

The complete platform for immersive and collaborative learning

The first all-in-one immersive saas and LMS
software to start and design your own learning
Metavers

Virtual Reality projects are perceived by HR teams as :

- **Reserved for specialists**

Impossible autonomy for a non-initiated person and too much time to spend

- **Unsuitable**

Not contextualized in relation to real problems
(location constraints, company culture, etc.)

- **Slow to develop**

Projects lasting an average of months6 with many round trips

- **Expensive**

Expensive in computer development and 3D computer graphics
Expensive upgrades

- **Difficult to implement and to scale**

Difficult to replicate and adapt easily...Few user companies feel they can achieve optimal economies of scale

**WiXar enables the design of incredibly fun and
impactful immersive and collaborative
experiences for candidates and employees
as easily as creating a ppt**

**WiXar is first of all a team of experts specialized in virtual reality
since 2016, gathered to offer a complete solution:
saas software + custom support**

Benjamin Atlani
CEO Co-founder
Serial Entrepreneur
Digital Designer &
Trainer

A team dedicated to supporting companies and organizations
to make a successful entry into immersive technologies

What for?

Immerse people
in your
REALITY

Enhance your teams, your
premises and your
environment more
effectively.

Get
them
ONBOARD

Boost the onboarding of
your new employees, share
your values and the meaning
of their presence.

Enhance
their
SOFT SKILLS

Help your employees to
reveal who they really are,
bring out their true talents.

