

## Tailored & scalable optimization modules for operations planning

### LEVERAGE PRESCRIPTIVE ANALYTICS FOR DECISION MAKING

Find the best solution among billions of options for your **routing & scheduling problems** with a tailored optimization engine embedded in your software product or your IS.

Atoptima's unique comprehensive solver is designed to offer a systemic optimization, building synergies between decision levels, handling any specific constraints, and ensuring coherence between short-term and long-term.

#### AUTOMATE

Best decisions in seconds

#### INCREASE PRODUCTIVITY

Cut operating costs by 30%

#### IMPROVE YOUR QOS

Deliver fast and deliver right

#### ENHANCE YOUR OFFER

New features and services

### UNMATCHED PERFORMANCE

- ▶ Optimizing tactical and operational decisions jointly (rather than separately) to bring 3x more synergies.
- ▶ Combining optimization methods built on our 25+ years of scientific research to provide the state-of-the-art.
- ▶ Exploiting our deep knowledge of routing and planning algorithmic strategies to deliver short response time.

### SEAMLESS INTEGRATION

Get the very best of optimization intelligence integrated in your system with **cloud-based OEM software modules**.

Atoptima provides tailored but dev-free solutions. This unique positioning arises from a deeptech technology encapsulated in the form of a software library to be assembled into ad-hoc applications.

### WHY ATOPTIMA?

- ▶ Most complex decision making fully addressed
- ▶ No constraints left out
- ▶ Response time 30x faster than standard tools
- ▶ Agile, secured, and cost-effective integration
- ▶ Qualified support from Operations Research experts
- ▶ Attractive and transparent licensing
- ▶ « CIR » and « DeepTech » certifications
