ReDeFinining the future of smart mobility

#reDeFineMobility

M. Gürcan Karakaş
CEO

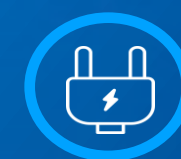

24.03.2022

Rules of the game are changing: Automotive → Mobility Ecosystem

Megatrends / Triggering smart living spaces

Technology

Electric

Connected (IoT)

Autonomous

Social

Smart Home / City
Living Spaces

Shared Economy

Environmentally
Conscious

Regulatory

Protectionism, Incentives

Environmental and Emission Standards

Potential for “smarter” mobility through holistic approach

“Island” ecosystems
Fragmented services

“smarter ecosystem with smart contracts”

Disconnected user experience
Lack of security transparency

We differ from conventional OEMs with our holistic & user-centric approach

Old League

- ◆ Product and customer centric vehicle approach: PDP
- ◆ Internet in the vehicle
- ◆ Mechanics / Mechatronics / Electronics
- ◆ Horsepower
- ◆ Physical lock / Immobilizer
- ◆ Platform conversion
- ◆ CO2 reduction
- ◆ Supplier approach
- ◆ Licensed or owned car brand
- ◆ Local content

#NewLeague

- ◆ User centric ecosystem approach: UVDP
- ◆ Vehicle on the internet
- ◆ Over the Air (OtA) Update
- ◆ Processor power
- ◆ Blockchain / Cyber security
- ◆ Born electric platform
- ◆ Zero emission, carbon neutral
- ◆ Business partner / Start-up approach
- ◆ User experienced brand
- ◆ Authenticity / IP ownership

