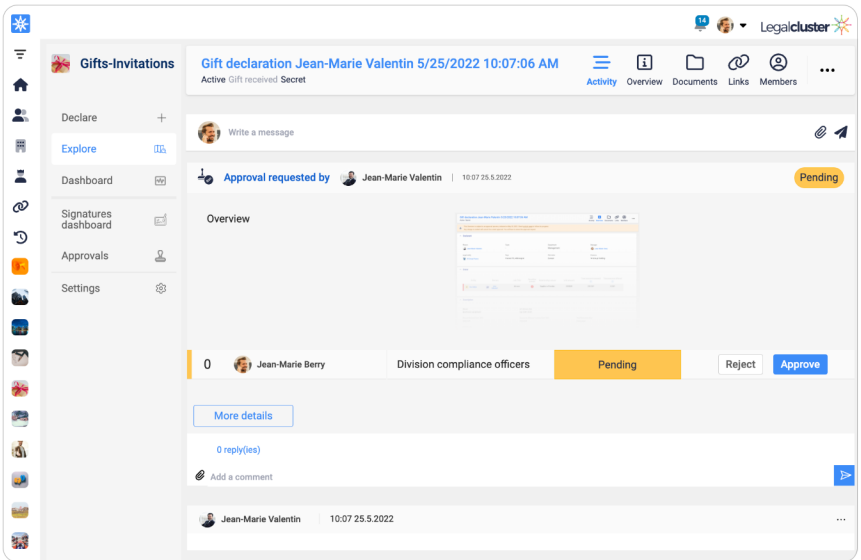
A collaborative solution to make each employee a player in the legal security of your organization

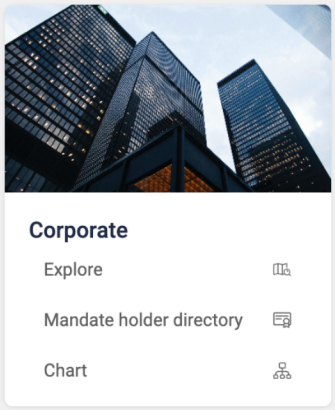


In the Legalcluster world, collaboration takes place in "clusters" organized by theme, issue, team and organization.

A cluster is a collaborative workspace that gathers all the useful information, documents, and workflows needed to address an issue, and makes them accessible and available to all stakeholders.

The data structured in the clusters is consolidated to facilitate mapping, traceability and reporting.

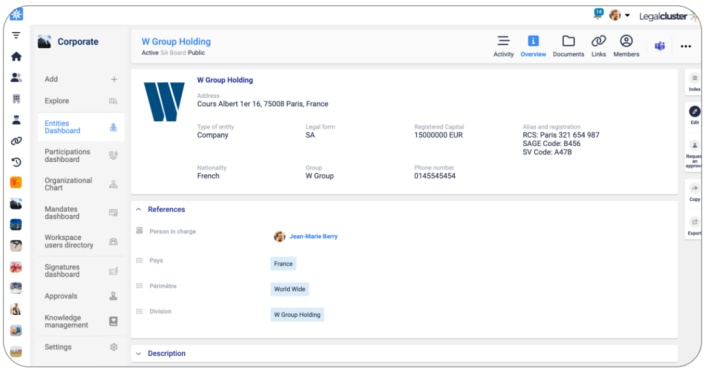
- Multi-language
- Automatic currency conversion
- Multi-layer approval
- Conditional Approval
- Data grid
- xls & CSV export
- Unlimited attachments
- e-signature

