

## Risk Center

Ivalua's Risk Center provides a complete contextualized picture of supplier risk, including critical sub-tier suppliers in a multi-tiered risk model. This comprehensive view combines business specific information from risk & performance assessments with operational and external risk data, and a central dashboard view prioritizes actions based on alerts and analytics. With Risk Center, Ivalua provides clients the tools necessary to continuously monitor risk in their supply base and rapidly act upon and manage those risks.

**A central console  
providing an integrated  
and actionable view on  
risk**

### Supplier relationships are more important than ever

Leading organizations recognize that supplier relationships are critical but failing to assess, monitor and mitigate supplier risk can be detrimental.

### Value of Ivalua's Risk Center:

- ✓ **360° View of Risk**  
Obtain a complete picture of risk across multiple dimensions and contextualize it with performance, transaction, sourcing, contract, and spend data.
- ✓ **Layer in Data from 3rd Party Ecosystem**  
Integrate with various 3rd party risk data providers to meet business needs with out-of-the-box connectors or via our open ecosystem approach.
- ✓ **Manage Supply Chain Risk**  
A clear understanding of your sub-tier network to help assess and manage risk across multiple tiers of the supply chain.
- ✓ **Scalable & Agile Solution**  
Risk Center is a scalable solution and will continue to support clients as their program evolves and matures, and as risks increase in type, quantity, and impact.

## Ivalua's Risk Center enables:

- ✓ **A 360° Visibility of Supplier Information**  
Obtain a 360-degree visibility across all supplier information, risks, and activity within the source-to-pay life cycle.
- ✓ **Analysis of Multiple Risk Factors**  
Analyze and evaluate supplier risk across multiple risk dimensions, and tailor risk elements to meet business requirements.
- ✓ **Risk Analyses at the Supplier or Project Level**  
Track risk at both supplier and individual contract level risk using qualitative and quantitative risk data.
- ✓ **Incorporation of 3rd Party Risk Data**  
Incorporate 3rd party risk data providers and aggregate different external risk data along with internal risks for a full risk picture.
- ✓ **Notify Stakeholders with Risk Alerts**  
Establish business rules, metrics, and alerts to ensure teams are notified about high risk suppliers early in the process or as risk conditions appear or statuses change.

## Risk Center Key Features:

- ✓ Risk Center Dashboard with a comprehensive view of risk and risk related actions across the supply base.
- ✓ Individual supplier risk scorecards leveraging a variety of risk elements.
- ✓ Out-of-box connectors with third party data providers such as Dun & Bradstreet, EcoVadis, riskmethods, and GRMS.
- ✓ Inclusion of supplier child hierarchy risk ratings along with any connected lower tier sub-suppliers.
