

CIPA

CIPA : THE DIGITIZED TOOLS FOR AUDIT & PROBLEM SOLVING

Industry X.O
think digital
SMART SOLUTIONS FOR SMART FACTORIES

Why CIPA?

The operational management solution for Industry 4.0

Boost the effectiveness of your teams and improve your industrial performance.

Lack of digitization hinders operational performance

In the era of Industry 4.0, the tools for organizing performance management on the factories are the same as they were 30 years ago. The information that is escalated during the daily rituals is the backbone of the smooth running of the shop floor. However, it is not captured, not recorded and insufficiently shared between the different levels.

CIPA Key features

Centralize all your operational data

Field audits, problems, action plans and indicators are centralized in a single tool to build an enriched and collaborative field knowledge base.

Connect your teams and speed up problem solving

Action plans are completed on time and teams save 50% of their time in daily routines.

Operational excellence, the heart of your approach

Get the whole factory on board thanks to dynamic visual management and standardized methods (SIM, QRQC, Gemba, etc.) which encourage ownership of the approach and the commitment of production teams.

Improve performance through data analysis

With our analytical tools, you can easily identify the most recurring problems, detect performance gaps as early as possible and make better decisions day-to-day.

CIPA High-Tech solution

Customization

Adapt your dashboards to the specific needs of your organization.

Mobility

Field-specific: smartphone and tablet compatibility, offline operation.

Integrations

Open API for integration with your existing tools - ERP, MES, CMMS, Business Intelligence.

Security & Privacy

State-of-the-art data protection and guarantee of compliance with requirements GDPR.

Training

Continuous support for your teams, on site and remotely.

CIPA DESIGNED FOR YOU

Floor Meetings

Visual management
Call, agendas
and minutes

Continuous monitoring

Collaborative action plans
Problem sharing and escalation, inter-team
collaboration

Analyses

Process indicators (Kamishibai, resolution time,
recurrence of a problem)
Business and operational indicators,
visualization tool

Routines

Gemba, Audits,
Products & raw materials Inspections
preventive maintenance, OK start

Problem solving

Lean problem-solving tools (5Why, root cause
analysis, 8D, 4D, Ichikawa)
Actions follow-up

CIPA Functionalities

A collaborative and intuitive solution for your teams

From the shop floor to the boardroom, all your employees share a common and easy-to-use tool dedicated to managing your operational performance.

An intuitive and easy to deploy solution that empowers your teams and enhances the value of your company's knowledge.

Embed all plant teams (production, support, management) in customizable interface, accessible on mobile, tablet, touch screen or desktop that integrate all the tools of your operational excellence system:

- Action plans
- Field trips and audits
- Problem solving
- Visual management
- KPI dashboards connected to your systems

Capture information in real time

Let your teams signal new operational issues directly from the shop floor, either spontaneously or via scheduled audits and Gemba.

Collaborate on an action plan

The field managers involve the employees and teams concerned, draw up an action plan and follow it up until the subject is closed.

CIPA Functionalities

Run seamless daily rituals

Your teams are informed prior to the daily meeting and quickly deal with the various topics on the agenda, going straight to the point.

Visual management & KPIs

Each team integrates its performance indicators into its workspace, monitors them day-to-day and reports on current operational issues.

Measure. Improve. Repeat.

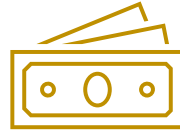

Your continuous improvement projects are prioritized based on real data – most recurring topics, performance gaps detected, etc.

Connect your information systems

CIPA can be easily integrated with your tools (ERP, MES, CMMS, Business Intelligence) to retrieve key information (KPIs, etc.) or enrich your systems with your field data

The right investment

Fast ROI

Return on investment reaches on average after 09 months

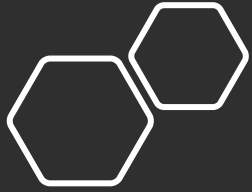

Cost reduction

Improve your efficiency by 3 to 5%.