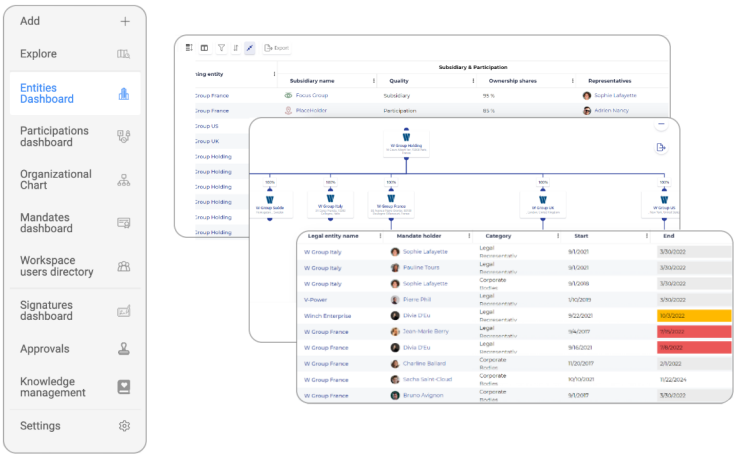


Govern your organization thanks to a platform's logic

Manage your subsidiaries and holdings

Each legal entity has its own identity card that contains all the information needed to carry out the legal operations that concern it: teams, documents (such as the KBIS), POAs, perimeters, etc.



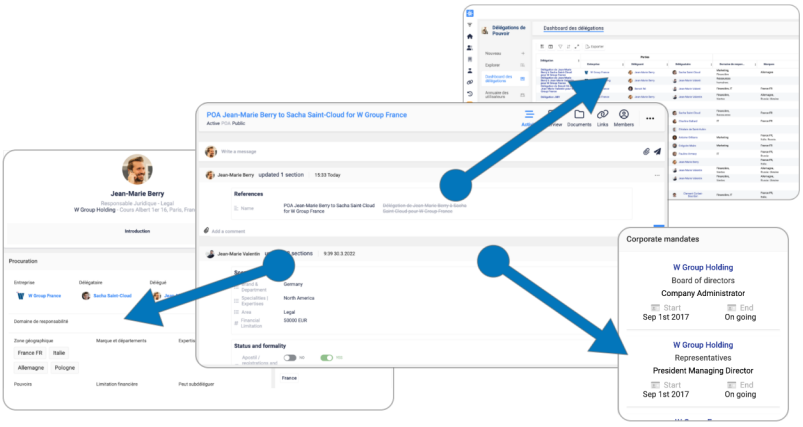


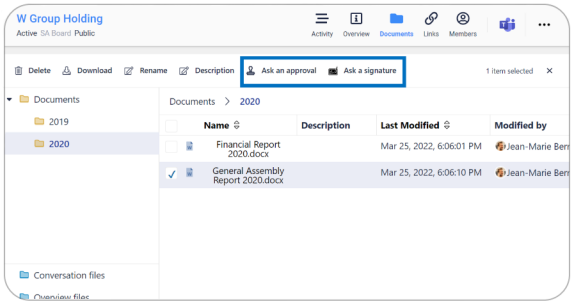
Structure and govern the data

All data is consolidated, accessible and exportable in dynamic dashboards to:
- Track key dates of mandates - Facilitate auditing, reporting and data intelligence at the organization level as well as the platform level.

Distribute the data to those who need it

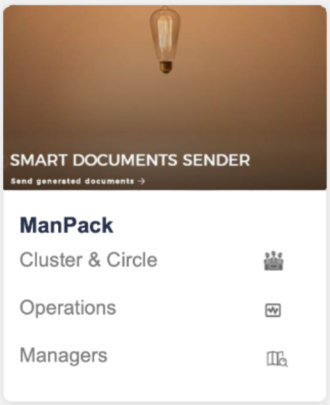
Permission management allows legal, ethics and compliance functions to ensure effective data sharing while maintaining confidentiality



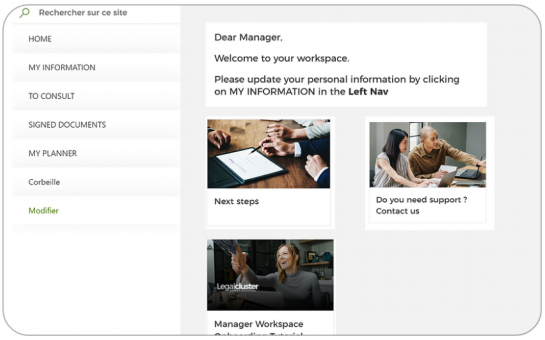


Manage your documents, collaborate, and control their validation via e-signature

Your platform is a tool for operational management of your documents.
Legalcluster gives you access to editing functionalities via a native access to Microsoft Office, and to e-signature, notably via its integration with Docu-sign



