

# Tailored solutions for industrial fastening

increased  
productivity

accuracy &  
quality

reduced  
costs

faster  
delivery

guaranteed  
security

Family-owned, Handsaeme Machinery prioritizes lasting client relationships, offering personalized support worldwide from our base in Belgium.

Our skilled team collaborates closely with clients throughout the design, testing, installation, and servicing phases, tailoring solutions to fit your needs rather than pushing a one-size-fits-all approach.

With extensive experience and a global presence, we recognize the uniqueness of each client's system while implementing proven technologies and engineering principles to deliver tailored solutions.

*Handsaeme Machinery is not only a machine builder, but a reliable long-term partner for your automation plans.*

SMART AUTOMATION FOR THE WOOD INDUSTRY

## Solutions

for industrial fastening  
& handling

# Automated solutions for wood assembly

## ADDING VALUE TO YOUR OPERATIONS

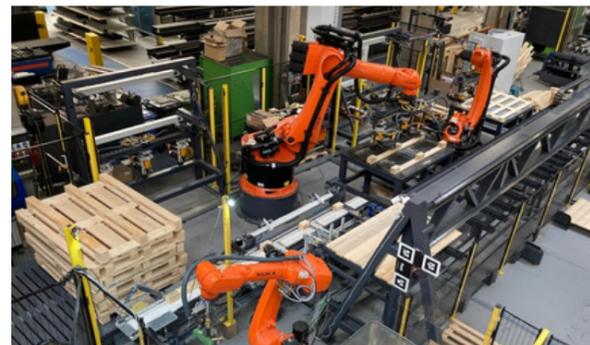

Streamline your production of pallets, crates, furniture, and more with Handsaeme Machinery's automated fastening systems. Designed for lean manufacturing, our intelligent solutions boost efficiency, reduce labor, and deliver a solid return on investment. With decades of industry expertise, we tailor each system to your needs –making smart automation accessible and effective.

### OUR PROVEN SOLUTIONS DELIVER:

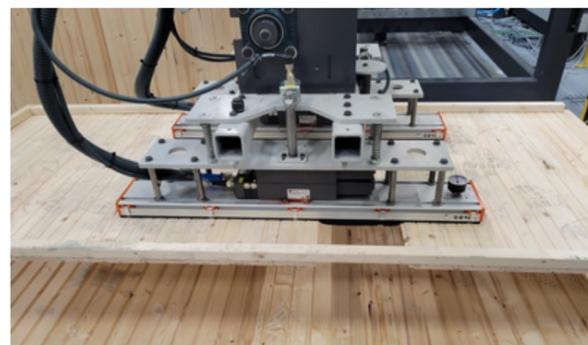

- Higher efficiency - faster assembly increases output
- Consistent quality - precise fastening ensures strong, lasting frames
- Lower labor costs - automation frees up skilled resources
- Less waste - optimized nailing reduces material loss and rework
- Better safety - automation minimizes manual strain and risk

### Pallets & crates

Production of ski's, decks and/or complete assembly lines for pallets and panel crates

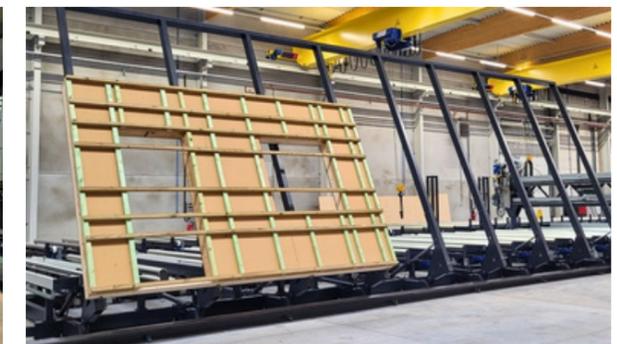

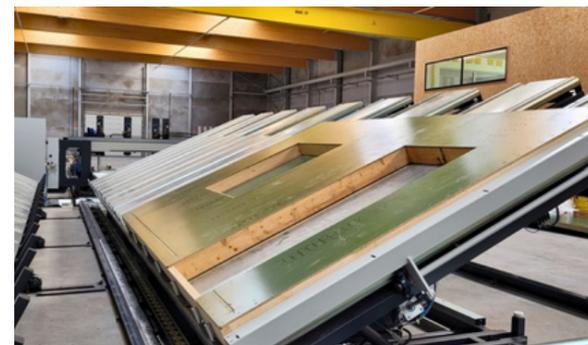

### Garden & furniture

Nailing, stapling or screwing your fencing, shed panels, bed steads etc.

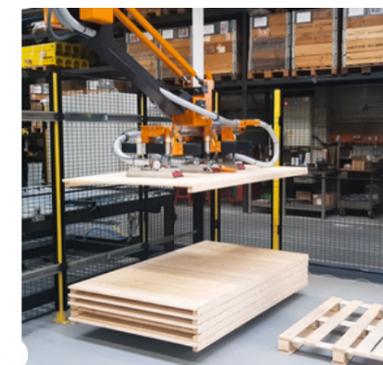

### Timber frame construction

Lean prefab wall and panel production with robotic support

### Additional features for smart automation

Options such as nail detection, bulk nails, fast auto-programming, manipulators, turn stations, conveyors, marking units, ...
