

ADVANCING OCEAN PREDICTION SCIENCE FOR SOCIETAL BENEFITS

## Scientists for Ocean Literacy

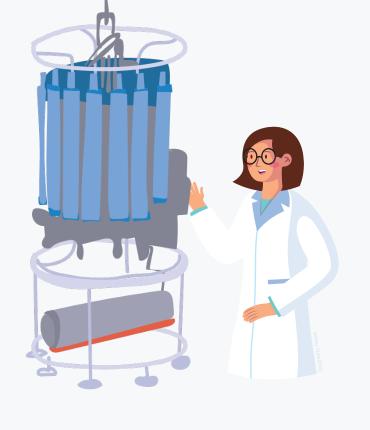

**Ocean literacy** is essential for the **UN Ocean Decade** and the implementation of **Agenda 2030**. It's not just about science communication—it's about multi-stakeholder engagement.

Ocean scientists need to be empowered to engage more effectively with the public. Yet, their engagement work often

goes unrecognised in their careers. It's time to change that!

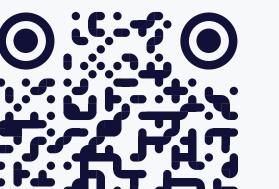

## Empowering scientists as ocean advocates

**Ocean literacy** is about transformation, not just information—it helps guide society and the economy toward sustainability. It can make science more **inclusive** and **diverse**. And it can help **turn the ocean we have into the ocean we want**.

**#Scientists4OceanLiteracy** 

## making a difference of #EuroGOOS\_OL

Support ocean literacy to empower scientists, engage communities, and drive the change we need. As a scientist, join public engagement efforts. As a science manager or funder, **recognise the transformative power of ocean literacy in moving from ocean knowledge to ocean action.** 

**2021** United Nations Decade of Ocean Science for Sustainable Development

scientists for Ocean Literacy is a UN Ocean Decade Action led by EuroGOOS and rolled out by the EuroGOOS Ocean Literacy Working Group