Simplify your relationship with your shareholders

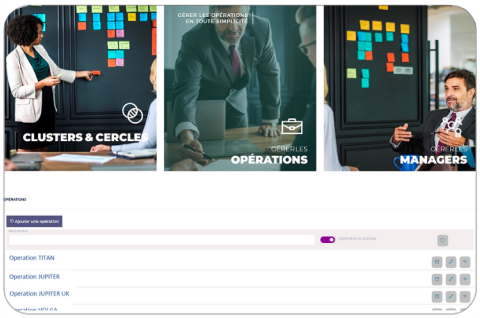


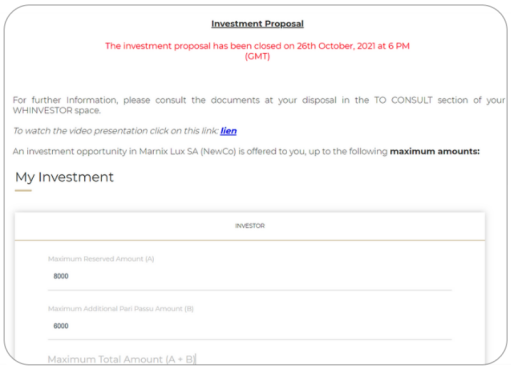
Simplify your relationship with your shareholders

Through his personal space, each shareholder :
- Accesses his information
- Receives his documents for validation and signature;
- Is informed of the different steps
- Access to his archived documents
- Structure, control and share his personal data in accordance with the RGPD regulation.

Structure your shareholding

By operation, by circle, by manager... structure your shareholding and manage its evolution over time:
new round, leaver, new financial instruments, your platform adapts to give you an exact vision of your organization.



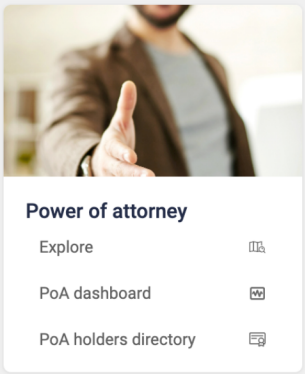


Become more efficient

A true collaborative platform, our solution allows all the players (lawyers, financial advisors, issuers, back office, etc.) to collaborate, communicate and contribute to the data together.
Our workflow engine and our integration with Docusign allow you to secure and manage your validation and signature workflows, whatever their level of complexity.

