# SettleMint

**BIO:**

**Matthew Van Niekerk**
CEO and Co-Founder at SettleMint

In 2016 after several years of self-study, use case analysis and experimentation with blockchain technologies in financial services and capital markets. Matthew cofounded SettleMint with one objective: to simplify the blockchain journey for enterprises.

When you believe in the benefits that the technology will bring to organisations and to society as a whole, there is an accompanying moral obligation to accelerate the adoption of the technology and that is what we do at SettleMint. Our low-code, chain and infrastructure agnostic software solution provides the absolute shortest path between a use case concept and the realisation of the business case underpinning it.

A Canadian by origin and an Economist (Western) and MBA (Vlerick) by education, he spent the first 7 years of his international career in Tokyo, working in FX brokerage and where he launched two online retailing companies.

He then moved to Belgium in 2006 where he completed an MBA then went to work at KBC, where he started as an internal management and operations consultant, later as the COO of the Belgian Consumer Finance business and finally as the Head of Platform Innovation at KBC Securities where he was responsible for the technical side of the online retail brokerage platform 'Bolero' and the equity crowdfunding platform 'Bolero Crowdfunding'.

# SettleMint

**SettleMint**

**Company description:**

**SettleMint** offers a chain agnostic low-code platform that makes it easy to deliver blockchain applications rapidly by taking a visual development approach.

The **#1 low-code** platform for **rapid blockchain innovation**. With the **ready-to-use tools** businesses can bring use cases to **production in weeks**, even without prior experience with the technology!

The radically simplified enterprise blockchain, allows accelerated adoption of the technology within any organization.

The low-code platform makes it easy for IT teams to deliver blockchain applications rapidly, by taking a visual development approach.

The platform includes a suite of ready-to-use:
• tools
• frameworks
• templates
• and APIs
to speed up development of blockchain implementation.

Since 2016, SettleMint has collected a number of distinguished recognitions, including admission to the *Global Innovators Community* of the **World Economic Forum** and esteemed as a *"Cool Vendor"* by **Gartner** in 2019. Making SettleMint the trusted blockchain platform provider for many large scale clients across the globe.

**Who can benefit?**

• **Business Leaders & Innovators:** Speed up time to market and outperform competitors.
• **IT Leaders:** Fast-track time to value and move to production in weeks.
• **Developers:** Everyone can be a blockchain developer, instantly!
