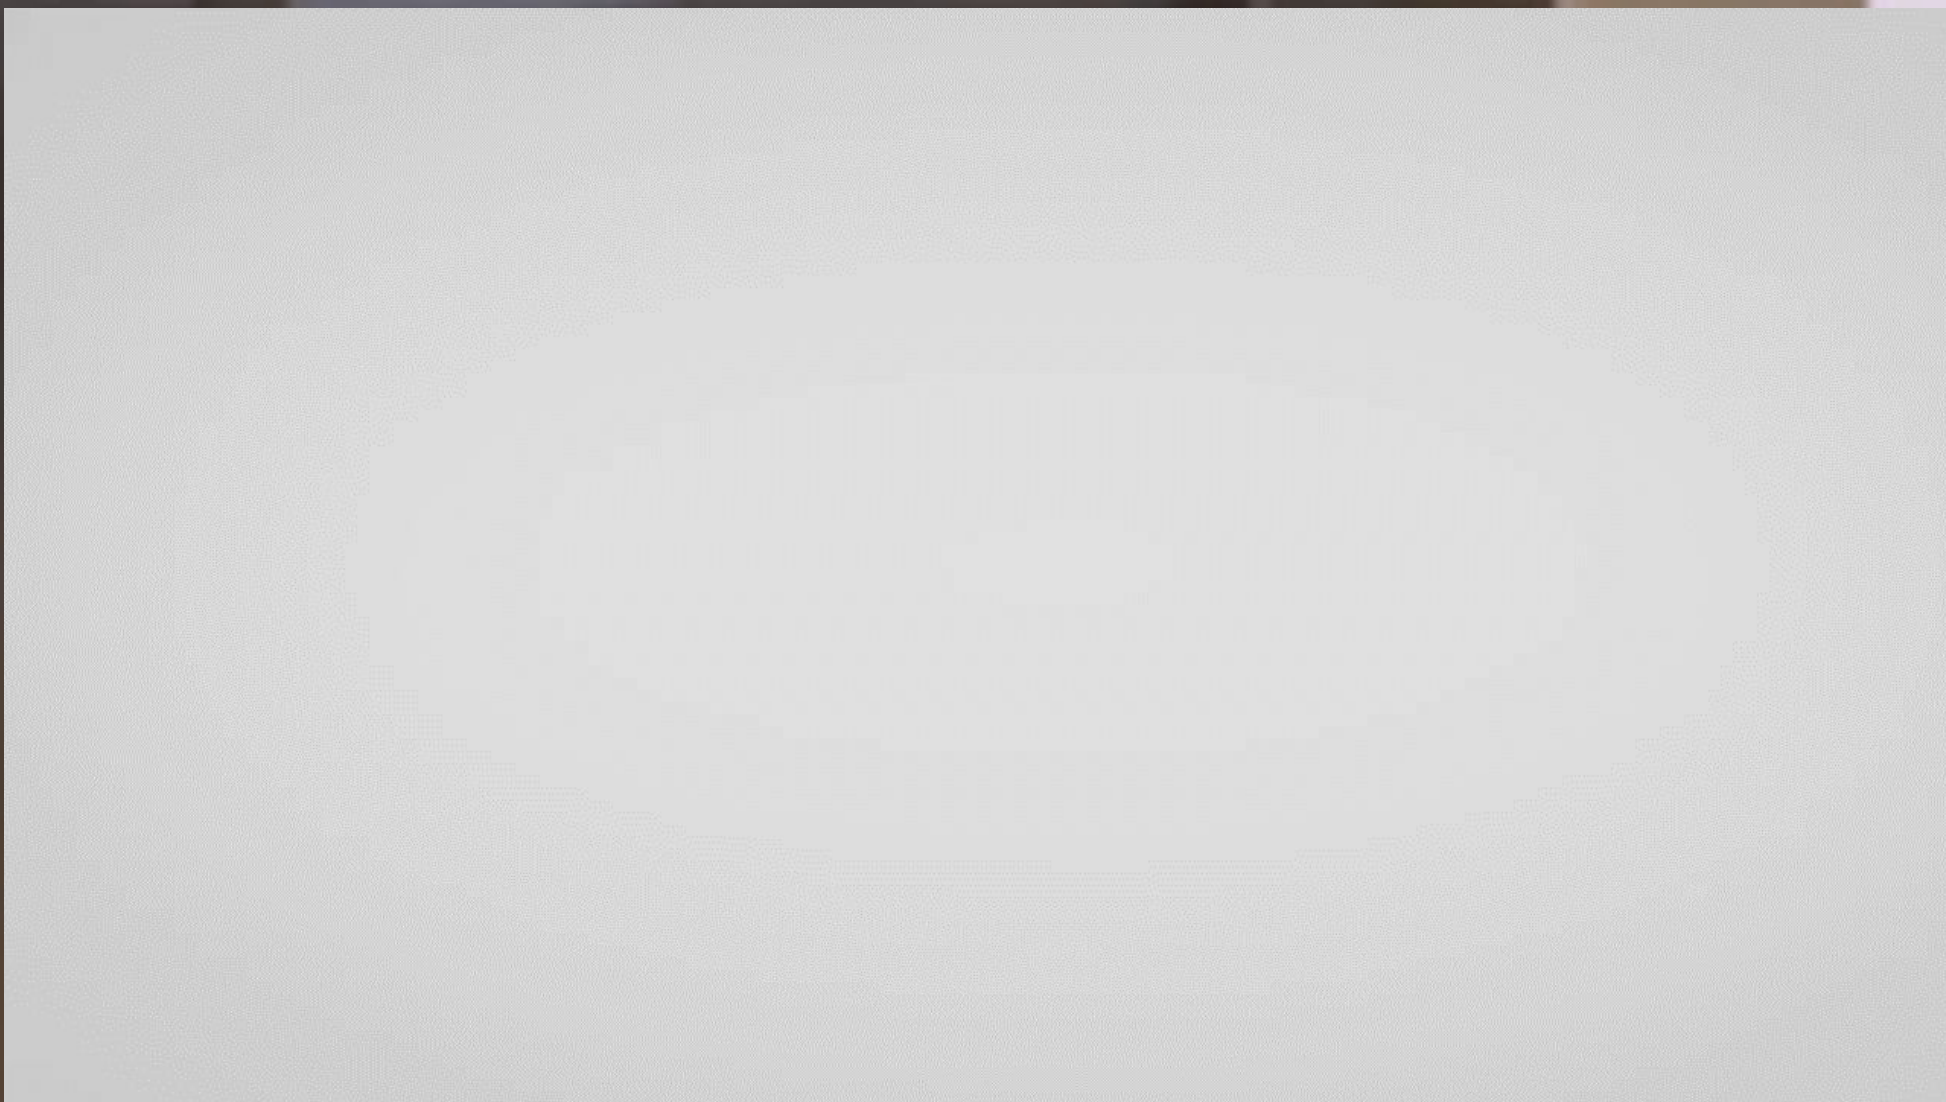

- Loss of efficiency
- Safety issues
- Assets costs

UBLEAM solution
guarantees any field
operation in less than
1 minute with:

- Asset Identification at 100 % (uniqueness and geolocation)
- Availability of up-to-date documentation at 100 %
- Immediate reporting in mobility including database update
- Visualisation of assets pool in real time
- Sharing best practices

UBLEAM offers a mobile application to connect with asset data on the field

1 unique id for your asset:

- Augmented Reality : Blead code (UBLEAM patent)
- Standards : barcodes, QR code, datamatrix, NFC
- Unique number: OCR, manual entry

1 cloud plateforme Cloud to:

- Management global asset data and documentation
- Create mobile interfaces, scenario per profile and field
- Supervise data and digitalized processes

Cloud Azure / access by web API
web and mobile API

1 mobile application Android/iOS:

- Scan with a dedicated interface per profile
- Access to doc & videos
- Report in mobile forms in online/offline modes (Android)
- Digital logbook (history, dedicated doc)
- Update of asset database

Collaborative solution for any asset user

Interoperable solution with customer IT system (CMMS/ERP) to enrich with updated and field data

