

INNOVATIVE DIGITAL SOLUTIONS

OJC SOFTWARE offers multi-portal websites with advanced features. These high-value management websites and applications are accessible on all types of devices, thanks to a single and versatile platform: «OJC Framework».

OJC Framework was designed to support the creation or **collaborative websites** and **management applications**, in order to meet client needs where other solutions fall short. OJC Framework offers the best of both worlds:

WEBSITES

OJC Framework allows advanced content management, edition and publication, as well as unlimited graphic and UI freedom, in order to always match your visual identity.

APPLICATIONS

A robust and modular architecture, with a full set of built-in advanced features that permits the rapid creation of powerful applications perfectly suited to your needs and processes.

MULTI-PORTAL WEBSITES THAT ADAPT TO YOUR NEEDS

All our projects are designed as **multi-portal websites**: combining the ease of publication of a CMS (Content Management System) with the power of management applications, our solutions allow the publication of content or functionalities on one or more centrally administered websites (intranet/extranet, Multi-lingual, etc.). All your **portals are synchronized**, thus allowing you to save time in integration and publication.

- A simple structure with **intuitive ergonomics**, built in a phased design with your graphic strategies, to maximize adoption by your users
- Our solutions integrate with the components of your existing Information System
- Our technology infrastructure enables rapid **time to market** and **maximum scalability**

EASY SET UP OF ADVANCED FEATURES

All the features we offer can be integrated with a **management of administration rights per user and per group.**

WEB AND MOBILE APPLICATIONS

Publication
Application ecosystems

MULTI-PORTAL WEBSITES

A single interface
Several websites
All your portals synchronized

ADVANCED FEATURES

Video
