C.AI Adoption Bot

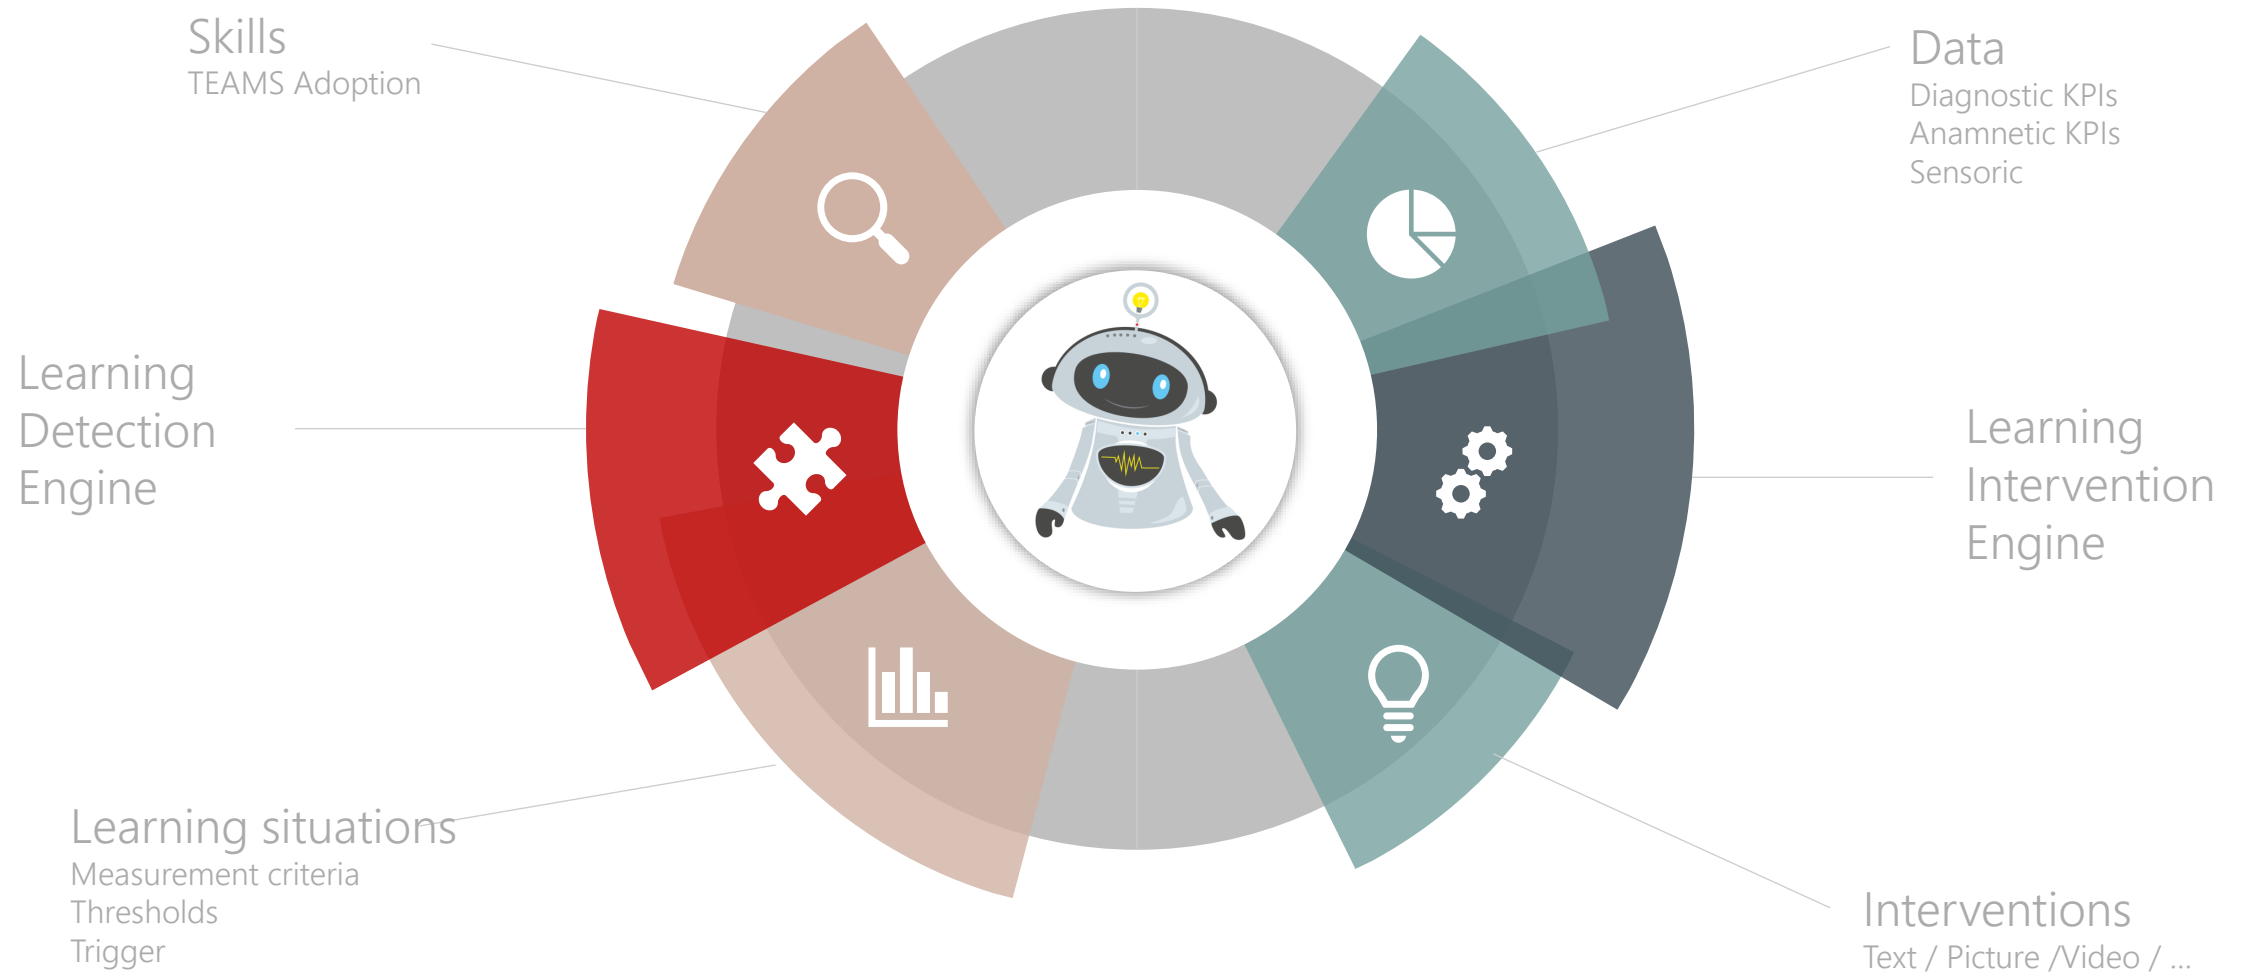

contexxt.ai - June 2022

I'm Cai!

