

Company profile INTEC Engineering – English:

INTEC Engineering GmbH, founded in 1995, is a leading global supplier of industrial process heat technologies based in Bruchsal, southern Germany. As a family-run company, we combine decades of experience with a clear vision for the future. Our international network of offices, representatives and partners enables us to offer customized solutions and comprehensive customer support worldwide.

With a focus on quality, sustainability, innovation and engineering, INTEC offers customized systems and individual components for industrial process heat and renewable power generation in a wide range of industries. Our portfolio includes gas-, oil- and solid fuel-fired steam and thermal oil systems as well as a wide range of services from installation and commissioning to maintenance and after-sales support.

With our own production facilities in Bruchsal, we guarantee fast and flexible solutions for individual customer requirements. Many of our core components are developed and manufactured on site to ensure the highest quality and reliability.

With our brand promise “From Challenge to Power”, we emphasize our ability to transform complex challenges into efficient energy solutions. This claim reflects our passion and expertise to meet the changing demands of the global market while delivering innovative, sustainable solutions.

In the year of our 30th anniversary, we are delighted to showcase our products together with FinnsoBois at booth no. 6G114 during the Eurobois trade fair and look forward to welcoming you there.