Smarter mobility vision: USE-CASE Mobility®

User-Centric

Smart

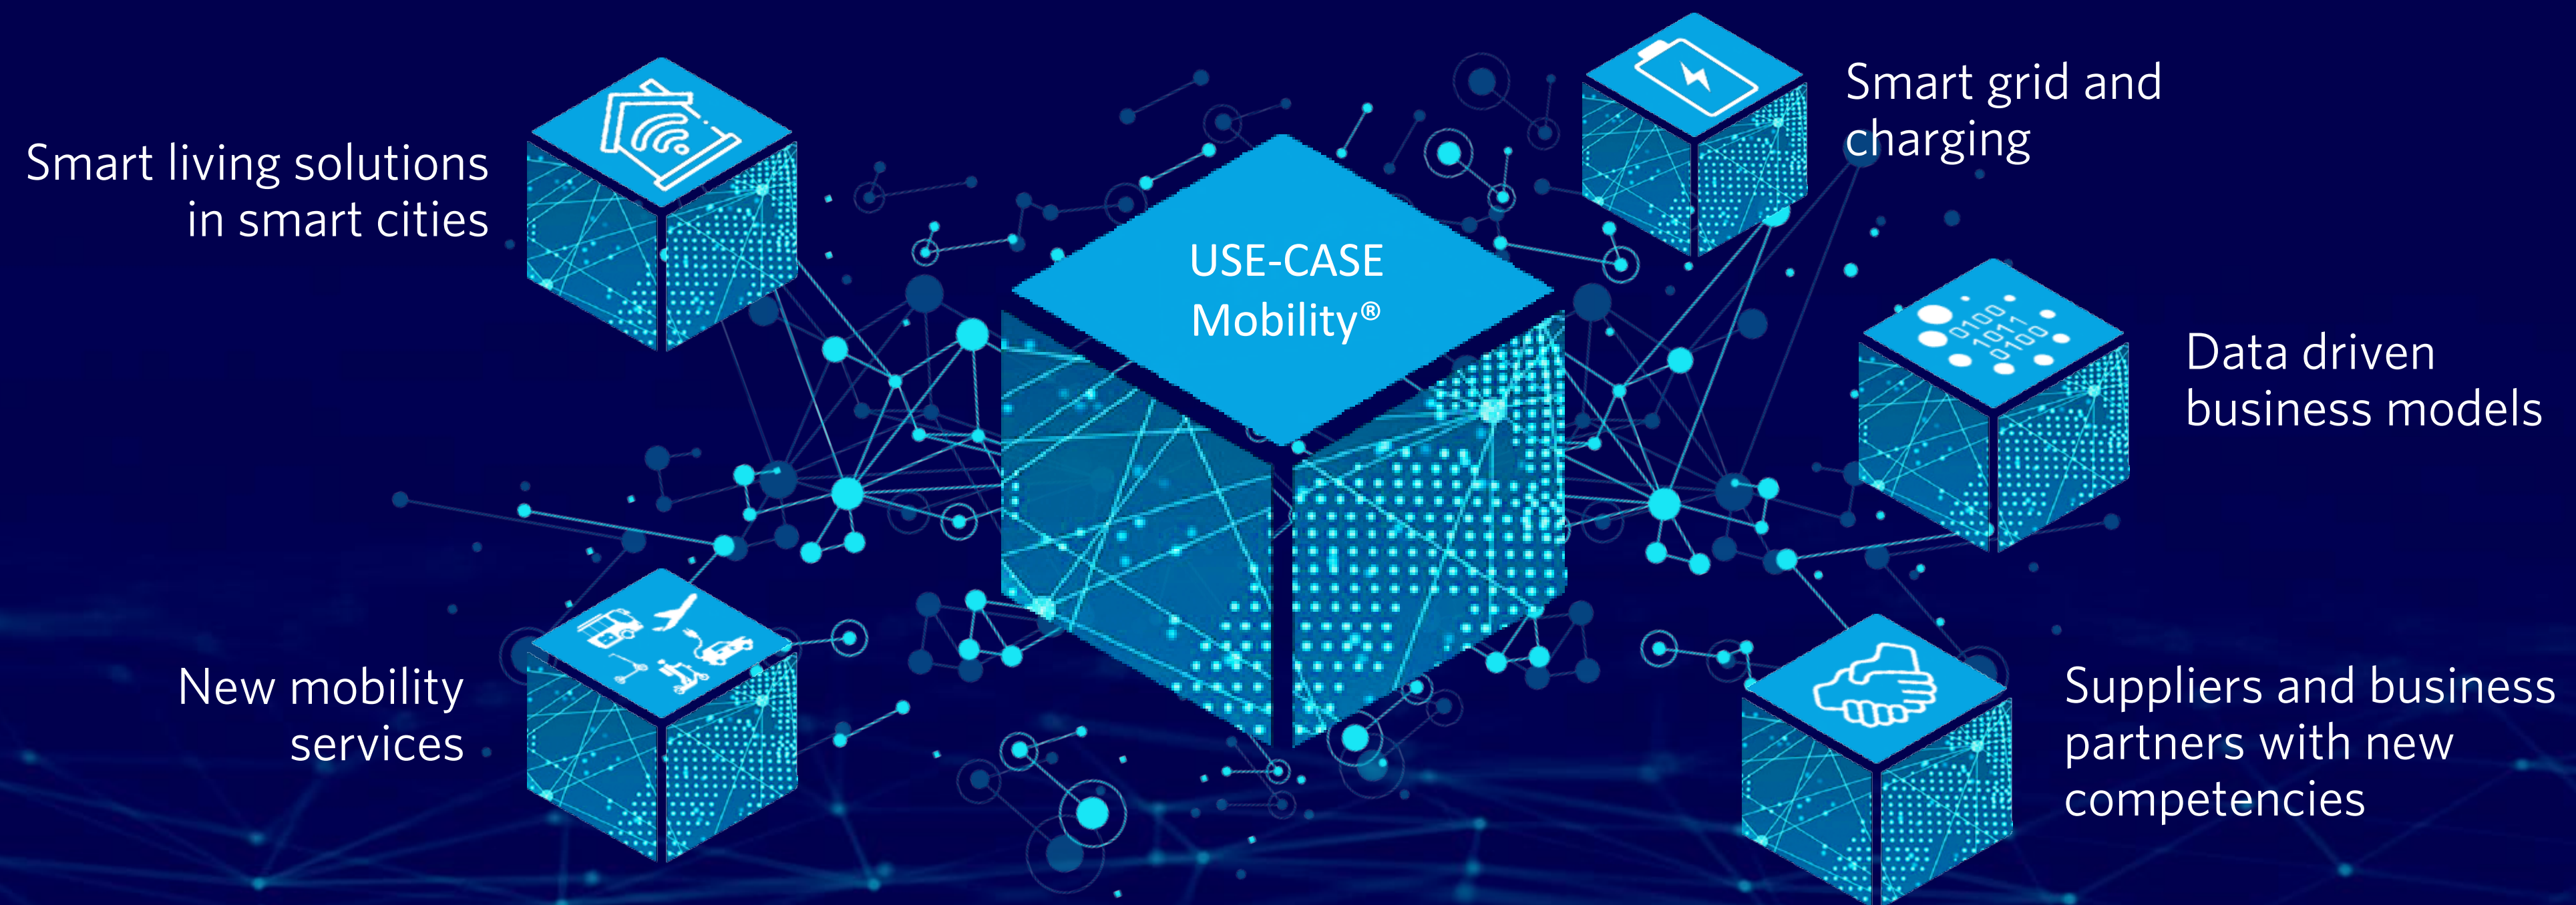

Empathic

Connected

Autonomous

Shared

Electrified

We have two main goals

1

