

**E-MATCH**  
**ENERGY SOLUTIONS HUB**

# HUB E-MATCH

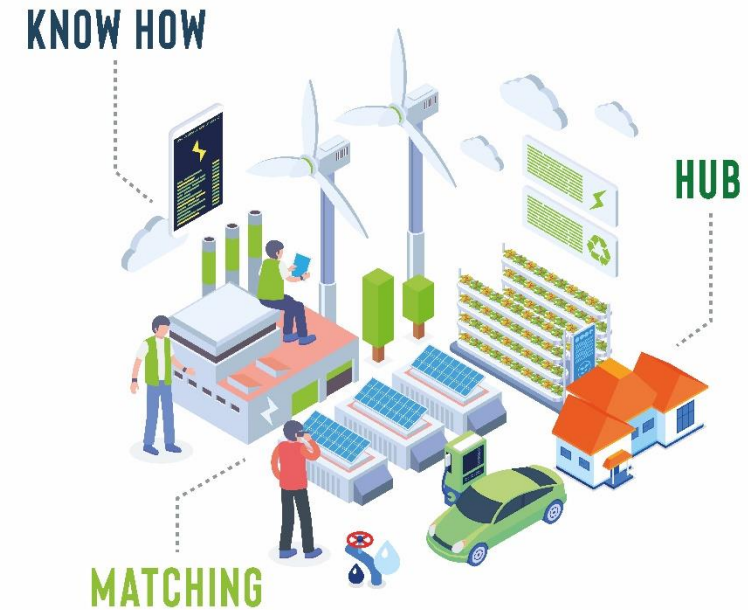

E-MATCH IS A B2B2C PLATFORM FOR CLOUD AND DOCUMENTAL CHECK, TO ACCELERATE THE ENERGY TRANSITION.

What would you do to protect our planet?

We have found a solution to energies problems.

E-MOD proposes a document sharing platform in favor of the optimization of document procedures for obtaining authorizations for the construction of renewable energy plants.

The goal is the response to the energy urgency, as well as the reduction of emissions and the environmental impact resulting from the use of current sources of supply. Also in support of circular economy and sustainable mobility.

# BENEFITS

The advantages for operators are:

- specific know-how for each sector,
- agility of document management,
- access to databases and digital consultation tools, work flow of projects in the cloud, guaranteed by the highest security standards currently available.

The benefits for users are:

- Specific know-how of the actors
  - Tailor made projects
- Reserved area that collects and stores data and documents relating to its projects and practices
- Offers and information continuously updated on the news regarding incentives
  - Time reduction
- Availability of the platform everywhere, from every device

# VISION

Alone we go fast, but together we can go far.  
Everyone can be useful, from the small to the big player in the energy ecosystem.

We want to create independent energy oases, everywhere, following the example of nature and its renewable sources.

The future is here, live it now.
