# OFFICE BASED SURGERY

Discover the **airinspace®** solutions for day surgery and office based surgery from the simplest to the most sophisticated. Taking into account your risk analysis, choose the most adapted one to your requirement.

## Improve air quality: Use an air purifier

This is the simplest solution. By installing an air purifier close to the examination table, you improve air quality at the bedside. Air is purified through our air treatment unit by recirculation.

## Create of a positive pressure area: Simple **BIOCAIR™**

Our **PLASMAIR™** or **HEPA** units are positioned outside the room. They blow air across the wall to create a positive pressure and ISO 7 air quality.

## Built a small operating room such clean room: **BIOCAIR™** concept

Equipped with clean room walls, and controlled leak rate door, this **BIOCAIR™** creates a real protective environment with ISO 5 air quality in a hospital or medical practice.
