

Secure cloud storage, sharing, and docs

Keep your data compliant and your business running smoothly.

Small and mid-sized businesses face increasing pressure to share data securely, adhere to evolving privacy regulations, and maintain client confidentiality — all without hindering operations. The financial stakes are high: The [average cost of a data breach](#) in 2024 reached \$4.88 million. Meanwhile, GDPR violations can lead to [fines of up to €20 million](#) or 4% of annual revenue, whichever is higher. Yet relying on mainstream tools often means compromising on privacy, compliance, or control. **That's where Proton Drive comes in.**

Proton Drive for Business is a secure cloud storage solution built for organizations that prioritize data protection, regulatory compliance, and privacy-first workflows. It's ideal for industries like:

- **Legal:** Maintain attorney-client privilege and securely exchange sensitive case files, contracts, and evidence.
- **Healthcare:** Protect patient records, comply with HIPAA, and securely share across care teams.
- **Finance:** Safely manage portfolios, audits, and client documents while meeting GDPR, ISO 27001 and SOC2 type II requirements.
- **Media and journalism:** Share investigative content without exposure to government or third-party surveillance.
- **Nonprofits:** Securely store donor information, grant proposals, and operational plans while enabling safe, remote collaboration.
- **Digital consultancies:** Protect client data, intellectual property, and project files with privacy-first tools that streamline collaboration and compliance.

Average cost of a data breach:

\$4.88m

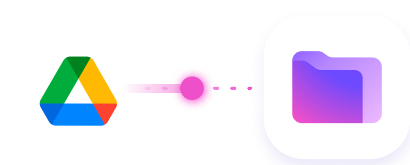

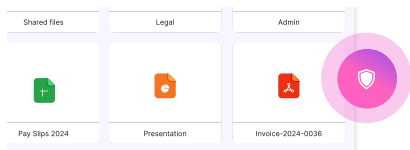

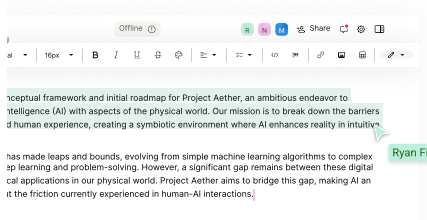

GDPR fines: up to

€20m

or

4% of revenue

Key benefits

Collaborate securely without compromising control

Share client files, contracts, and sensitive business documents with full end-to-end encryption. You control who can access what. Set passwords, add expiry dates, or revoke access anytime.

Protect all your business data

Plans come with 1 TB of storage allowance per user, giving your team enough space for all their files and docs. You can always add more storage later if you need it.

Simplify compliance across industries

Proton Drive supports GDPR, HIPAA, and ISO 27001 compliance out of the box, and has been successfully audited for SOC 2 Type II. There's no need for custom configurations or third-party tools, helping you meet regulatory standards with minimal effort.

Minimize data breach risks with privacy by design

Files are encrypted on your device before upload, and only you and your authorized collaborators can access them. Even Proton cannot view your data thanks to our zero-access architecture.

Replace Big Tech tools with secure, independent alternatives

Proton Drive offers the functionality teams need — sharing, real-time collaboration, and file recovery — without exposing your business to surveillance or vendor lock-in.

Build trust in your field

Show your clients and partners that your organization takes data protection seriously. Using Proton Drive demonstrates a commitment to privacy and security.

Key features

Security and privacy

- **End-to-end encryption:** Files are encrypted on your device before upload and can only be accessed by you and those you authorize.
- **Zero-access model:** Proton cannot access, read, or decrypt your files — ensuring complete privacy by design.
- **No AI training:** Your data is never used to train machine learning models — preserving privacy and intellectual property.
- **Protection against data loss and ransomware:** Easily restore clean versions of files if they're ever compromised, so your business recovers quickly and stays operational.
- **SOC 2 type II audited:** Externally verified to meet trusted security standards

Collaboration and sharing

- **Stay in control of shared files:** Send files via secure public links or email invites with access control, passwords, expiry, and monitoring.
- **Invite others to collaborate:** Share entire folders with edit access, allow clients or partners to upload files directly to your Proton Drive — no Proton account needed.
- **Real-time collaboration in Proton Docs:** Work together in documents using commenting features, suggesting mode, and get email notifications.
- **Store and organize without limits:** Upload large files and detailed folder structures without size or format restrictions, as long as they stay within your storage plan.
- **Work anywhere:** Access, upload, share, and manage your files across web, desktop (Windows, macOS), and mobile (Android, iOS).

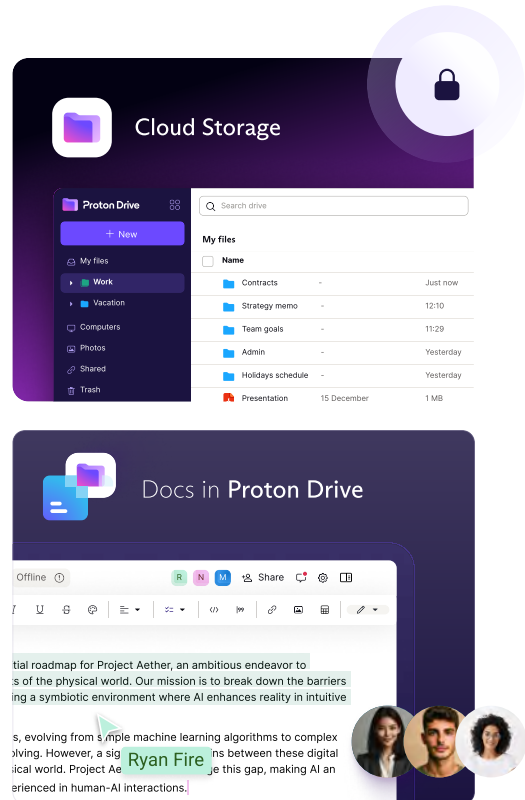

Compliance and trust

- **ISO 27001 certified:** Proton Drive meets the internationally recognized standard for information security management.
- **Regulatory compliance support:** Built to help you comply with GDPR, HIPAA, and ISO 27001 requirements.
- **Data hosted in Switzerland:** All files are stored under Swiss privacy laws (among the strongest in the world), providing additional legal protection for your data.
- **File versioning and recovery:** Restore earlier versions of files. Proton Drive retains up to 10 years of version history to support audits, accidental edits, and long-term data retention.
- **Open source and audited:** Proton's codebase is open source and audited by independent security specialists.
