

HANDIVISIBLE

THE DEVICE THAT MAKES LIFE EASIER
WHEN QUEUEING.

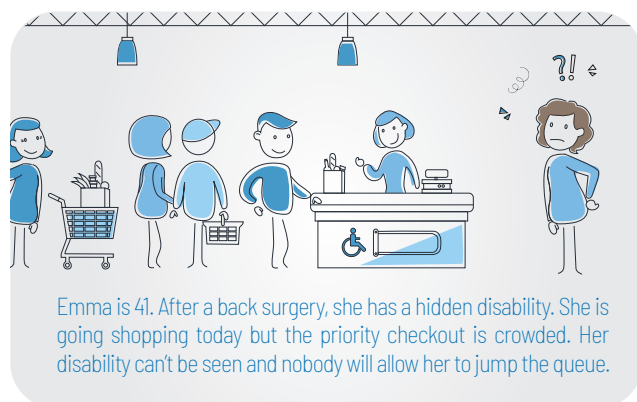

HANDIVISIBLE
OPEN YOUR EYES ON DISABILITIES

Bryan, Debbie and Emma have one thing in common, they are all disabled. They all have a disability card given by the MDPH but they don't dare to show it because they are **afraid to be judged by others**.

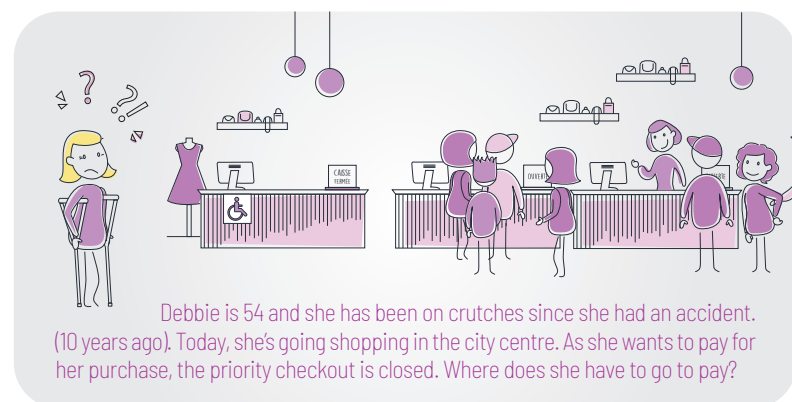

They download « Handivisible » app on their mobile phones. After our validation, they know if the public places they usually visit are equipped. Once they have started queueing, **they open their app which is going to warn the reception staff or the cashier**. The staff member is informed that a disabled person would like to have right of way and he/she allows him/her to jump the queue.

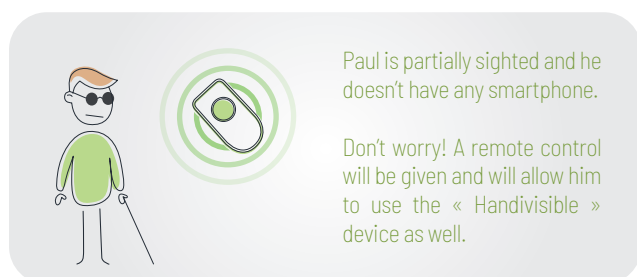

Bryan is 27. He has been in a wheelchair since birth. Today, he wants to go to a concert with his friends but where is the priority queue?

Emma is 41. After a back surgery, she has a hidden disability. She is going shopping today but the priority checkout is crowded. Her disability can't be seen and nobody will allow her to jump the queue.

Debbie is 54 and she has been on crutches since she had an accident. (10 years ago). Today, she's going shopping in the city centre. As she wants to pay for her purchase, the priority checkout is closed. Where does she have to go to pay?

Paul is partially sighted and he doesn't have any smartphone.

Don't worry! A remote control will be given and will allow him to use the « Handivisible » device as well.

THE SOLUTION COMPATIBLE EVERYWHERE AND FOR EVERYONE