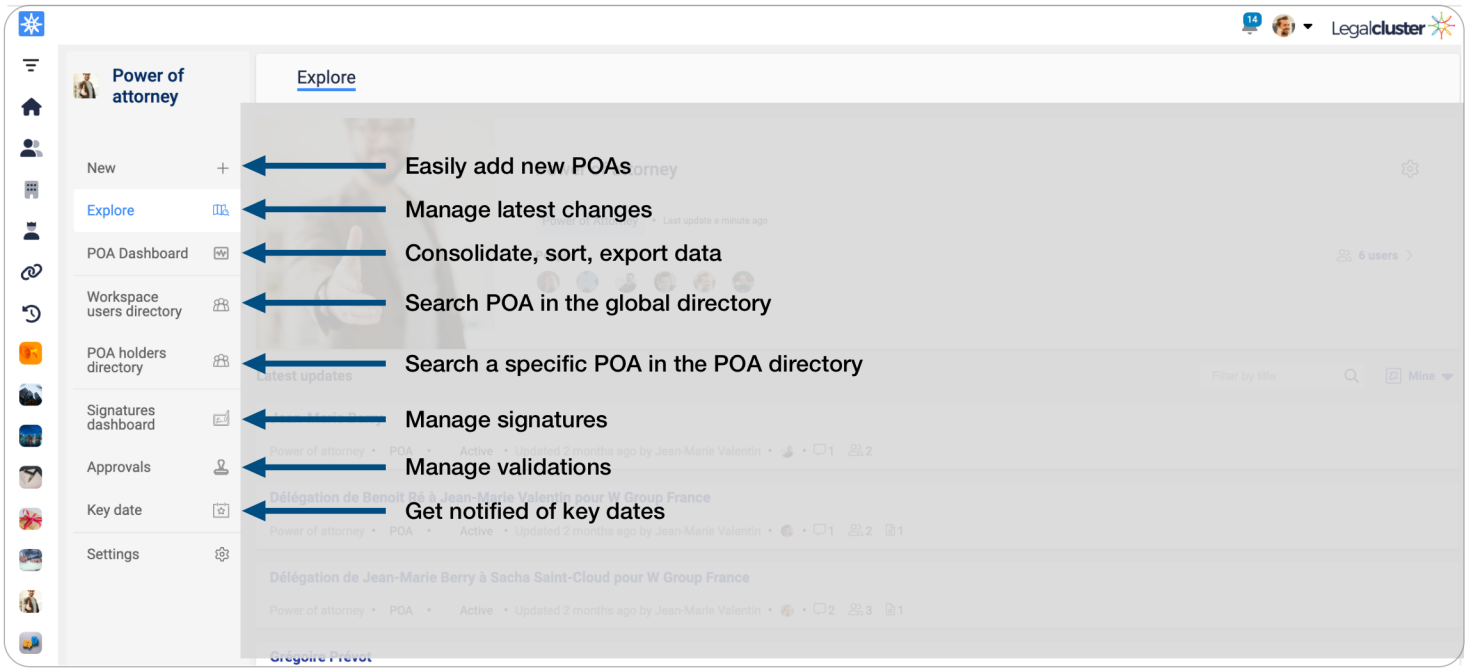
Webhelp

When Legalcluster adds value in a $2.5 billion deal
"Legalcluster was a key player in the success of our operation",
Sandrine Asseraf, GM, Webhelp



Manage your power of attorney in one click

Get quick access to key POA management actions



Follow the key dates in one click

The team in charge tracks power delegations through dynamic tables and can set up a reminder alert to manage processes efficiently.

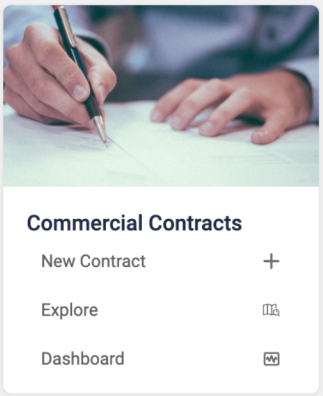
Find information in dynamic profiles

Legal entities, employees, members of your ecosystems, each benefit from an extended profile that identifies them as actors of your legal and compliance functions.
Whether the employee is attached to a new entity or has been granted a new delegation of power or a new mandate, the profile is enriched with this information and allows the employee to be mobilized when needed by the community.