Establishing a global brand whose IP rights 100% belongs to Togg

2

Creating an open and user centric mobility ecosystem

State-of-the-art technology

Born electric

Smart device

Globally competitive

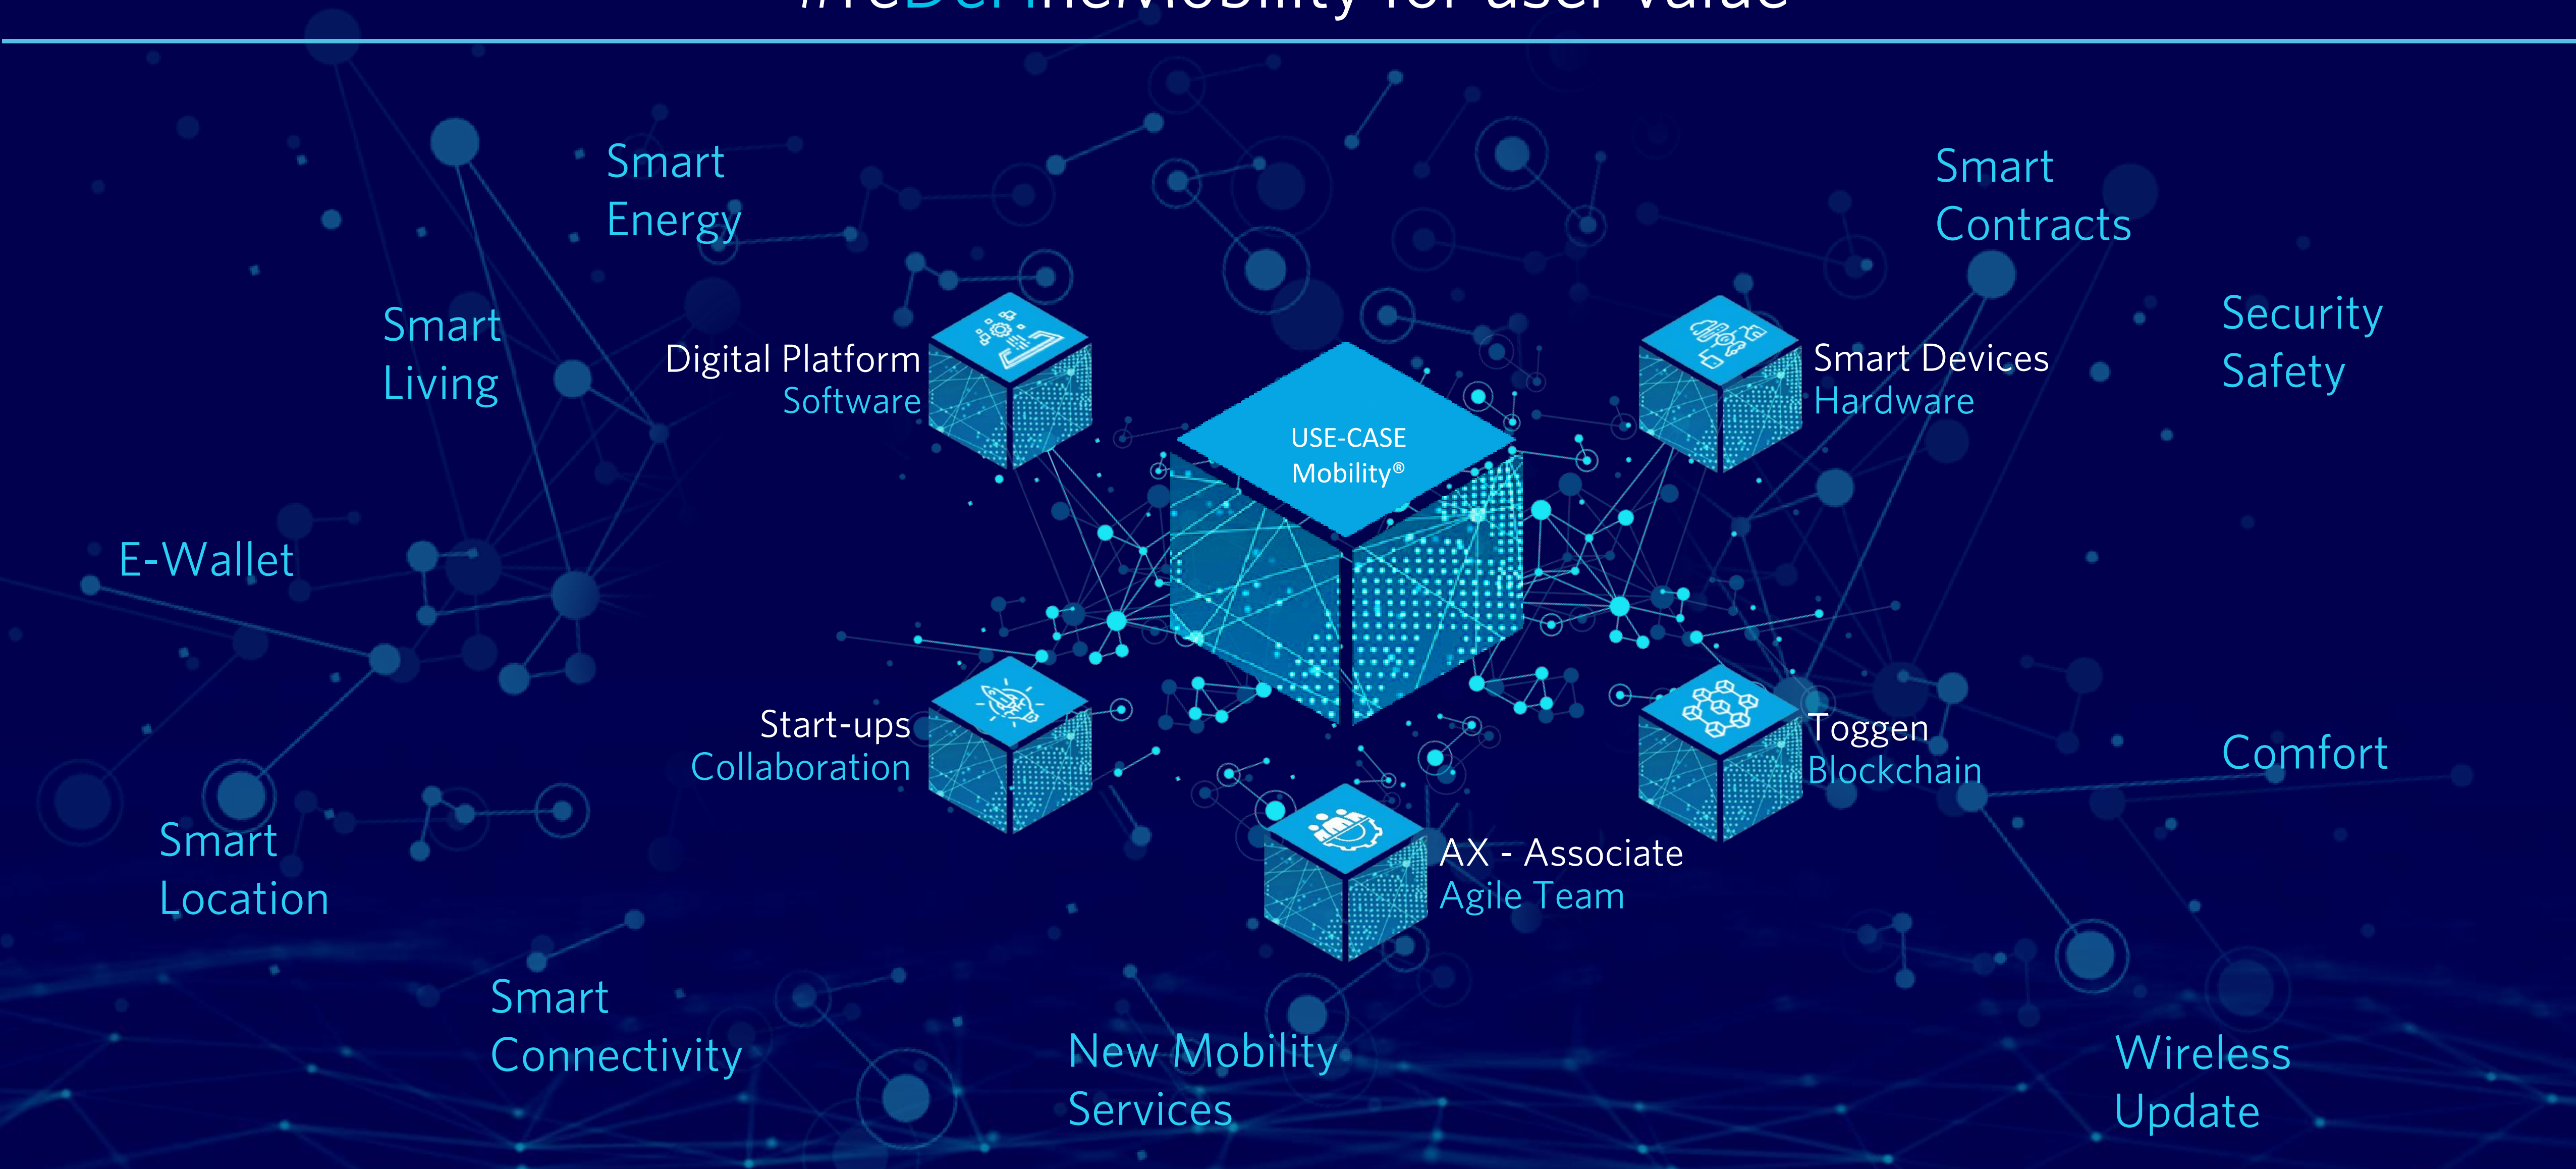

Euro-NCAP 5 Star

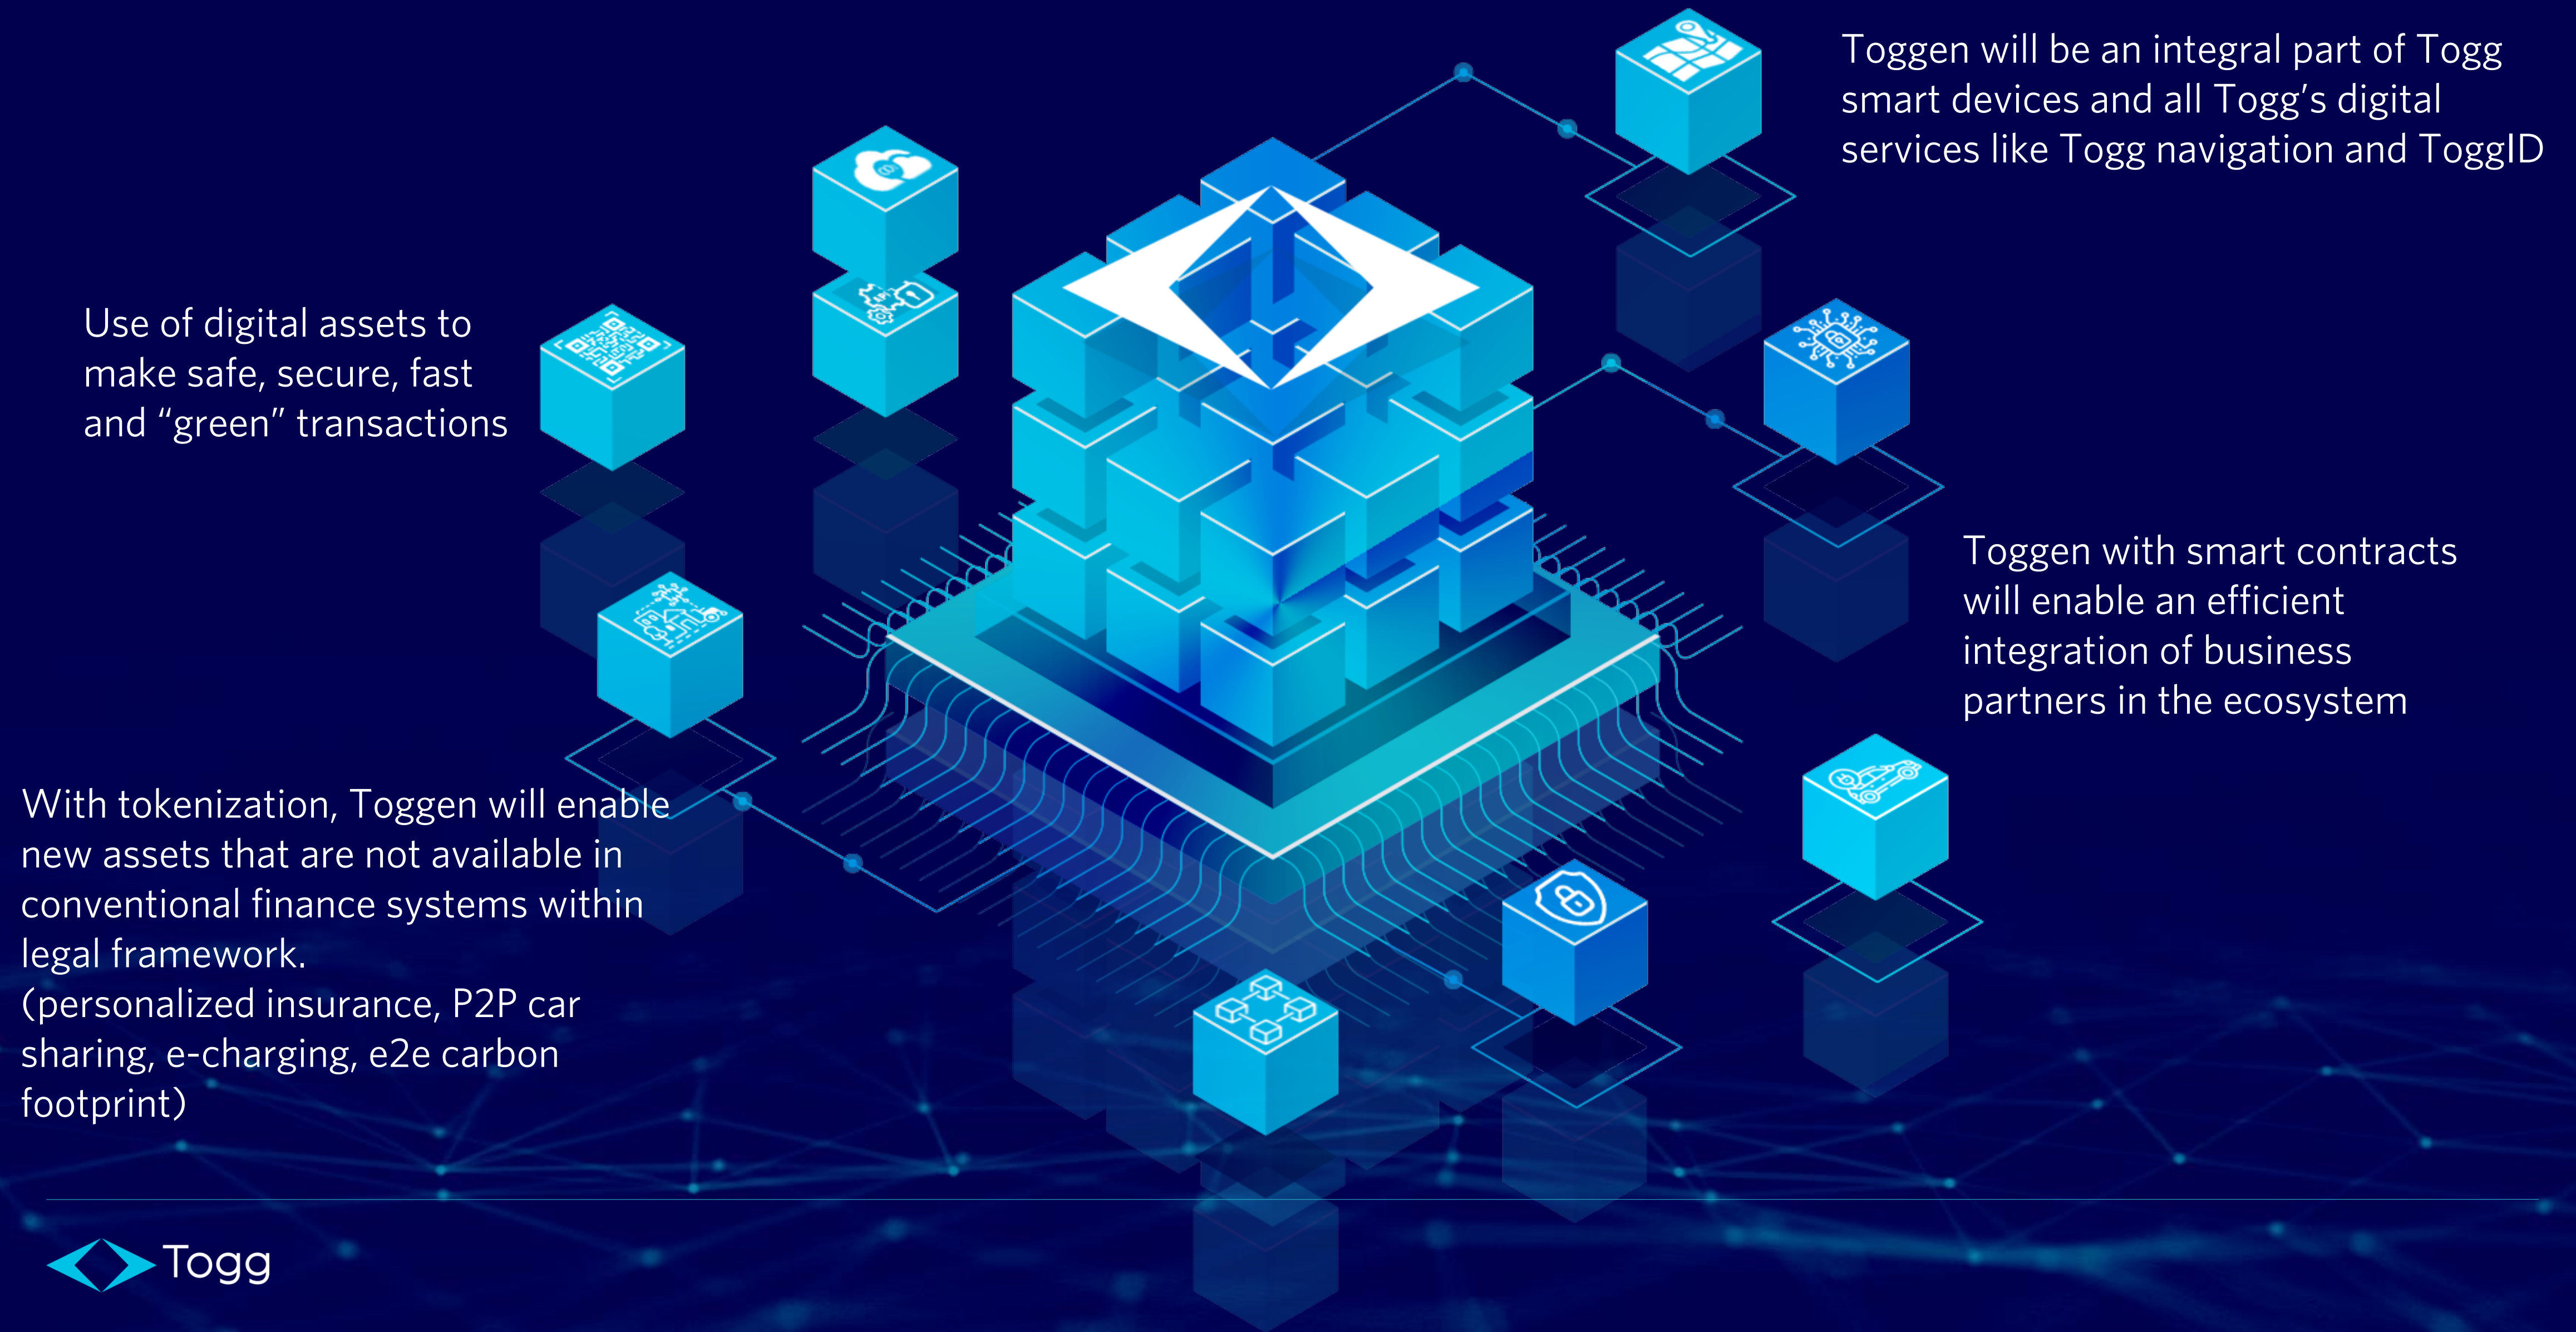

#BornSustainable
#BornGreen

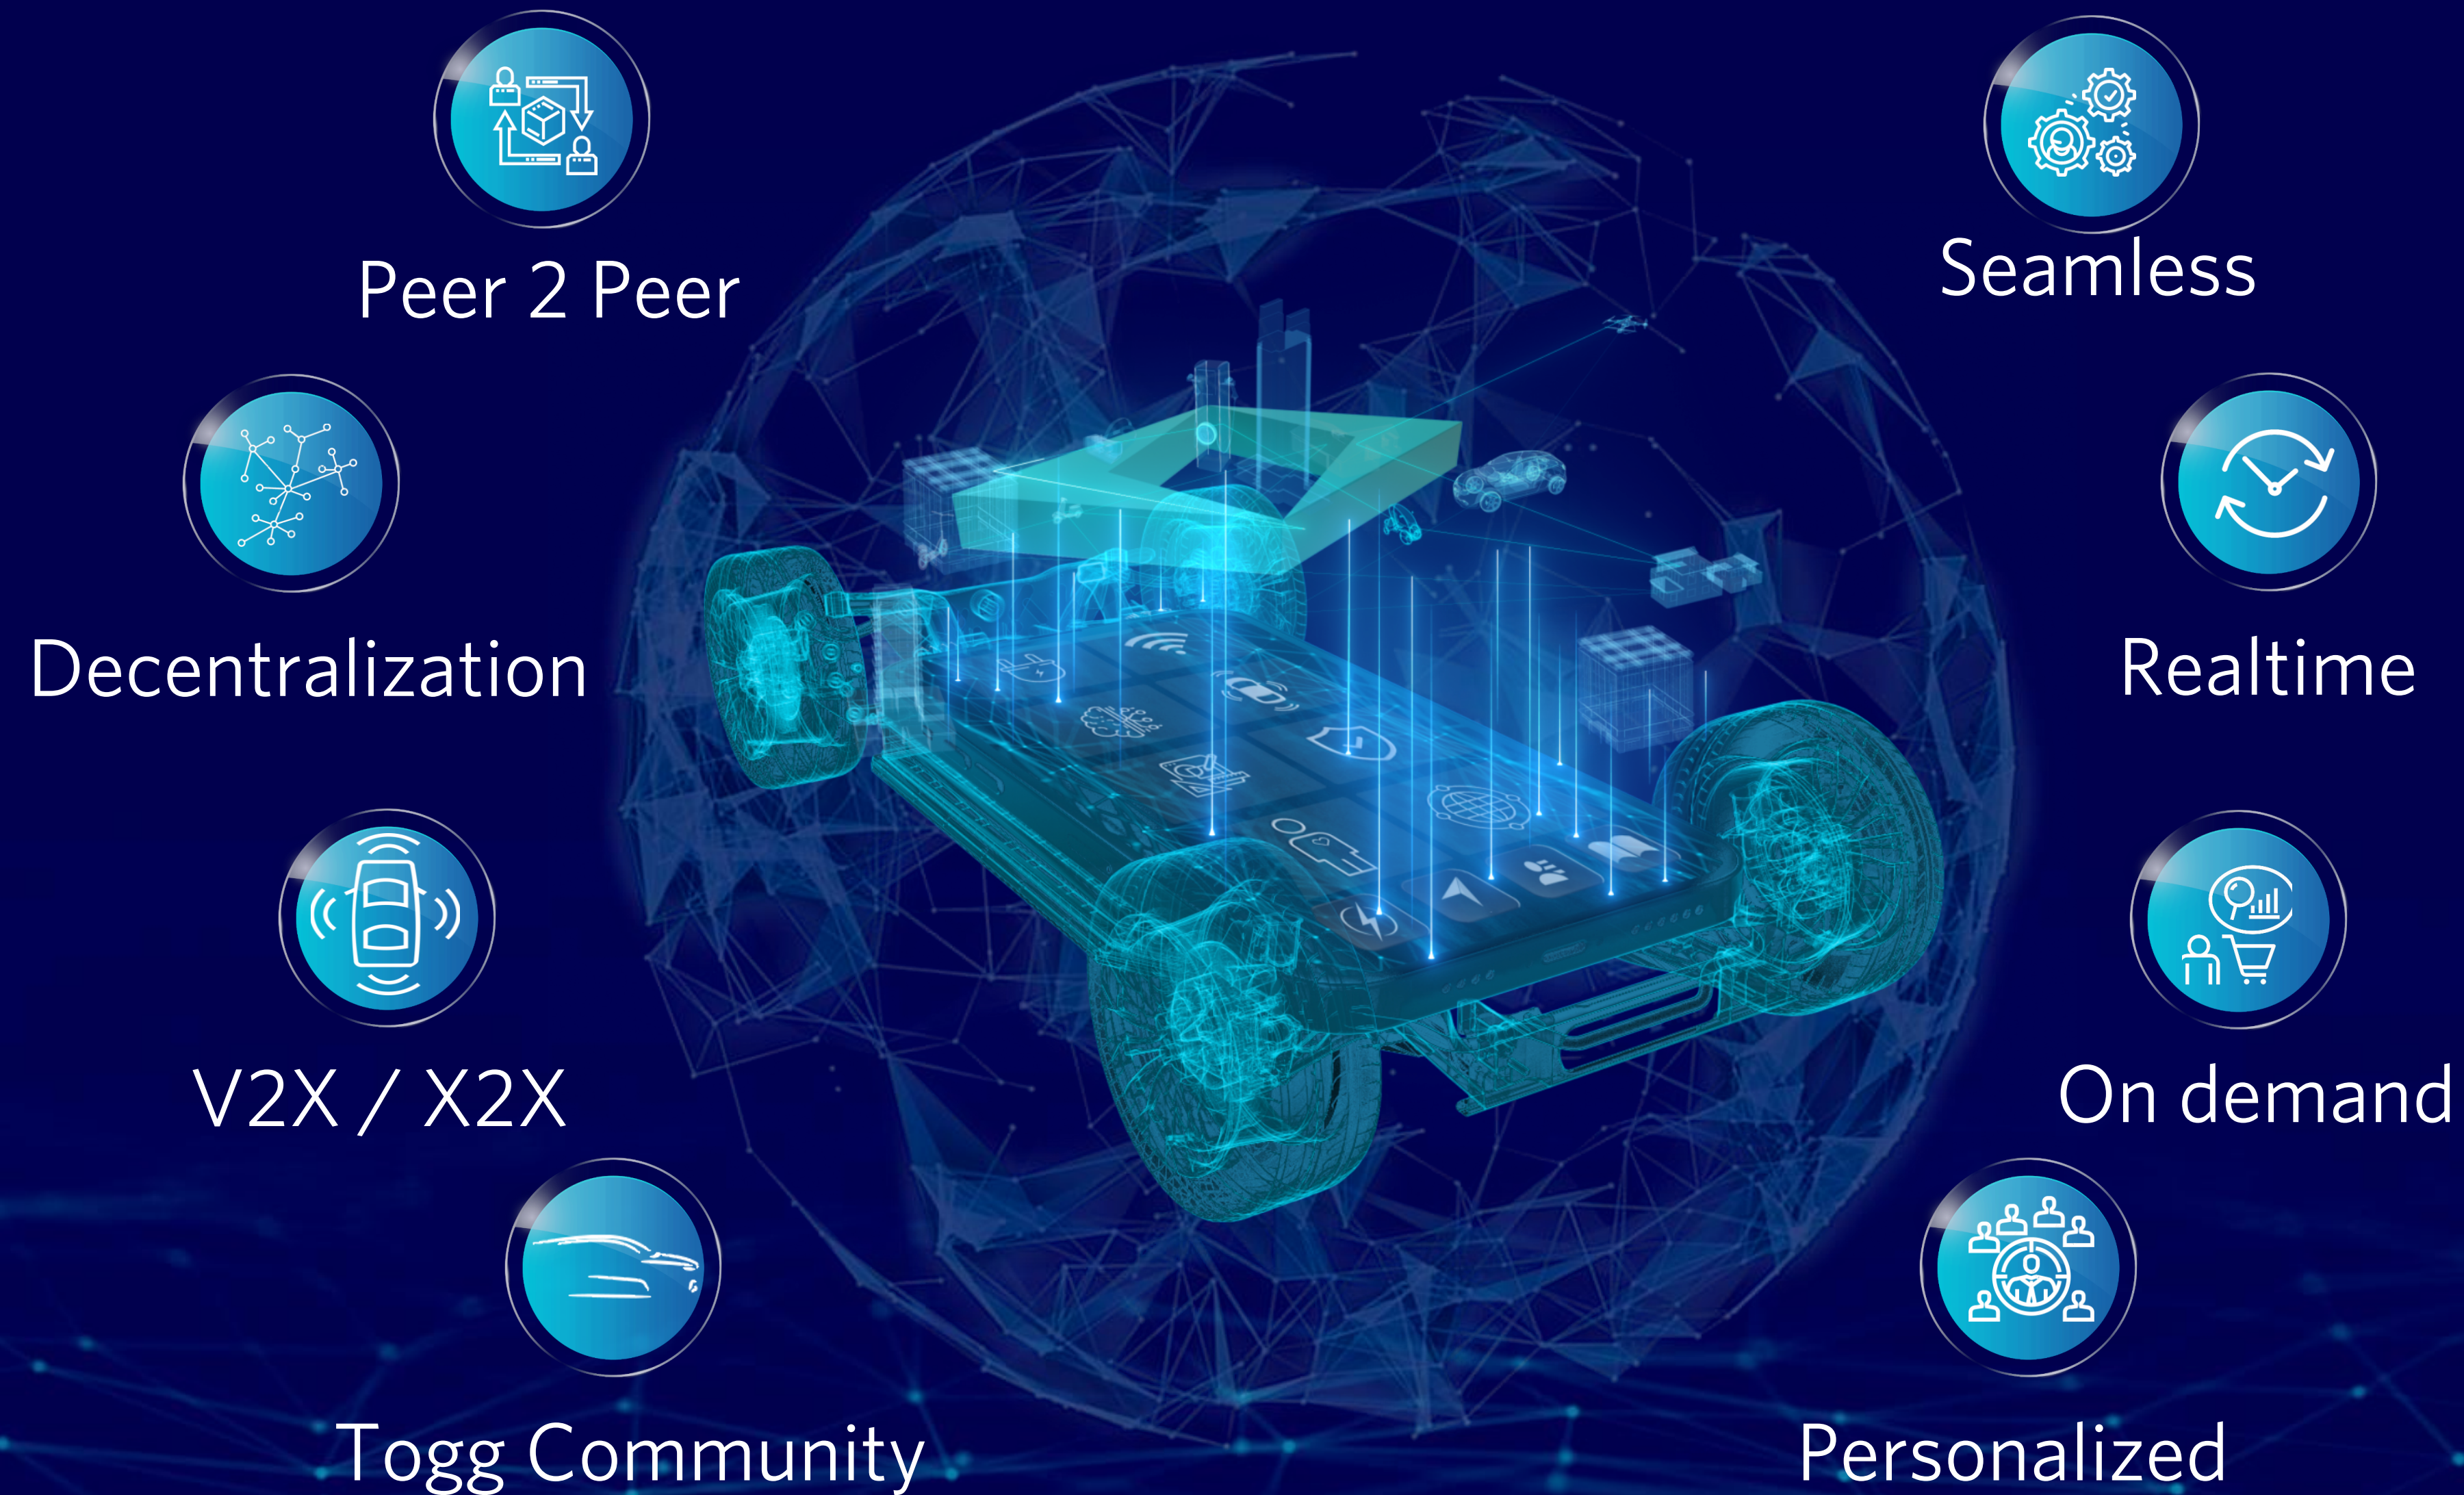

