

GO NATURAL!®

PEA HUSK CLUMPING CAT LITTER

Catit Go Natural® pea husk litter is wonderfully dust-free, and clumps tightly and quickly, so less litter is used and a box lasts you longer. As the litter contains plant-derived particles, it feels nice and soft to cats' sensitive paws. Perfect for a carefree litter box routine!

Previous design

(*) Based on a single cat using an average size traditional litter box.

No more tracking and dusty paw prints

Thanks to its dust-free qualities and minimal tracking, Go Natural® pea husk litter remains within the confines of your cat's litter box. You'll be delighted to stop spotting your cat's dusty paw prints around the house.

Special refined pellet size for 300% absorbency

Catit Pea Husk Litter ingredients are mixed and compressed into tiny pellets of 1.5 mm in diameter, which is only half as thick as most other pea husk litters. The pellets can absorb 300% or about 3 times their own weight in cat waste, thanks to their unique diameter.

Easy cleaning and scooping

This pea husk litter clumps gradually and firmly, formulated exactly right to not stick to your cat's litter box. The smooth litter pellets glide right through the scoop, which makes scooping easy.