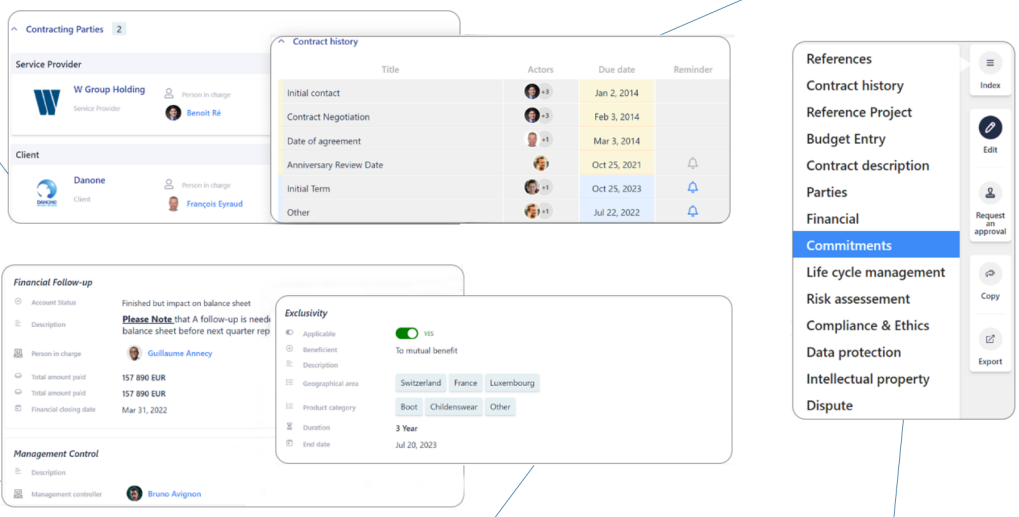
Manage your contracts and legal matters

Manage contract data structures

Manage your projects, contracts & litigation in a collaborative manner with all stakeholders (including your lawyers if necessary). Approve and sign contracts easily.
Manage your risks. Consolidate data for your reporting.

Synchronize with the directory & third parties mapping

Manage milestones and alerts easily in collaboration



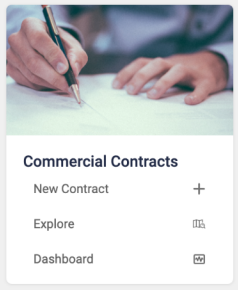
Collaborate with stakeholders

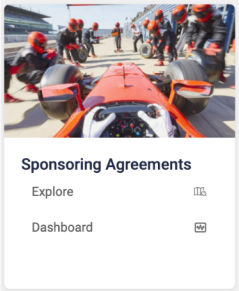
Use platform repositories to save time and efficiency

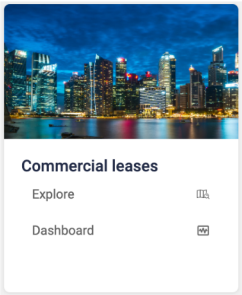
Tailor the data structure and services to your organization and contract type

Maintain data structures by contract types

The flexibility of our data structures allows us to build the pathways you need to manage your contracts regardless of their specificities.

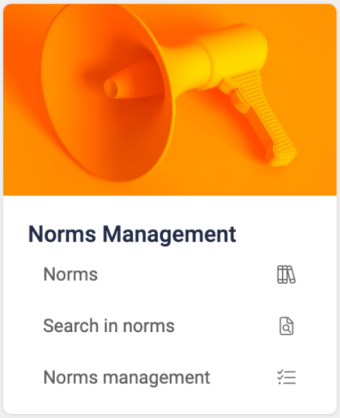






Litigation management in project mode

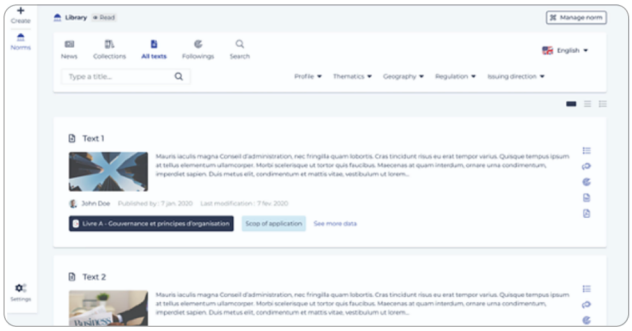
Legalcluster allows you to manage your litigation with all the people involved internally and with your counsels: Follow-up of the procedure, document management, risk assessment, activities, follow-up of milestones, alerts & notifications, reporting, ERP & CRM integration