#reDeFineMobility for user value

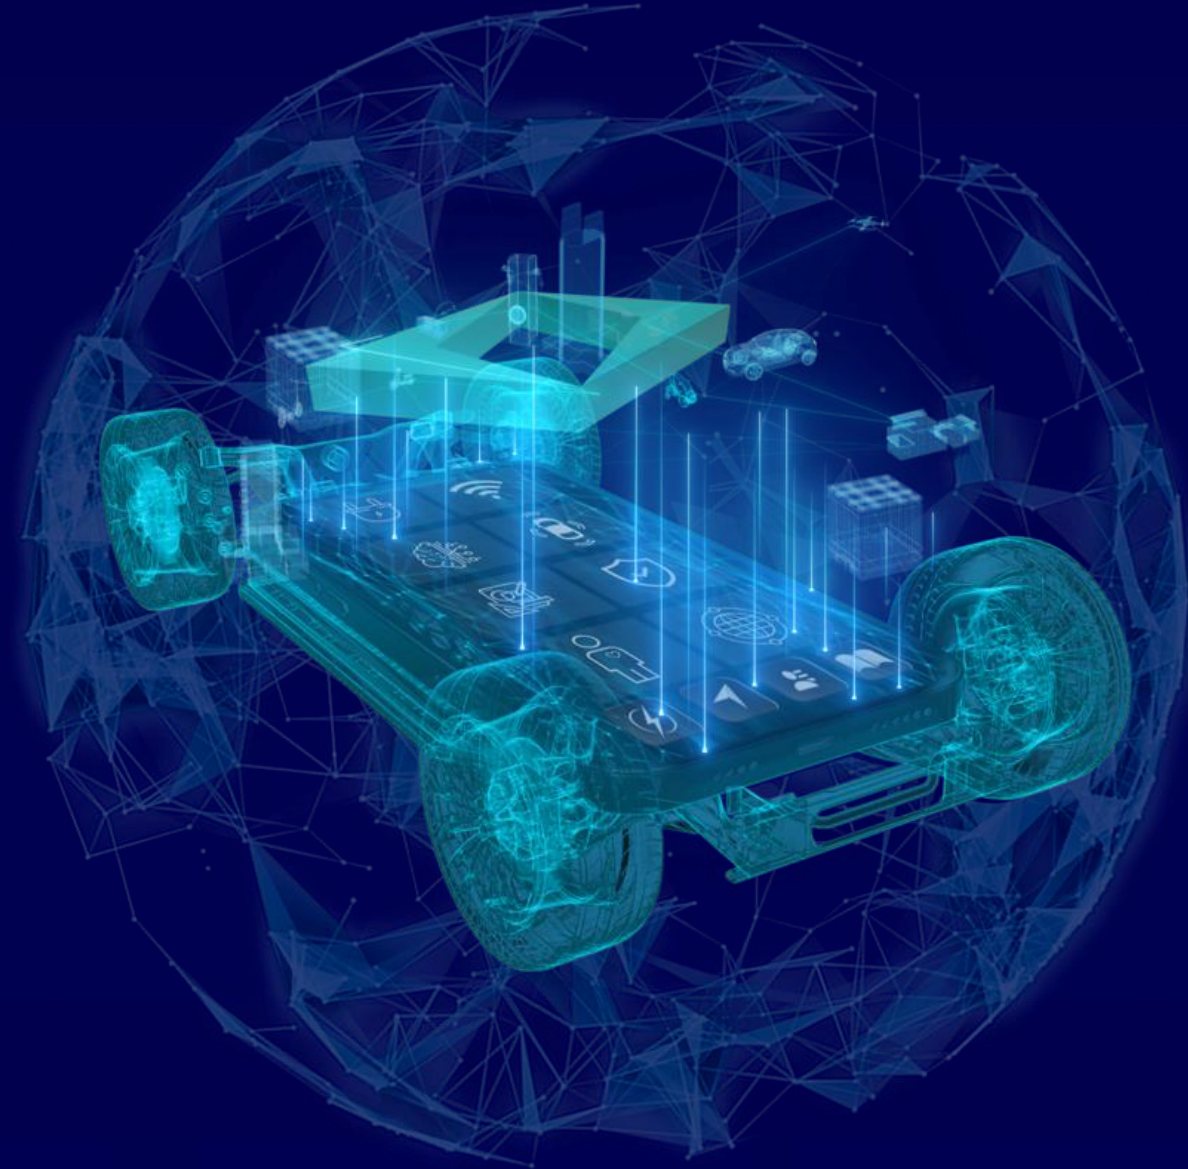

Toggen: Blockchain platform for smart contracts and digitized assets for Togg mobility ecosystem

Tokenization reDeFines borders of mobility

Toggen smart contracts use cases

Supply chain
logistics

Tracing of parts and
components after MPR

Issuing of
commercial
contracts

Digital
passports for
Togg Smart
Devices

Maintenance
via 3rd
vendors

CO² footprint
certificate

Smart contracts:

- ◆ Improves the efficiency of multiparty transactional workflows
- ◆ Increases security and transparency for entire value chain

