

# + Our bodywork + semi-trailer equipment

+ RELIABLE  
+ EFFICIENT  
+ SECURE  
+ AESTHETIC

- 1 HLE (high-yield point steel) frame**  
Improved stability by lowering the centre of gravity
- 2 Compartments free of internal obstruction, no hydraulic lines**
- 3 Modular rear storage compartment**

**Tank cladding** (gangway, vertical auger, tank bottom)

**Drive** via the tractor's PTO unit or by an auxiliary engine

- 4 New generation, large-diameter scraping auger**  
(or belt conveyors)
- 5 "All in silo" cleaning**  
Automation of controls and/or securing of the delivery

#### POSSIBLE FRAME OPTIONS

Galvanizing, twin axles, lift axle(s), directional axle(s), etc.

#### POSSIBLE OPTIONS FOR YOUR EQUIPMENT

Pneumatic equipment, unloading auger, receiving pit unloading, back-up cameras, publicity, etc

# + Our bodywork + semi-trailer equipment

## RELIABLE

Frame designed for exceptional strength (HLE steel, off-road axles)

High-end hydraulic and electrical elements to ensure sustained operation of mechanical and pneumatic equipment

## EFFICIENT

Rugged, custom-designed tanks adapted to your needs: length, height, rear storage, and number of compartments, type of axles

Exclusive scraping augers offering an increased payload and volume advantage (chain conveyors adapted to difficult products are also possible)

Easy cleaning of the bodywork (fully-clad gangway and tank bottom, vertical auger in the bodywork)

## SECURE

FOR YOUR PRODUCTS

Compartments are free of hydraulic lines, and extra cowling in the feed product

"All in the silo" cleaning designed to reduce the risks of cross-contamination

FOR YOUR OPERATORS

Optimum safety guaranteed: guardrail bars, ladder and safety rail, indicator lights, radio-control, cameras

Easy-to-use control panel to assist operators

## AESTHETIC

Meticulous finishing, owing to the quality procedures in place at every step of the production process
