

MARQVISION

AI-powered Brand Protection with Scale

SMARTER IP PROTECTION

Global Market Coverage

MarqVision removes illicit product listings from the top global marketplaces covering e-commerce, social media, and NFT marketplaces.

AI-Powered Detection

Image Recognition Models scan through millions of listings to visually classify similar products and identify counterfeits.

Semantic Analysis Models analyze textual data such as price, product description, and buyer reviews to identify counterfeits.

Automated Reporting

High frequency and speed in reporting and enforcement. Automate the entire reporting process by setting smart rules and infringement libraries.

Data Driven Decisions

Performance metrics and insights give full market visibility and in-depth seller analysis to devise a data-driven IP strategy.

Asia Region Experts

Leverage our dedicated local enforcement specialists, in-house IP attorneys, and Asian market expertise to gain exceptional performance on Asian marketplaces.
