

FOSSETIC ENGINEERING

Innovate to improve sanitation

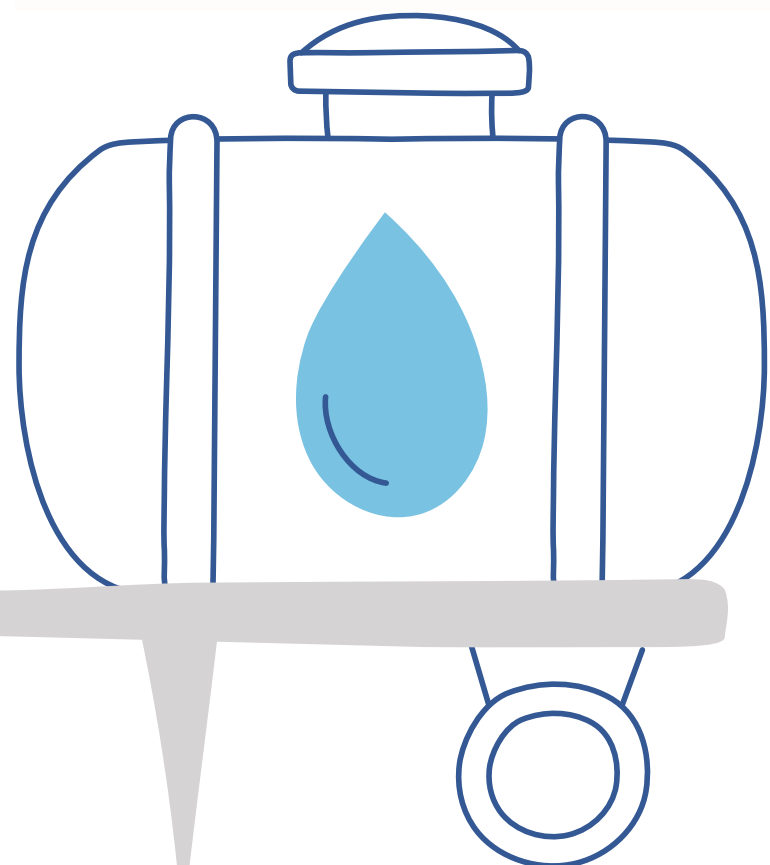

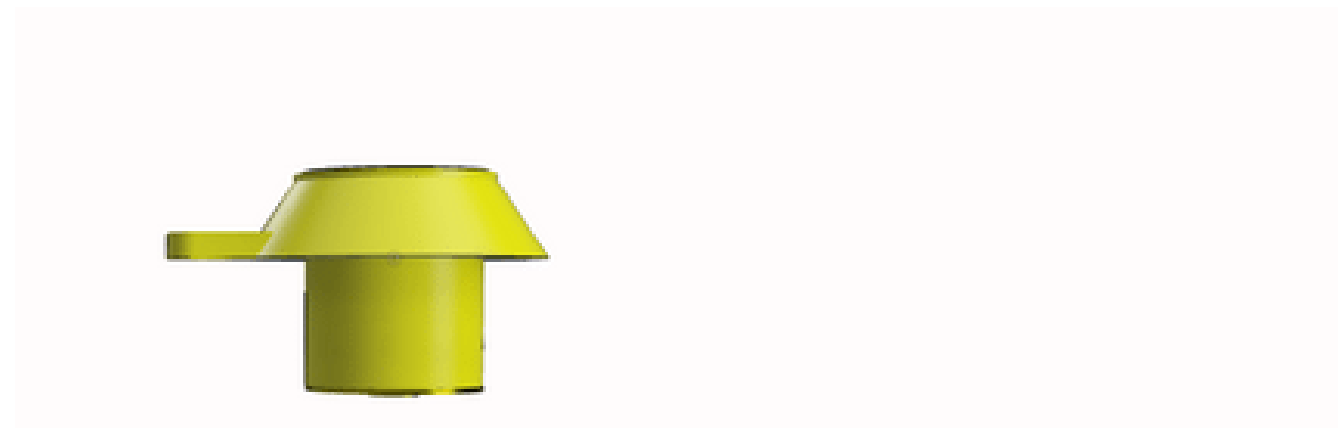

CEO M. Mourtalla Mbeguere

FOSSETIC

Innovate to improve sanitation

Problems

A lack of information on the filling level of the pits

Inability to plan the emptying of the septic tank

Difficulties in finding an emptying service provider in time,

Consequences

faecal sludge overflow

manual emptying

**Valve water from a septic tank
overflowing in the rising zone**

Existing solutions

Opening the manhole to check the level

Nasty odors

Proliferation of earthworms

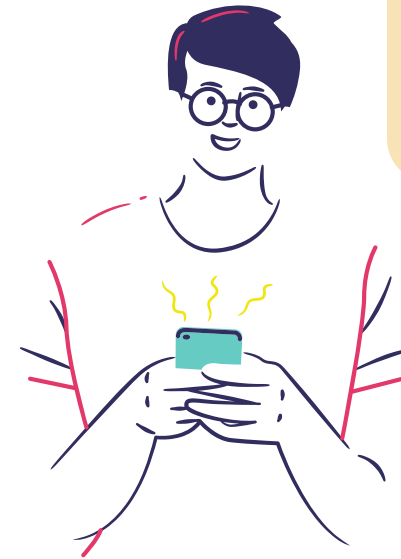

Evacuation system blockage

FOSSETIC SOLUTION

APP to control level for septic tank

emptying of septic tanks Service

septic tank connected to lora

deployment

LORA

~ 1-10 km

LORA Gateway

Secured IP
network

NEXT STEP in 6 month

Our next step is the implementation of the system in 2,000 households with emptying frequencies of 3 to 4 times per 6 months or once per month.

within 5 years we want to acquire more than 15,000 homes
