

# Shared Space Missions

Simple, fast, cost-effective & sustainable missions to all orbits

We are experts in shared space missions. Whether you are deploying a fleet of sensors or seeking to manage multiple payloads on a single platform, we are your partner **from integration to operations**.

With our **flight-proven universal interface** solution, we cover applications ranging from secondary payloads to in-orbit services.

Contact us to make your missions simpler, faster, & more sustainable !

## PAYLOAD HOSTING

### Deploy smoothly your Payloads to Orbit

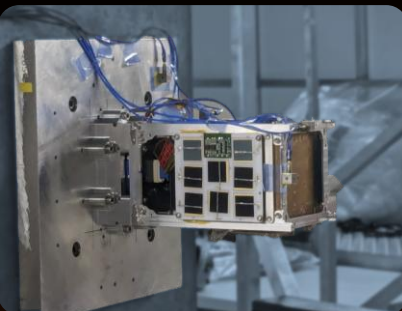

For payload developers & operators looking to fly single or fleets of sensors for IOD/IOV, Telecoms, Earth Observation,...

## SATELLITE SHARING

### Make your platform multi-mission

For satellite manufacturers & operators facing multiple sensor integration or looking to add a revenue stream to their missions with payload hosting

## IN-ORBIT SERVICES

### Replacement Units for evolutive missions

For innovators developing servicing solutions and looking for off-the-shelf Orbital Replacement Units to repair or upgrade orbital assets