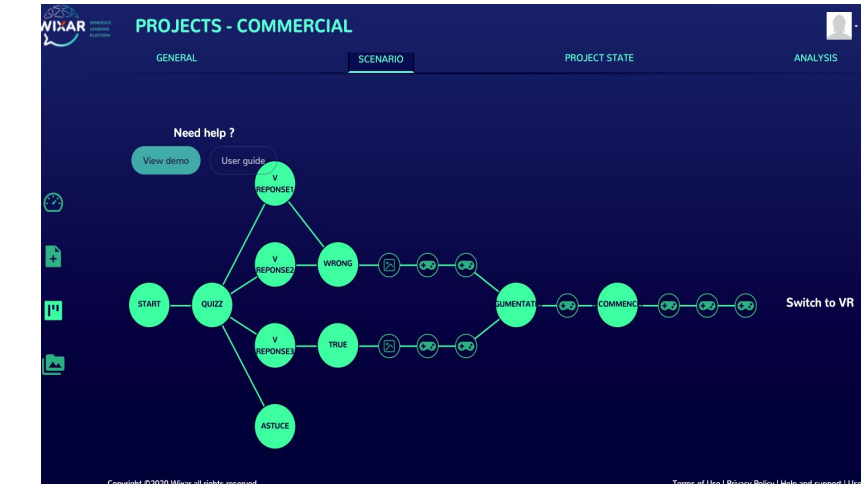

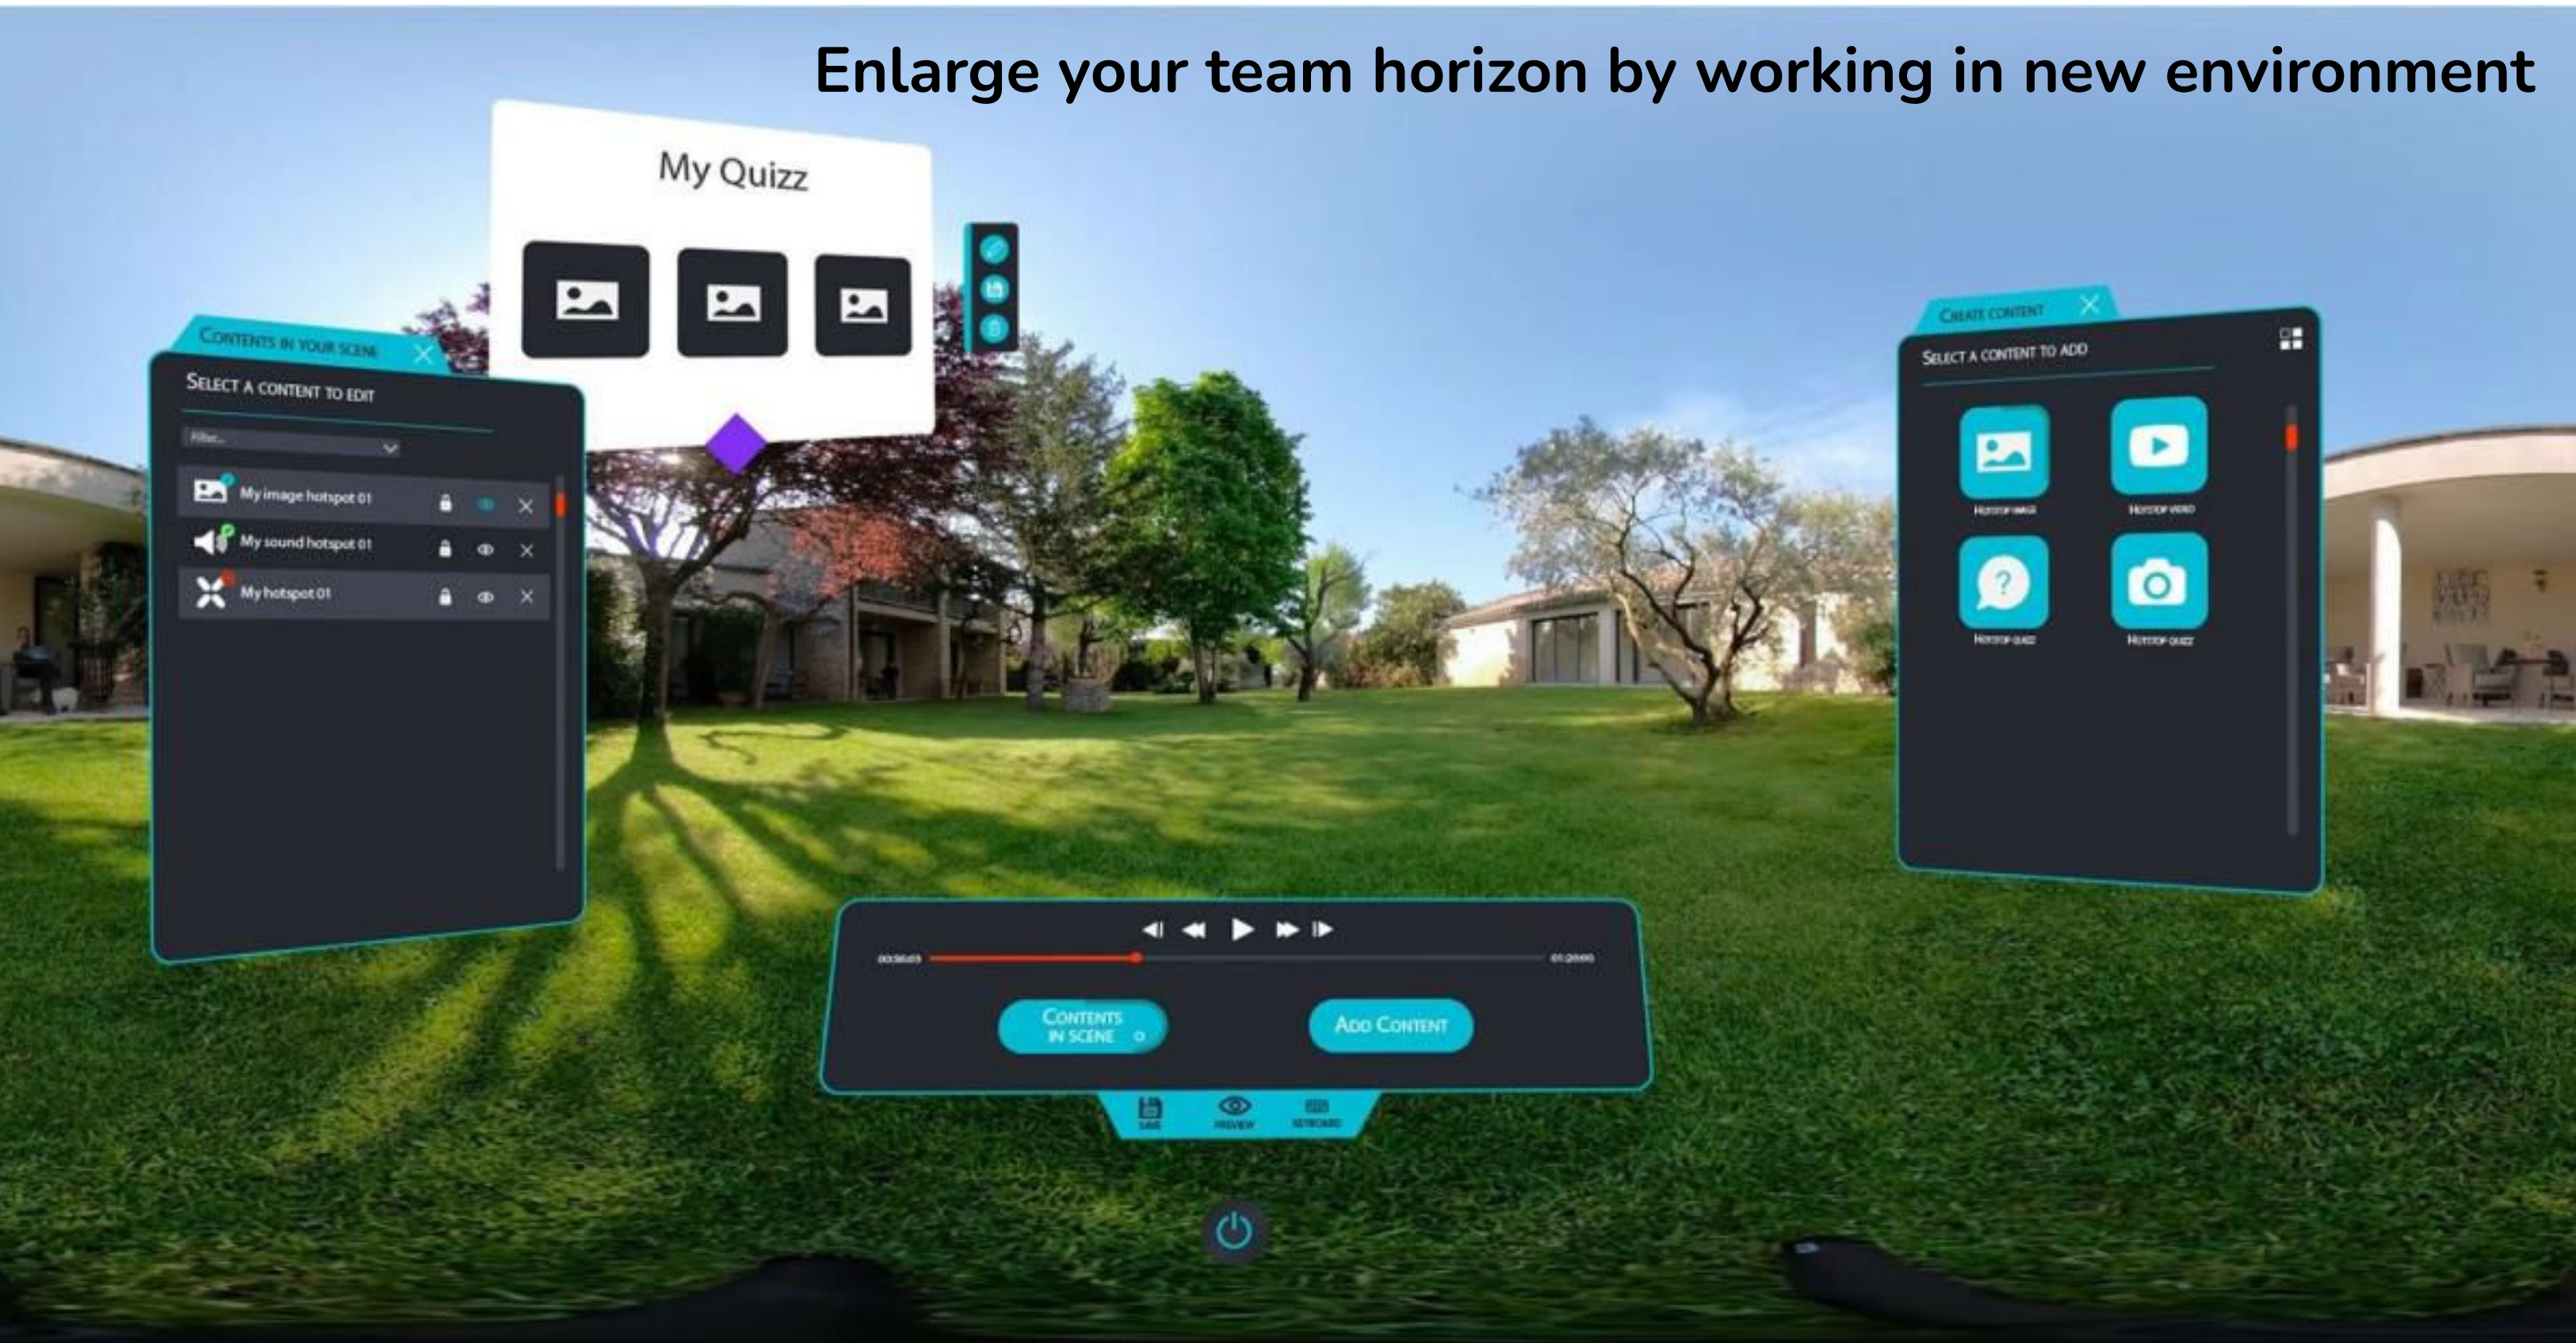

Bring
them
HARD SKILLS

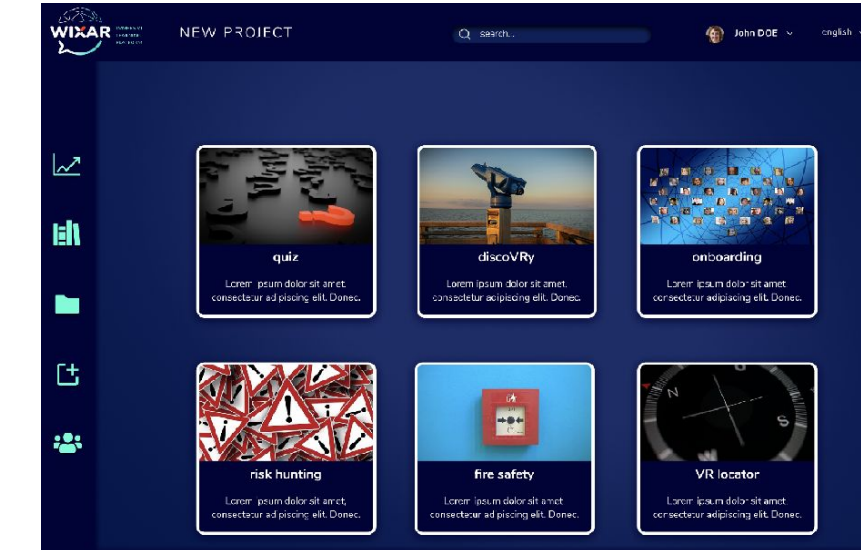

Pass on your know-how
more effectively, accelerate
the acquisition of your
expertise.

—— WiXar, the time-saving, no-code saas platform for managing all your immersive experiences in your own corporate metaverse

