Year of foundation: 2015

INTEC GMK is an innovative company based in Germany close to Rostock that specialises in the development, design and operation of ORC (Organic Rankine Cycle) power plants.

Our range of services includes customised ORC systems for efficient power generation from industrial waste heat, geothermal energy and combustion heat of waste and biomass. The electrical output of the systems ranges from 25 kW<sub>el</sub> to 5 MW<sub>el</sub>

We supply turnkey ORC systems - from heat exchangers to turbines - and enable even low-temperature process heat to be efficiently converted into electrical energy.