In video

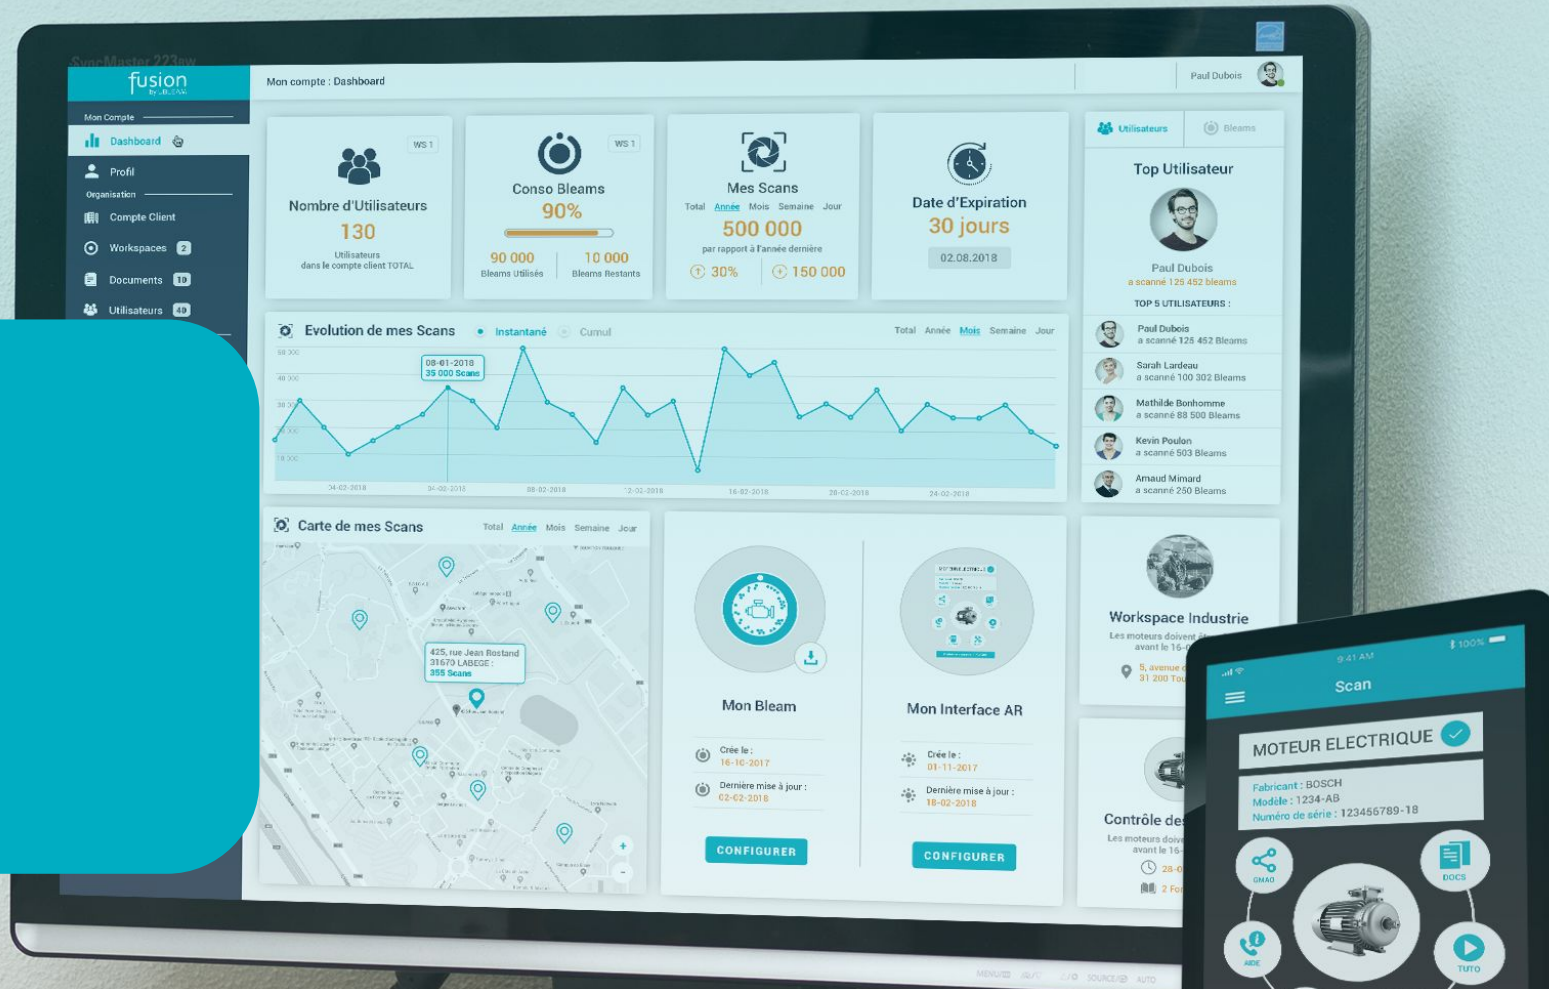

Advantage : Intuitive !

Customised experience
Compatible with all tags
Dynamic in time

Avantage : adaptative !

1 scan service
Easy to cutomise
No code

A photograph of two men in a factory or industrial setting. The man on the left is younger, with dark hair, wearing a blue denim shirt and blue overalls. The man on the right is older, with grey hair, wearing a maroon t-shirt and blue overalls. They are both looking intently at a large industrial control panel with multiple screens and buttons. The background shows various industrial components and machinery.

Avantage : collaborative !

Objectif: améliorer le support client, communiquer la conformité du produit

Ubleam benefits

Connected & secured intervention on site to ensure preventive maintenance

- Thanks to the unique identification (Bleam) of every asset and a simplified user experience through the augmented reality interface

Asset tracking & management in mobility for Industrial operators

- Thanks to the data captured when scanning an asset (who, when, where) and interacting via digitized forms

Streamlined Inventory management to optimize asset pool

- Thanks to the asset data sheet and information accessible in mobility for operators to limit safety stocks

Real-time & local customer service proposed on each asset

- Thanks to the up-to-date documentation (text, photo, video...) proposed when interacting with every and each asset on site
