

HexaGuard

Cyber Net Safe

**YOUR PROTECTIVE SHIELD
AGAINST CYBER ATTACKS**

Anticipate, secure, defend.

WWW.HEXA-GUARD.COM

Our commitments

"At HexaGuard, we believe cybersecurity should no longer be reactive, but a proactive strategy.

By combining cutting-edge technology, offensive intelligence, and a strong commitment to sovereignty, we are building a trusted ecosystem every day—dedicated to supporting critical businesses and institutions.

Our commitment is unwavering: to protect innovation, ensure resilience, and defend essential assets in a constantly evolving digital world."

David ELFASSY

President.

Our commitment, your safety

At HexaGuard, we are committed to defending our clients' interests with excellence, rigor and innovation. Our fundamental commitments structure each of our interventions:

1. Proactive and Sovereign Protection

- Anticipate threats with offensive and targeted cyber intelligence.
- Comply with European standards in terms of security and confidentiality.

2. Tailor-made solutions for Critical Environments

- Adapt our offers to sensitive sectors: banking, insurance, defence, health, operators, industries.
- Deploy custom modular devices, without a standardized approach.

3. Offensive Expertise for a Strengthened Defense

- Simulate real-world attacks to test and strengthen your defenses.
- Produce strategic audits oriented towards actions and tangible results.

4. Cutting-Edge Technologies and Trusted Partners

- Select and integrate only proven solutions (KELA, Flowsec, SlingScore, AiFort, UltraRed, ...).
- Ensure continuous compliance with regulatory frameworks (DORA, NIS2, GDPR).

5. Confidentiality, Independence and Full Transparency

- Protect your critical data with absolute discretion.
- Act in your exclusive interest, without commercial dependence or technological compromise.

6. Human, Expert and Available Support

- To support you with experienced and dedicated contacts.
- Transform technical issues into strategic levers for your continuity and resilience.

HexaGuard is committed to being your strategic partner for sovereign, offensive and sustainable cybersecurity.

Our solutions

Cyber Threat Intelligence

- Surveillance du dark web, forums clandestins, marketplaces ransomware
- Detection of compromised network access, exposed credentials, data leaks
- Behavioral analysis of threat groups
- Strategic intelligence by sector (finance, health, energy, etc.)

Third-Party Risk Assessment and Cyber Score

- Predictive scoring of suppliers, partners and subsidiaries
- Detection of exposed vulnerabilities and historical cybercriminals
- Dynamic supply chain risk mapping

AI Model Security (LLM Security)

- Red teaming on generative AIs (detection of jailbreaks, hallucinations, data leaks)
- Validation of the robustness and compliance of internal or external AI models
- Continuous monitoring of exposed models via API or cloud

Offensive Cybersecurity and Pentests

- Advanced penetration testing (infrastructure, web, cloud, network)
- Red Teaming (Real Attack Simulation)
- Technical and organizational security audits
- Simulation of targeted attacks for critical environments

Next-generation DDoS protection

- Multi-tenant cloud defense against volumetric and targeted attacks
- Automated real-time mitigation
- Designed for telecom operators, banks, governments and data centers, large enterprises

Why choose HexaGuard?

HexaGuard was created to address a strategic imperative: to provide critical organizations with offensive, predictive, and sovereign cybersecurity tailored to the growing complexity of cyber threats.

Its mission is to combine human expertise, high-quality intelligence, and cutting-edge technologies to anticipate, neutralize, and transform digital risks into competitive advantages for its clients.

Our Benefits

Threat Intelligence

- Cybercriminal monitoring on the dark web, Telegram, underground forums.
- Proactive detection of compromised credentials, access to sell, and phishing campaigns.
- Predictive industry analysis of threat trends targeting your critical activities.

Attack Surface Protection (CTEM)

- Automated mapping of your assets exposed on the Internet and Cloud.
- Intelligent prioritization of exploitable vulnerabilities (critical CVEs).
- Continuous monitoring and rapid corrective actions to reduce your exposure.

Security of Artificial Intelligence Models

- Generative AI protection against prompt injection attacks and hallucinations.
- Validate the robustness and compliance of your internal or cloud models.
- Continuous monitoring of AI risk exposure in critical environments.

Offensive Cybersecurity and Penetration Testing

- Realistic pentests on networks, applications, cloud and industrial infrastructures.
- Red Team simulations adapted to the current techniques of attackers (APT, ransomware).
- Strategic reporting oriented remediation and hardening of systems.

Third-Party Risk Assessment (Supply Chain)

- Attribution of predictive cyber scoring to critical suppliers and partners.
- Detection of security vulnerabilities on third-party ecosystems without intrusion.
- Improvement of your supply chain resilience according to DORA and NIS2 standards.

Network Protection & DDoS Defense

- Deployment of cloud-native DDoS shields adapted to ISPs, banks, defense, healthcare.
- Real-time detection and automated mitigation of volumetric attacks.
- Guaranteed availability even under attack, compliance with critical SLAs.

HexaGuard

In a few figures

1 European & Worldwide Coverage

A presence in France and Europe with critical players: banking, insurance, health, governments, industry, the military, but also SMEs, mid-caps and large companies.

10 years of expertise

in offensive cybersecurity and strategic defense.

15 partnerships

with the most prestigious, advanced and innovative partners.

100 million

Credentials protected via cyber intelligence

Customer Support

24/24
7/7

Cyber attacks don't wait

Continuous monitoring of emerging threats and access to the secure darknet
