# The 1st video conference platform to analyze emotions in order to automate and optimize user research by A.I.

Accompanied by:

## Maximilien Joannides

### President – Co-Fondateur

- Graduated from the Master of Design from the Sorbonne.
- Worked at Orange and AppartCity on Data Driven and Design Thinking processes.

## Felipe Restrepo

### CEO – Co-Fondateur

- Graduated from the Master of Design from the Sorbonne.
- Founded his own development company for 5 years in Colombia.
- Currently Lead Designer at Scalable Path in California for 4 years.

We build our business digitally, our developers are located in **Chile, Romania and California**. We also work with a **marketing agency in Lille** and have **advisers in the USA**.

# The sector

**User experience** is a fundamental factor in **web development**.

A well-designed **user journey** can increase **the return on investment** for any business.

**Our goal** as user designers is to **improve the experience** and ensure that the user journey is **good**.

## The Sector

### Why do user tests?

#### **Learn from its users**

Behaviors and preferences, based on emotion

#### **Discover problems**

During Design / Development

#### **Find solutions**

To improve Design / Development /  
Marketing

# The challenge

Interviews are mostly done physically and note taking is done by hand, making the process time consuming and expensive.

## A standard user test can:

- Cost around **\$7,000 to \$13,000** for 5 participants.
- Take up to **1 month to show results** and problems to resolve.
- Need **3 or more people** to be driven.
- Tests carried out at the **end of the project** due to high costs.

# The solution

Our goal is to provide a SaaS platform for UX Designers to perform user tests powered by artificial intelligence.

## Thanks to our video conferencing service, you can:

- Do **Qualitative and Quantitative** research.
- Analyze a lot of data **quickly**.
- **Only one person** is required to conduct the interview.
- Test at **Affordable prices**.

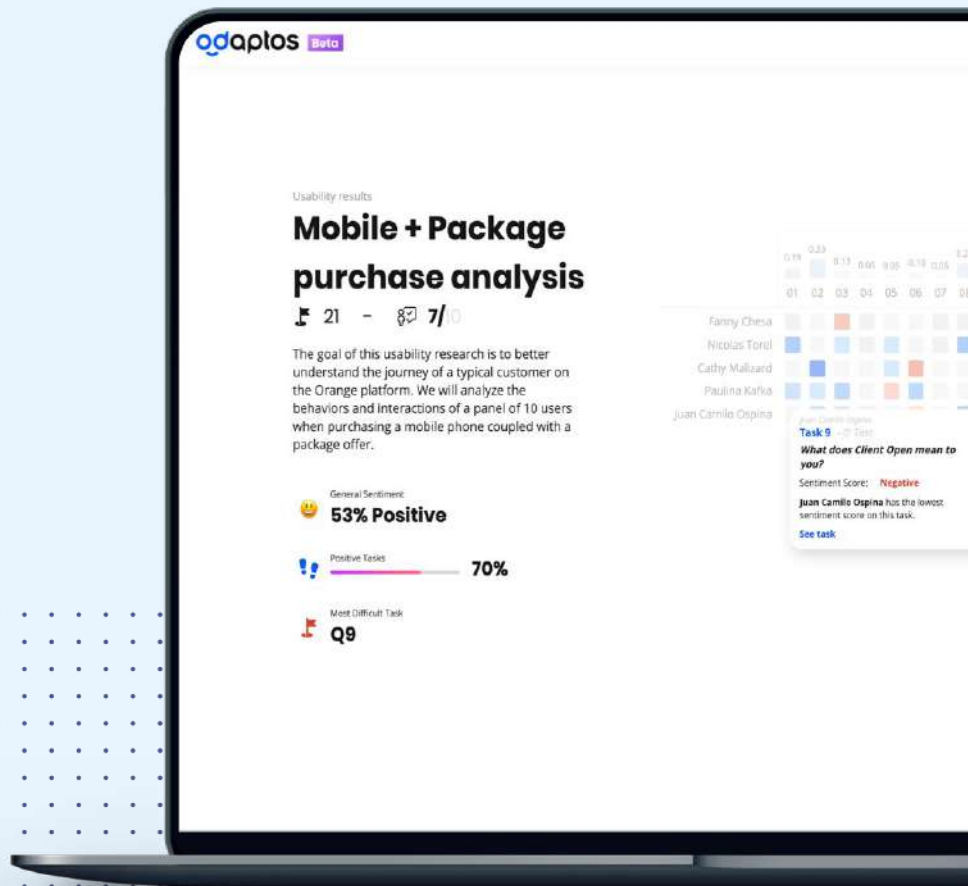

## Go faster with Odaptos

A tool created for UX designers and product owners.