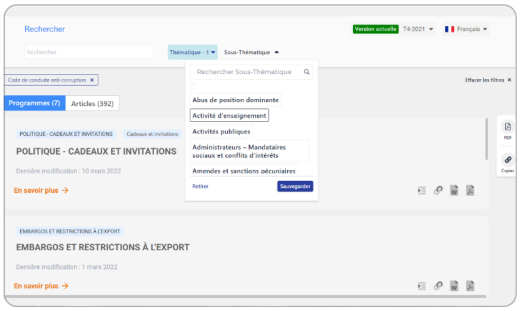


Structure, manage and distribute your compliance programs and policies

Structure a rich and effective body of standards

- A fluid and homogeneous reading of the entire normative corpus.
- Hierarchical, themed texts enriched with metadata.
- Possibility of versioning and comparing versions and languages.
- Texts can be exported in pdf and Word for ease of use.



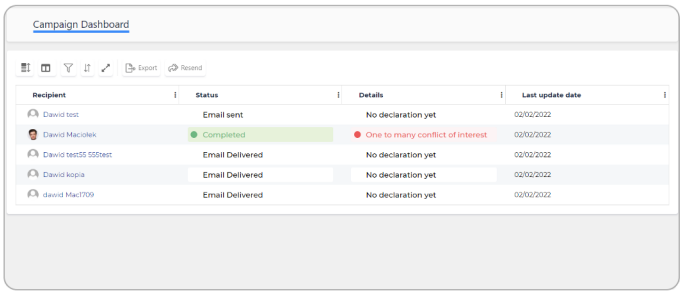


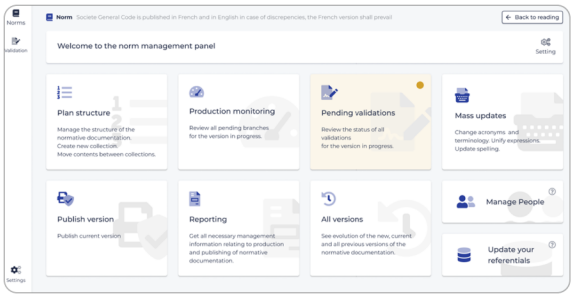
Access operational data at all times

- Perform a matrix search of your entire compliance documentation
- Automatically generate your thematic search records
- Share "dynamic" links to access always up-to-date references!

Broadcast your programs and policies

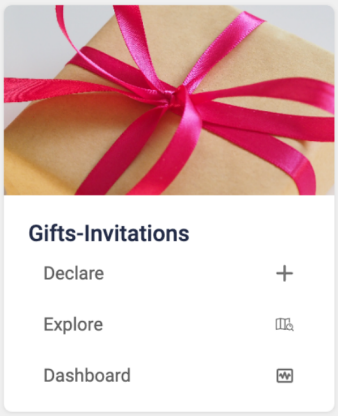
Launch campaigns to ensure that every employee is aware of program and policy changes that affect them or to expedite a reporting process.





Manage your normative corpus with our advanced functions

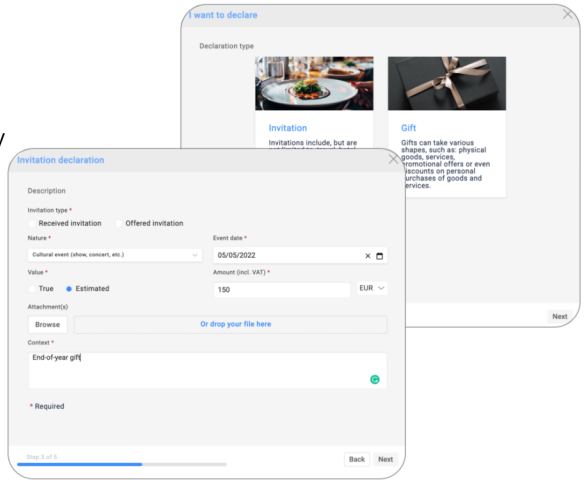
Your platform is a tool for operational management of your content.
Legalcluster gives you access to advanced features to manage your repositories, your standards hierarchies, your validation and publication processes, etc.

