ZERO-DOWNTIME PRODUCTIVITY

PRODUCTION MONITORING

FOA 

Welcome to the era of streamlined production monitoring with LinkedPlants®, where tracking KPIs such as MTTR, MTBF, efficiency, and synthetic yield is effortless. Ensure seamless operations by keeping a close eye on your production rates and equipment performance in real-time. LinkedPlants empowers you to anticipate and address potential issues before they escalate, ensuring optimal productivity at all times.

PMA

PREDICTIVE ALARMS & NOTIFICATIONS

Stay ahead of the curve with LinkedPlants® predictive alarms and instant notifications. Our advanced system analyses various parameters in real-time, allowing you to receive timely alerts for potential electrical and mechanical issues. Minimise downtime and maximise efficiency with proactive maintenance strategies.

INTELLIGENT POWER CONTROL

PCA 

Experience the future of energy management with LinkedPlants® intelligent power control feature. By utilising AI-based algorithms, our system optimises power usage and schedules standby modes intelligently, leading to significant reductions in energy consumption and operational costs. Embrace sustainability while enhancing your bottom line.

EPA

FILES & AUTO BACKUP

Ensure data security and continuity with LinkedPlants® automatic backup and file management system. Access critical information, compare historical data, and download files effortlessly whenever needed. With LinkedPlants®, you have a reliable partner for seamless operations and optimal performance.
