# NORIT® Activated Carbon for purification of wastewater

We are a leading global supplier of activated carbon for the purification of wastewater from wastewater treatment plants, landfill leachate systems, and contaminated groundwater. Our activated carbon products play a critical role in wastewater treatment, which improves environmental quality and protects public health by keeping our rivers and lakes safe for fishing, swimming and as a source for drinking water.

We have developed a family of activated carbon products to help overcome the challenges posed by industrial and population growth and agricultural runoff from fertilizers and pesticides that strain the quality and health of our water bodies.
