Aleia Platform

AI as a Service

ALEIA

Fast track to AI

Artificial Intelligence Saas Platform

ALEIA develops and sells a sovereign artificial intelligence platform to accelerate AI projects of medium to large companies and public organizations.

OPEN

The ALEIA platform provides access to the main libraries of algorithmic model. In the form of a consortium, it unites the best French and Eurapean data providers and algorithms, and software publishers.

MUTUALIZATION

ALEIA platform integrates the ability to mutualize data between different organizations and helps them access the critical size necessaryto train algorithms while maintaining contrai of its data.

ALEIA is supported by Bpifrance, being selected as part of the ATF call for projects: "Digital platforms and data sharing for sectors" to accelerate its R&D and its development.

SOVEREIGNTY

ALEIA guarantees full control of its customer's data thanks to an infrastructure entirely hosted in France (not subject to the Patriot Act or the Cloud Act), and algorithmic pracessing integrating opensource software (not subject to commercial licenses).

**ALEIA is identified in the French Government's[1]
National AI Strategy and is a current member of Gaia-X,
a European data infrastructure project.**

ALEIA AI PLATFORM

The ALEIA platform unifies, secures, and industrializes ail stages of an artificial intelligence application creating to facilitate the work of data teams:

- ○ Data ingestion and preparation
- ○ Model training and engineering
- ○ Deployment and operational maintenance of data workflows and models
- ○ Exposure of data or model by API to third-party systems

In a few clicks, the data is integrated and usable, either in a Jupiter Note book for exploratory work, or directly in production data processing pipelines, in the cloud with a suitable environ ment. These pipelines, which can be deployed on-demand, can be configured and run periodically to automatically transform the data. APis are used to retrieve the generated information or to directly request a model produced by a pipeline.

RUN — **Deploy, integrate** and **monitor** your data pipeline and model drift → **Business applications**

LAKE — **Store** and **compute** your data with unified, managed and sovereigned cloud infrastructure

ADMIN — **Govern** your AI projets by managing users, roles, access, ressources & costs

"

ALEIA directly supports its customers in the acquisition and use of its AI platform and relies on a network of integrator partners for the development of its AI applications.

About ALEIA

Created in 2021, ALEIA offers private and public organizations a fully sovereign, open, and modular AI solution. Today ALEIA brings together the best French and Europe an publishers to accelerate and industrialize AI projects with multiple applications: mobility, energy transition, cybersecurity, etc.

In February 2022 ALEIA announced its financing of 8 million euros, bringing together Bpifrance following its selection as part of the ATF call for projects "Digital platforms and data sharing for sectors" and leading private investors. ALEIA now has 30 employees and first custo mers such as the Ministry of Sports, the DIAC, the Val-de-Loire Mixed Trade Union, Saint-Cyr-L'Ecole.
