# ShareID
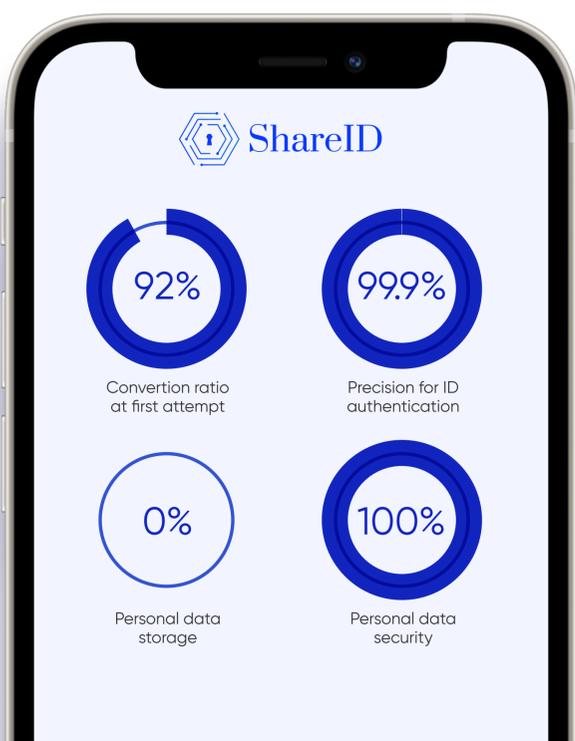

THE WORLD'S ONLY AUTHENTICATION SOLUTION BASED ON THE OFFICIAL IDENTITY*

ShareID is an Authentication-as-a-Service solution tied to government-issued IDs. An initial capture of the user's ID document and face will allow ShareID to issue a validated reusable digital identity without any storage of personal data nor biometrics. During the following interactions, a simple smile will enable the user to prove his identity in real-time.

To best protect your customers and partners at each operation
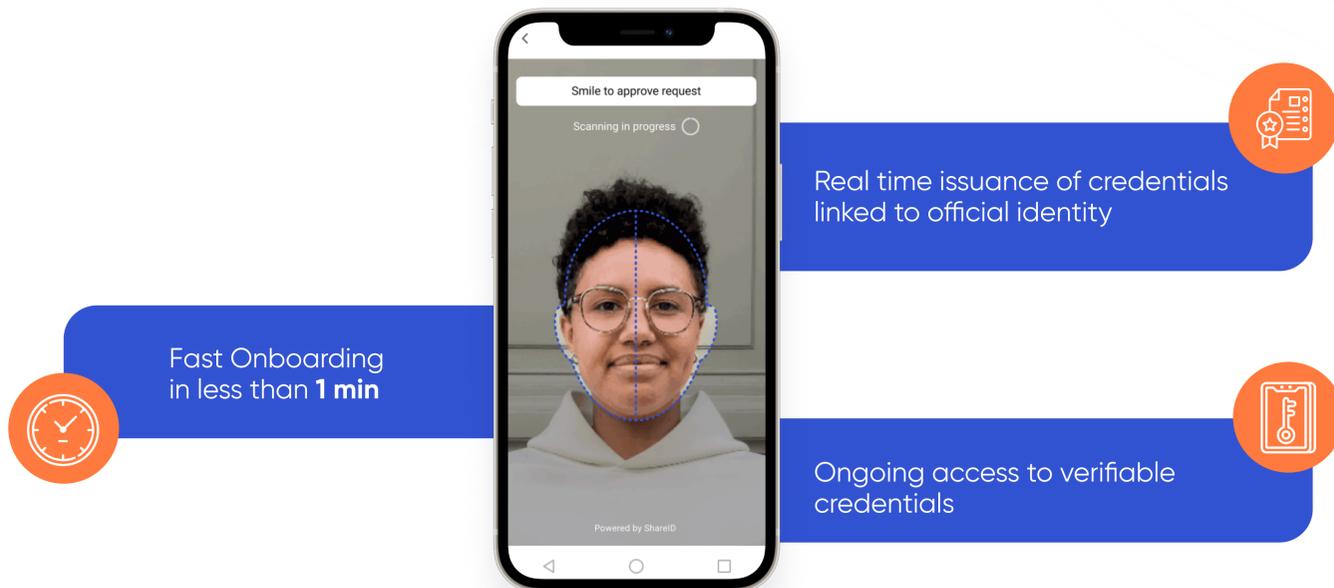

Trust enabler

Linked to official ID

Frictionless

ShareID leverages its partnership with the French military police and its patented technology to provide the next generation of multi factor authentication.

Powered by ShareID

Real time issuance of credentials linked to official identity

Fast Onboarding in less than **1 min**

Ongoing access to verifiable credentials

We guarantee in real-time that the person accessing the account is the one who was initially onboarded through our authentication technology based on the official identity.

Safe and Secure thanks to our top notch AI algorithms trained on hundreds of thousands of fake and authentic documents through our partnership with the local military police.

User Centric to create a seamless and frictionless user experience at each operation that requires an ID document presentation.

Regulatory Compliant with international laws for personal data protection and privacy as we **NEVER** store the users personal data or biometrics.

Available on Android, iOS and Web

Integration in 48H