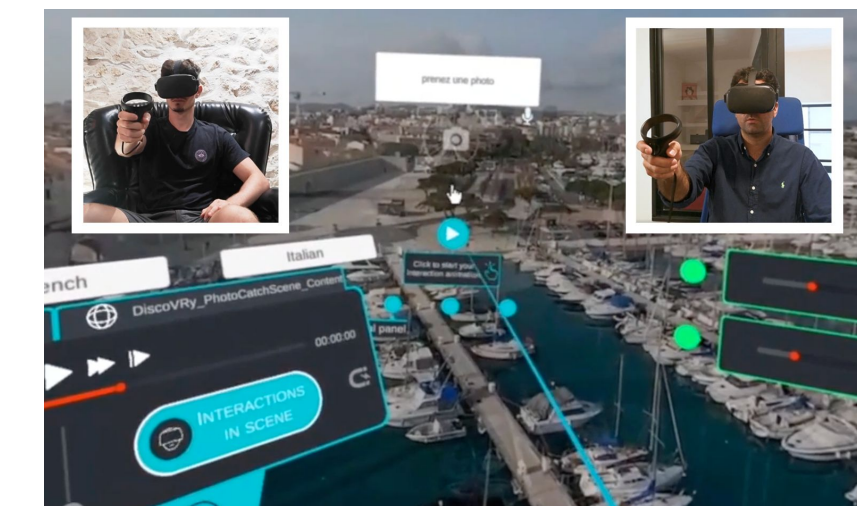

Spatialized design studio: 360° UX design allows for faster testing and correction

Create and manage projects in minutes on the platform

Automated
scripting tool in the
form of
customizable
templates

Enables real-time collaboration (design and delivery of training) with multiple remote participants anywhere in the world

Advanced statistical
feedback (individualized
learning track). Easy
export to other tools

WiXar, a factory for generating white label HR applications.

Experiences that push user engagement to the max and allow for real-time evaluation

Exceptional image quality
(5K to 8K 360° videos and 3D Object)

The learner learns the tool in a few seconds

Works Offline & Online

Works on PC & Mobile headsets + Web VR