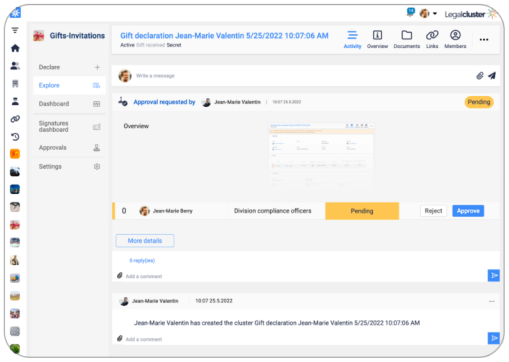


Manage your gift and invitation declarations in accordance with the Sapin II law

Declare in a few seconds

The reporting forms allow you to quickly fill in the necessary information according to your programs and policies:
- Gift/invitation (date, amount, nature, etc.)
- Person(s) and/or entity(ies)
- Amount of the gift/invitation or its value
- Date of gift
- Quality of third party(ies), etc.



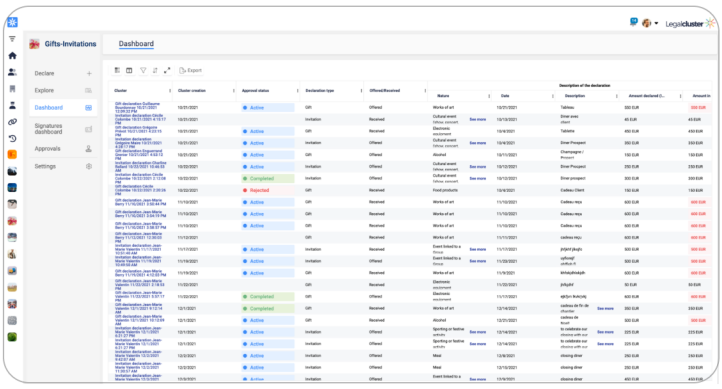


Process declaration in collaborative mode

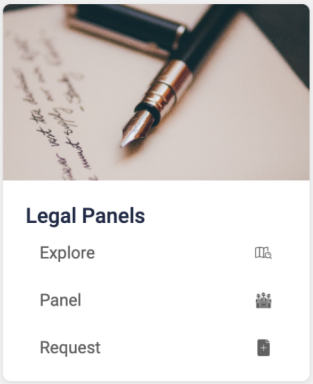
Everything necessary for the end-to-end processing of the declaration is gathered in a "cluster" and made available to the persons concerned who are automatically invited (declaration data, supporting documents, approval services, workflows)
The life of the declaration is traced in the activity of the cluster as a real red thread to facilitate auditability!
The subjects of attention are automatically highlighted for efficient processing.

Consolidate data for easier processing

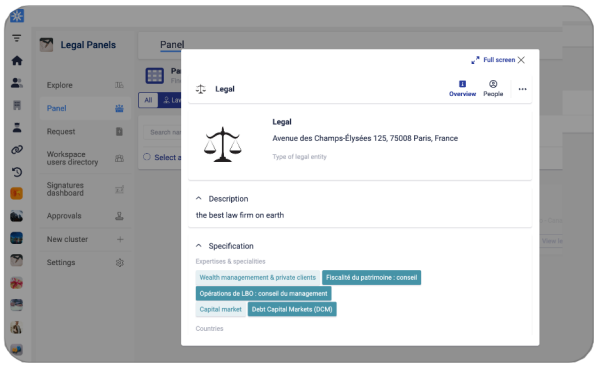
All data from declarations and services is consolidated in dashboards that facilitate processing and reporting by the people in charge.
Points of attention are highlighted to facilitate risk management.



