

Empowering Business and security through

We understand your Challenges

Technology is never an end in itself, but a lever to enhance your performance and security.

You need a reliable and secure information system that aligns with your business objectives.

You are looking to anticipate risks, ensure business continuity, and control costs while remaining agile and compliant with regulatory requirements.

What we Offer

Cloud & Infrastructure

Modern, scalable and secure IT foundations.

Cybersecurity

Complete protection of your data and operations, from risk audits to real-time threat detection.

IT Strategy & Consulting

Expert guidance to align your IT with business goals and drive digital transformation.

Governance & Compliance

Support with regulatory alignment (GDPR, ISO 27001) and long-term risk control.

Managed Services

Supervision, maintenance and MCO to ensure 24/7 system performance and availability.

Why IPSYLON

 **A Team of Certified Experts**
(ISO, Microsoft, ANSSI...)

 **Tailored Support, Close to the Field**
We stay close to your teams and realities to deliver relevant, operational solutions.

 **A Culture of Results, Transparency and Pragmatism**

Our commitment is measured through real, visible impact.

 **Constant Monitoring of Emerging Threats and Technologies**

We ensure your systems evolve as fast as the risks.
