

water empowered sustainable buildings

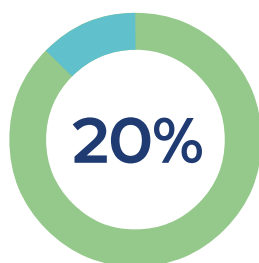

Try Our Comprehensive
Water Management
Solutions for Businesses

Track & Control Large Volume Water Usage in Commercial Buildings

REDUCTION IN WATER CONSUMPTION PER UNIT

REDUCTION IN WATER-RELATED POWER CONSUMPTION & MAINTENANCE

WEGoT aqua's real-time water management system puts the control back in your hands.

Get a bird's eye view of the entire water delivery system from source to usage

while simultaneously experiencing the freedom of remotely controlling this process.

Move towards a Sustainable Building

★ Gain up to 4 IGBC points

TRACK SUPPLY
incl. Tanker lorry management

TRACK INFRASTRUCTURE
WTP/STP

BOREWELL OPTIMIZER

SHUT OFF LEAKAGES

WATER SAVINGS PROGRAM

AUDIT WATER BILLS

IMPROVED MAINTENANCE

MACRO & MICRO LEVEL VIEW

GREEN BUILDING

Malls

Track supply from tankers and other sources, reduce water consumption at wash rooms, restaurants, food courts and cinema halls through leakage alarms, better insights and audits.

IT Parks

Integrate WEGoT aqua with your existing BMS systems and let your tenants know their precise consumption.

Hotels

Optimise overall usage by tracking water at every point of consumption – kitchens to common washrooms to laundry to suites – and reward guests with loyalty points for water-positive behaviour.

Factories

Track water consumption at both administrative and production levels.

Hospitals

Track water consumption in common areas, canteens, rooms and private wards.

Educational Institutions

Track and control water consumption in hostel blocks, toilets and pantry.

Our superior sensors are available in two variants – Wired and Wireless.

Solid Construction
with Ingress
Protection 65 rating

एफ. सी. आर. आई.
>98% accuracy
tested by Fluid
Control Research
Institute

Wireless Option
with Long Range
Capabilities

futuristic ultrasonic sensor

Supersensitive
Detects upto 0.1 LPM of water

- Fail-safe
Design
No moving parts
- Handles
High Pressure
Upto 16 bar

smart water management

Monitor Usage
At a granular level

- Leakage Alarms
Arrest leakages with
instant notifications
- Water Balance
Reduce distribution losses
across the network
- Sources Monitoring
Monitor tanker lorry, borewell supply &
WTP/STP efficiencies
- Pump Automation
Automate pump On/Off
based on tank storage levels