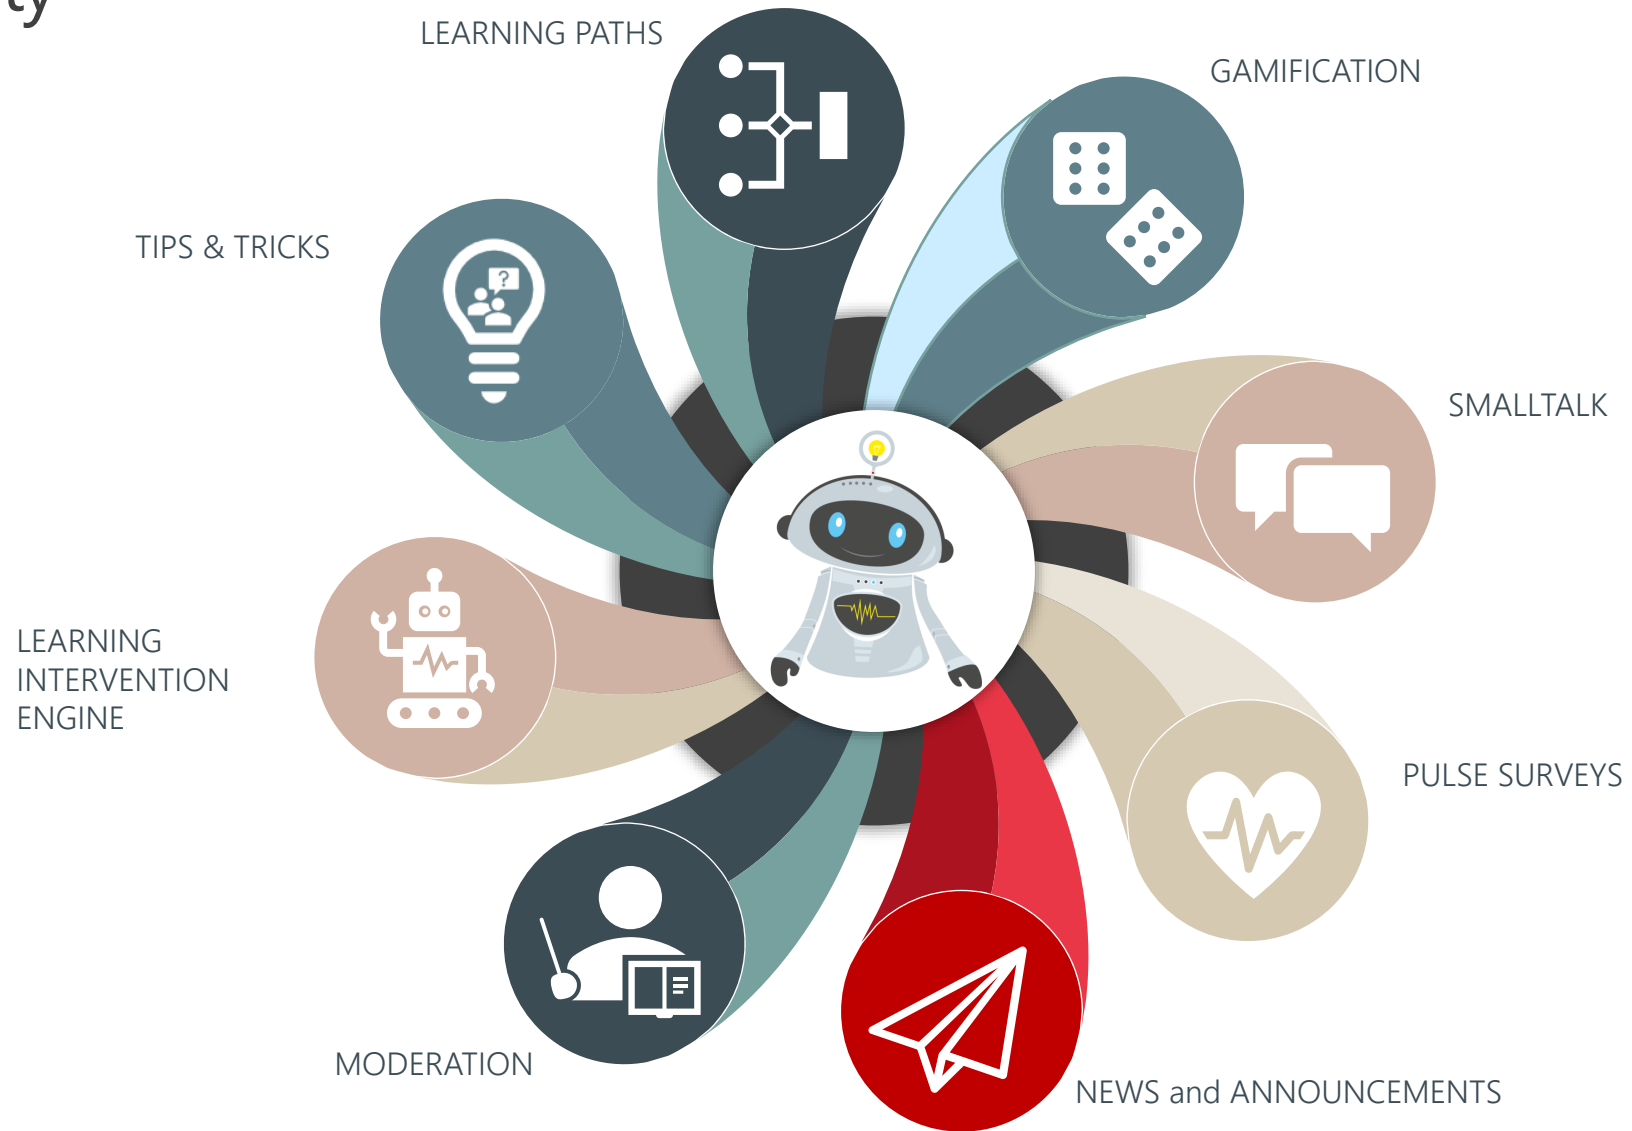

I help you as a personal assistant in the right situation with the important topics in digital collaboration, e.B. at Microsoft Teams.

I am not only a passive coach, but also actively address the topics, and in a frequency that is beneficial for you. The frequency and scope of the dialogues are taken into account through an AI-based approach. In addition, I also ask for influencing factors such as the personal perception of digital overload and stress and take into account your impulses for the future.