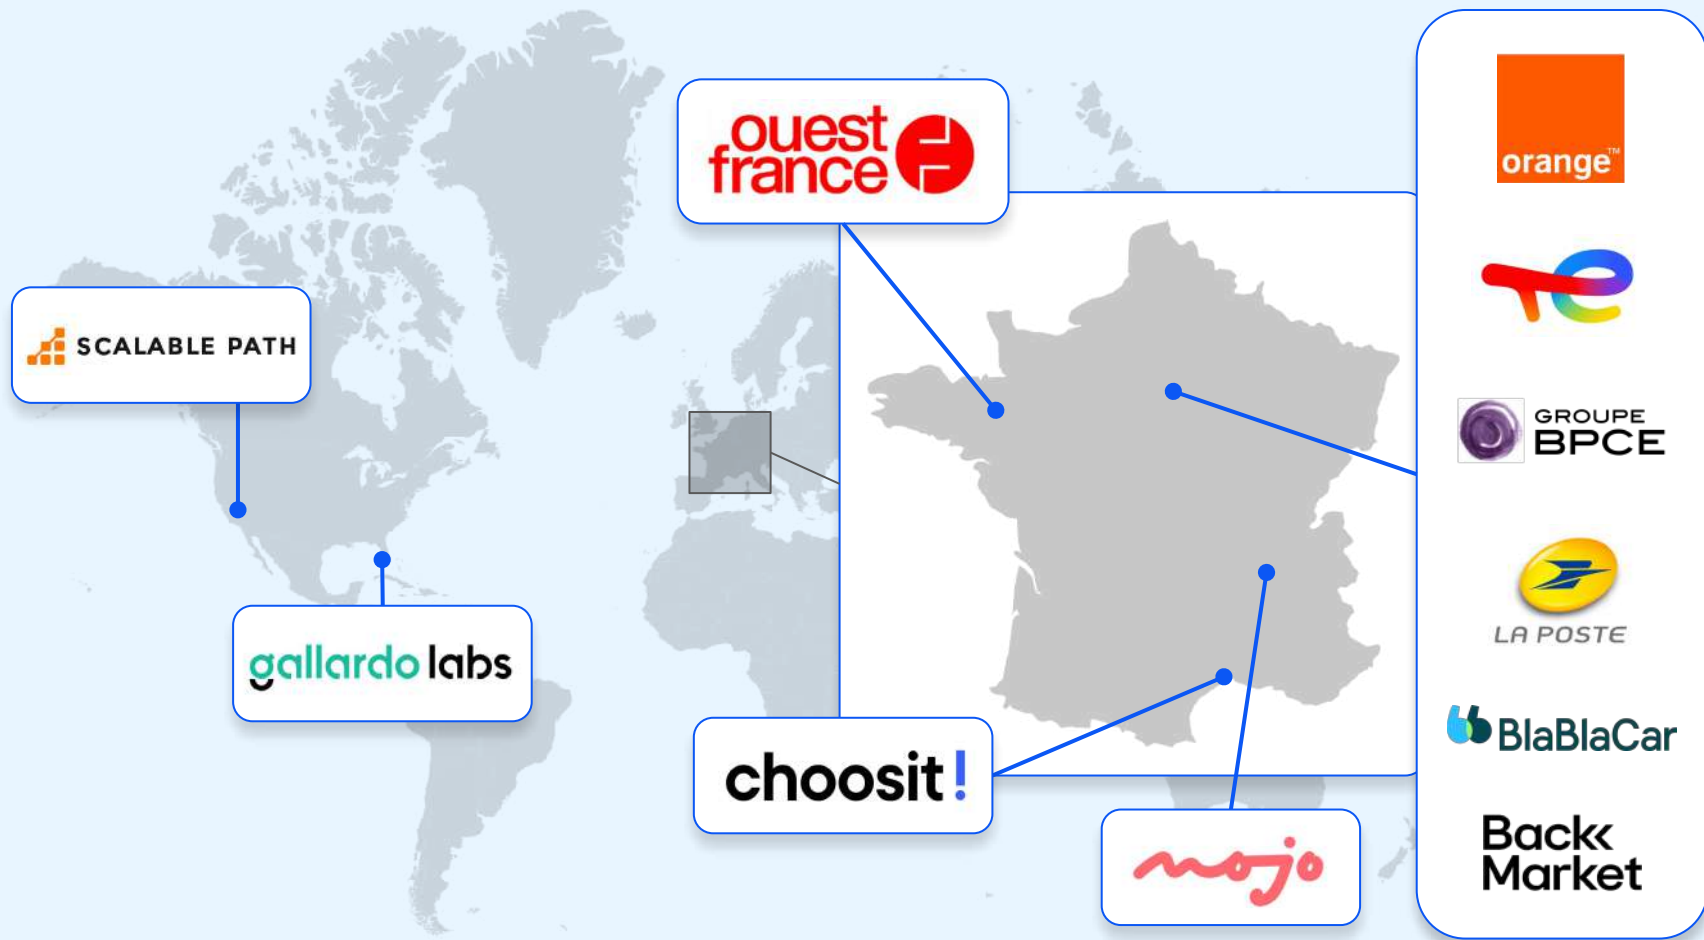

### The tool allows you to:

- Retrieve user feelings through **natural language processing**
- Recover the user's emotions through **facial recognition**
- Analyze the **user's journey**
- **Reduce the time** spent on analyzing information