Strategic partner selection criteria and roadmap

Scalability

Zero or extremely low
cost for the user

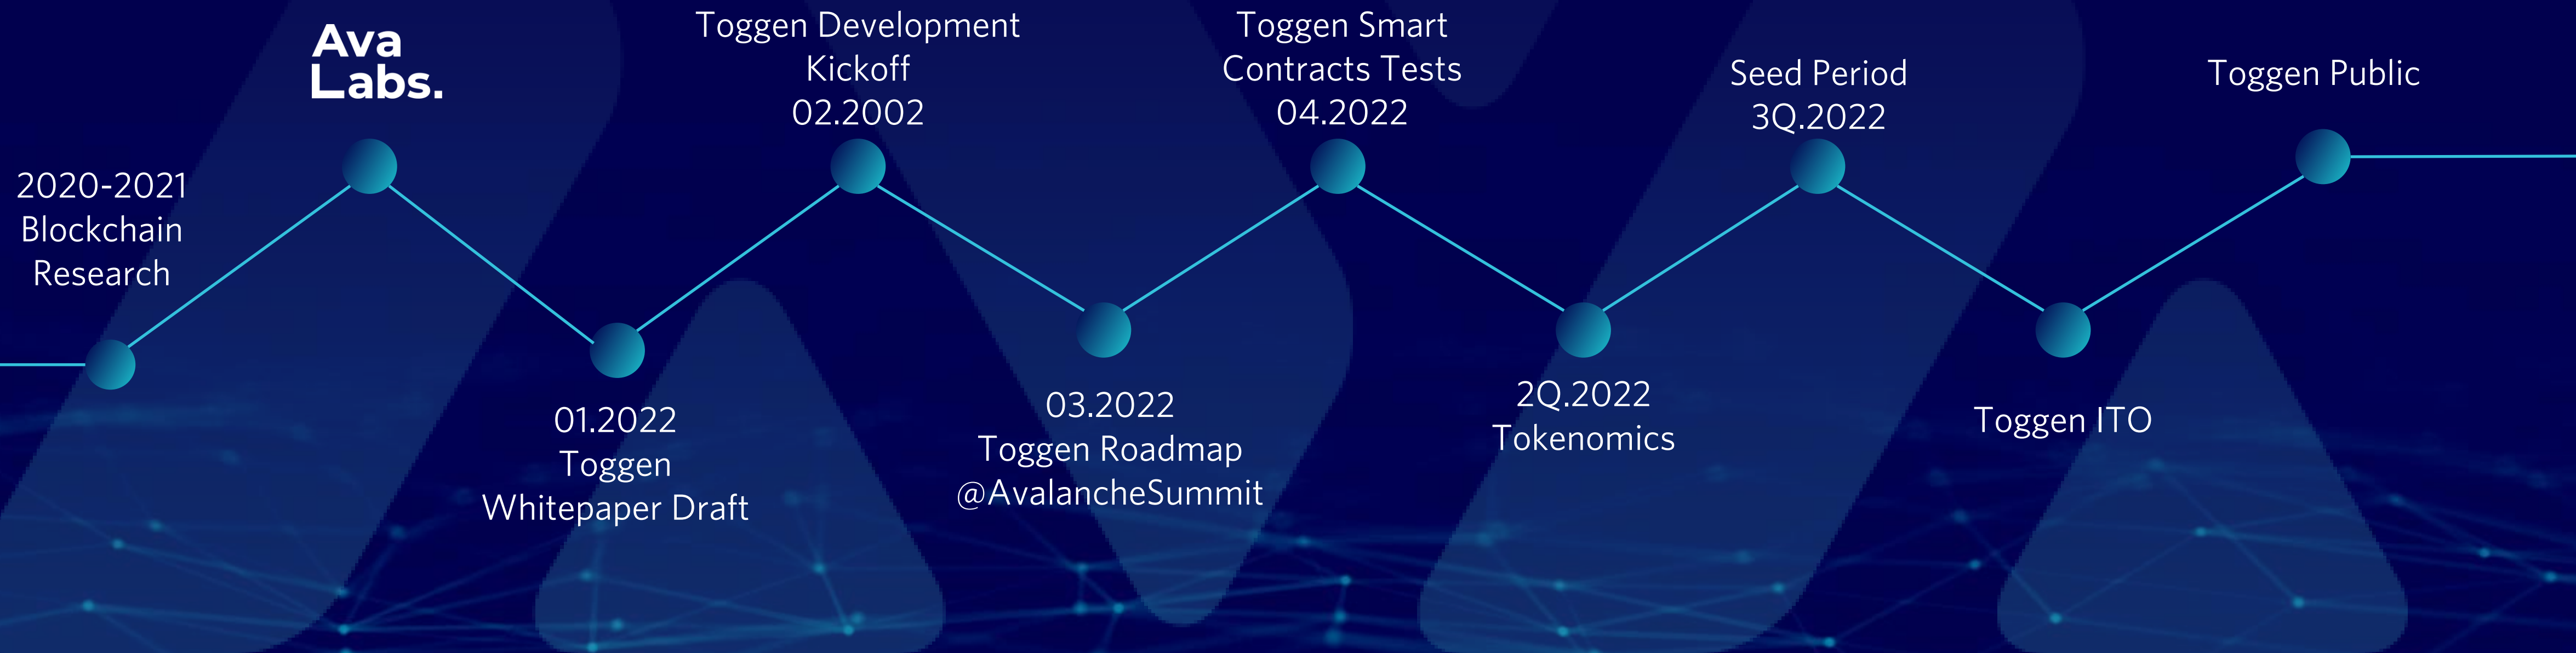

Speed of
transaction

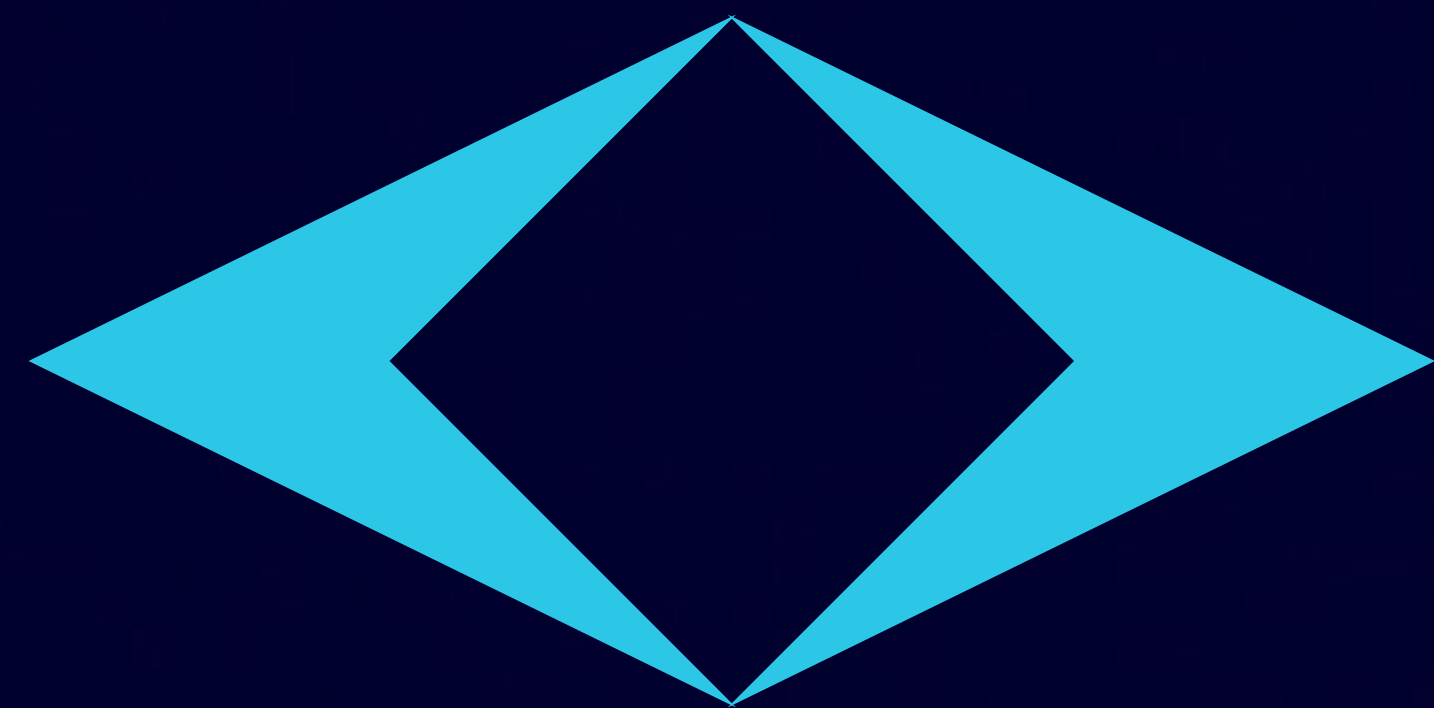

Reliability of the
technology solution

Energy efficiency

Thank you