Address all declarations related to the Sapin II law



Optimize the management of your legal panels

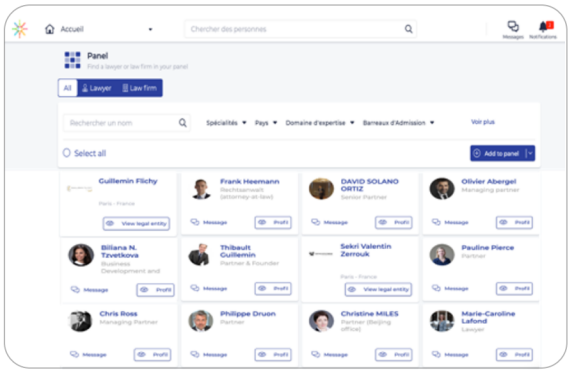


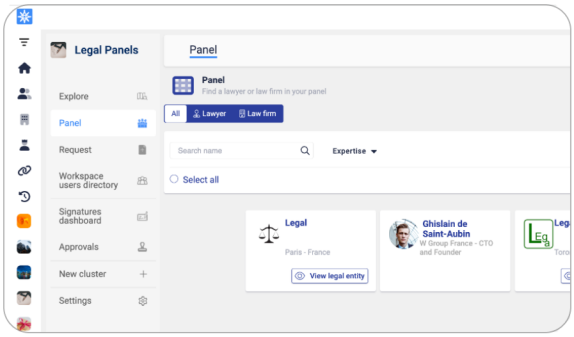
Map your legal communities

Manage your third parties in a platform logic.
Each third party has a real dynamic "profile" that can be used throughout the platform.
Entrust screening tasks to a professional with our APIs to our partner solutions.

Define and structure your legal panels

- Organize your panels, by lawyer and by firm, by country, by expertise
- Structure your repositories and search filters for easy access to your lawyers anywhere in the world
- Manage access to your panel within your organization to work in a subsidiary manner
- Create your legal community





Centralize and consolidate panel management

- Request a quote from your lawyers
- Get several offers, compare them and choose the one that best fits your expectations and budget
- Save time by centralizing your requests and answers
- Manage document signatures
- Apply your purchasing policies
- Manage the compliance procedures of your customer / supplier relationships

Increase the legal security of your organization

Legalcluster's DNA, allows you to increase the security of your organization within your ecosystems: Control your risks, Reduce your costs, Secure your processes.

Legalcluster according to our clients

"After a few tweaks, Legalcluster allows us to centralize requests and consolidate related data, while saving us valuable time in processing, analyzing and reporting. All of this on a group-wide basis!"
Véronique Hanc, Group Compliance Officer, Verallia Group

"We were impressed with the vision and ability of the Legalcluster teams to accurately identify our needs and define a goal."
Stéphane Catoire, CEO, Equitis

"Legalcluster has allowed us to increase our efficiency and productivity! Key assets for a law firm like ours "
Jérome Assouline, Associé, Cabinet SVZ

"We see Legalcluster as a particularly credible and promising partner in both its technological and transformational dimensions in serving legal and compliance functions."
Anthony Virapin, Director of the Startup & ISV Recruit Business Unit , Microsoft

"Legalcluster brings new solutions to meet the challenges that digitization poses to our legal functions."
Sandrine Asseraf, Directrice Générale, Groupe Webhelp

With Legalcluster, legal, ethics and compliance functions become a booster of your sustainable growth

Environment: Legalcluster reduces the carbon footprint of your legal and compliance teams by up to 90%

GRI: Section 305
ISO 26 000: sections 6.5.4 & 6.5.5

> Collaborative spaces centralize communication and information sharing, limiting the use of email.

> As a Microsoft Gold Partner, the Legalcluster platform uses a carbon neutral architecture based on MS Azure.

Social: Legalcluster values each employee as a member of a virtuous community, the foundation of any sustainable growth strategy

GRI: sections 403, 404, 410
ISO 26 000: sections 6.4.6 & 6.4.7

> Legalcluster optimizes the distribution and application of compliance policies and programs.

> The platform gives each employee one-click access to what they need to act securely and in compliance

Governance: Legacluster enables governance of organizations, ecosystems and data

GRI : sections 205, 206, 308, 414
ISO 26 000: sections 6.2, 6.6, 6.3.3

> Legalcluster facilitates the management of subsidiaries, shareholdings, delegations of authority
