W-150 HEAVY DUTY "V" AUTOMATIC

TECHNICAL

The advent of "V" top carbide saws is improving edge finish where standard trim saws have traditionally been used. Promising results are being seen in a variety of new sawing applications. A ground "V" top surface is critical for accuracy and tooth life.

Improved accuracy and decreased grinding times are the result of a precision multi-bearing spindle combined with robust construction and proven mechanical systems.

Intuitive and easy to operate position controls allow quick and simple adjustment of top angles. In addition, the Wright engineered D-02008 diamond wheel is designed for free cutting and maintenance of the "V" shape.

FEATURES

- "POSITIVE STOP" CAM ACTUATION WITH HIGH SPEED TIMING
- .0005 DOWN FEED ACCURACY
- ENGINEERED FOR MAXIMUM DIAMOND WHEEL LIFE
- FILTERED FULL FLOOD COOLANT
- TOOTH COUNTER WITH AUTO STOP
- PROVEN MACHINE SYSTEMS
- DIGITAL SPINDLE MOTOR LOAD METER
- POWERED SAW LIFT

Specifications

Circle saw size	10" TO 30"
Power Consumption	1.5 kw
Voltage standard	230V 3PH 50/60
Air	2 C.F.M. @ 80
P.S.I.	
Ship Weight	1,425 LBS.
Crate Size	49" X 44" X 62"
