

Vision

Transition from Big Data to Smart Data to accelerate AI developments by getting the most value out of your data and deliver on the promise of ground-breaking innovations.

Product benefits

Boost productivity: accessing the right data 10X faster.

Scale activities and save costs on the 99% useless data by extracting relevant data.

Unleash the potential of your AI by tackling the edge cases to reach full autonomy.

Technology

SDK

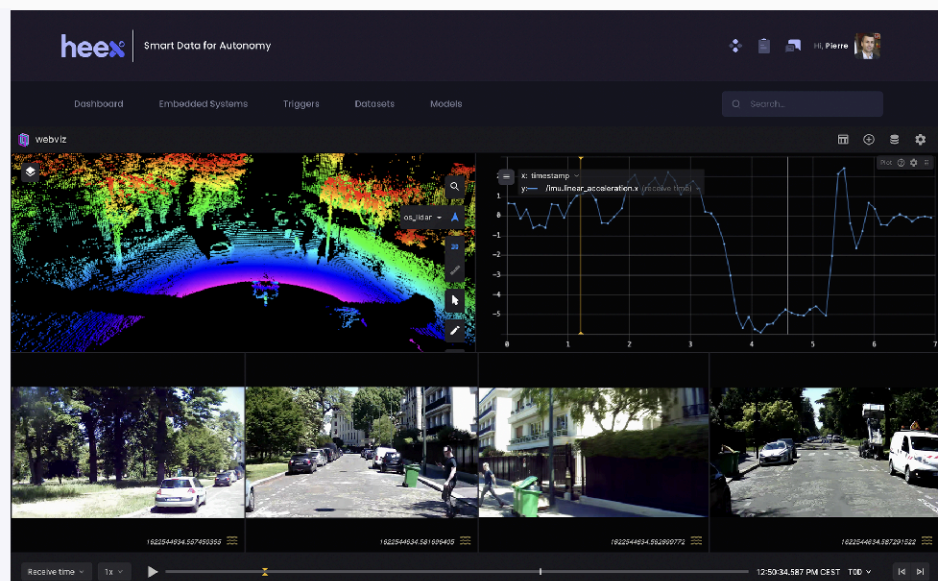

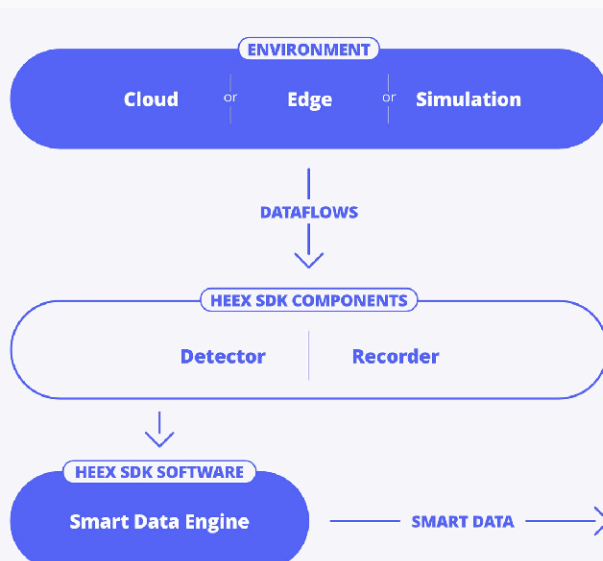

API

WEB PLATFORM

Deployed at the edge or on the cloud to filter and extract Smart Data with a trigger algorithm

Dedicated micro-services backend per client, automating Smart Data triage and distribution

Web services to access, visualize, manage, and collaborate on Smart Data
