

COGNITIVE MIXED REALITY

ABOUT US

Touchline Interactive team is made of 3D specialists to provide the best quality technology.

Graphic designers and software developers are working together to create advanced solutions that fit your needs.

Our development process is aligned with the concepts of the Agile Manifesto.

It is important for us to deliver high quality & relevant solutions.

AR & VR EXPERTS

We are supporting major mobile platforms like Windows and Android as well as head mounted devices such as HoloLens, Oculus Rift and HTC Vive.

GooRoo

Professional Task Guidance Solution

GooRoo|Suite is a software platform that lets you easily create and deploy scenarios to guide technical operators through their working tasks.

GooRoo|Player has been designed to be used in the "real-world" environment and integrates innovative technology such as mixed-reality to guide the technical operator with contextual 3D information.

Key features:

- ✓ Step by step instructions
- ✓ Documentation integration (pdf, video, images)
- ✓ 3D Task animation
- ✓ Live Alerts Support
- ✓ Augmented Reality Visual Guiding
- ✓ Note & Picture taking
- ✓ Questions & Measurements
- ✓ Automatic Reporting
- ✓ Automatic Quality Control (AI)
- ✓ iOS/Android/Windows Support
- ✓ HoloLens Support

Industries

GooRoo helps companies that are facing significant challenges in various industry sectors such as Aerospace, Defense, Transportation, Energy and Electronics.

Reduce

Increase

Risk

- ➔ Show Alerts (warning & danger)
- ➔ Highlight dangerous areas & fragile equipment

Errors

- ➔ Augmented Reality guiding reduces errors by 90%

Time & Costs

- ➔ Save time for rare and complex tasks
- ➔ Augmented Reality allows operators to work 30% faster
- ➔ Save Training costs
- ➔ Facilitate turnover

Efficiency

- ➔ Present right information at the right time
- ➔ Use resources better
- ➔ Keep experts at the disposal of distributed workforce and leverage "regular" resources
- ➔ Keep operator focused

Compliance & Quality

- ➔ Facilitate task understanding (display complex procedure in context)
- ➔ Record and certify task execution
- ➔ Get field information (time to execute a task, take photos and notes...)

GooRoo|Editor is a powerful workstation application that enables you to rapidly develop your own operational scenarios.

GooRoo|Editor does not require programming skills. It provides an easy-to-use interface to create your 3D & augmented reality content and deploy it to your GooRoo|Player devices.
