## Ivalua offers Modules for the full Range of Source-to-Pay:

- **Fast amortization** with flexibility unmatched by the competition thanks to **fast supplier qualification**, **customizable user interfaces** and **fast implementation**.
- **A uniform platform** (user interface, data, workflows) based on a code and a database enables **maximum automation** and **optimal evaluability** over the entire S2P process.
- Ivalua offers a **private cloud-based** solution that meets the **highest security requirements** thanks to its unique multi-instance architecture.

# We support you in your Transformation towards a complete Digitalization of the Procurement Process (S2P)

# The Digital Transformation of Purchasing Processes offers various Advantages. The Implementation ensures a high ROI

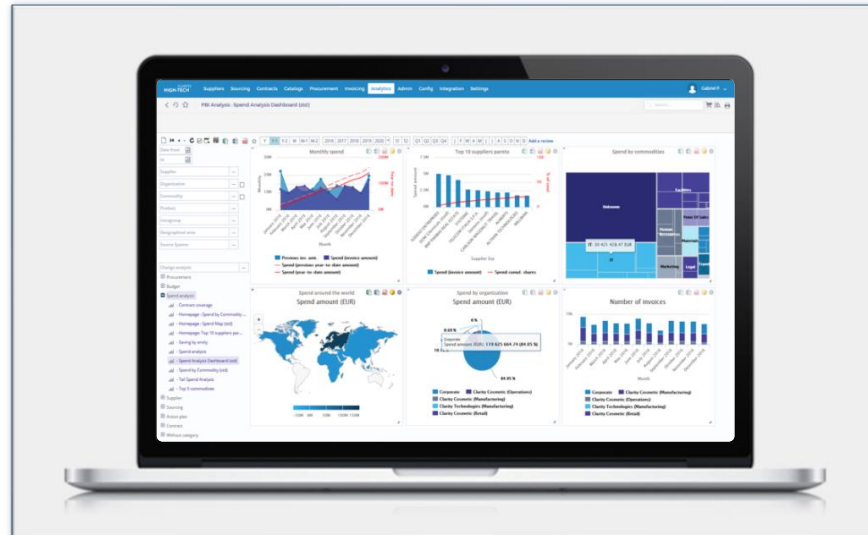

## Reduction of Processing times

... by ordering online from a standardized, checked catalog at negotiated conditions or using a standardized tender template.

## Price Reduction for Supplier Material

... thanks to clear and transparent tenders and standardized, checked catalogs, orders can be placed from qualified suppliers on negotiated terms.

**An e-procurement solution frees your purchasing department from annoying routine tasks. This means that important tasks such as supplier evaluation or the negotiation of framework contracts or offers can be taken over!**

## Transparency & Compliance

... by automating the ordering process and archiving all important information. All purchasing processes are always fully traceable and transparent.

## Avoidance of Errors and Risks

... through preconfigured interfaces in your ERP system that are fully integrated. (Supplier master data, cost centers, G / L accounts and product groups).

# Our Ivalua Team of Experts currently consists of qualified Consultants with extensive Project and Industry Experience
